In Annex D add new subclause after D.1.3 as follows:

D.1.4 Other boundary indicators

NARROW NO-BREAK SPACE (202F): This character is a non-breaking space. It is similar to 00A0 NO-BREAK SPACE, except that it is rendered with a narrower width. When used with the Mongolian script this character is usually rendered at one-third of the width of a normal space, and it separates a suffix from the Mongolian word-stem. This allows for the normal rules of Mongolian character shaping to apply, while indicating that there is no word boundary at that position.

Page 708, Annex D

In Annex D add new subclause after D.2.4 as follows:

D.2.5 Mongolian shaping selectors

The following characters are used in conjunction with the letters in the Mongolian script.

MONGOLIAN FREE VARIATION SELECTOR ONE (180B);

MONGOLIAN FREE VARIATION SELECTOR TWO (180C);

MONGOLIAN FREE VARIATION SELECTOR THREE (180D):

A Mongolian Free Variation Selector character may immediately follow another character from the Mongolian collection to indicate a specific variant form of graphic symbol for that character, when the appropriate variant cannot be determined from the context. For each Mongolian character the number of variant forms that it can take is predetermined within each context. This number does not exceed three for any character.

MONGOLIAN VOWEL SEPARATOR (180E):

This character may be used between the Mongolian letter A or the Mongolian letter E at the end of a word

and the preceding consonant letter. It indicates a special form of the graphic symbol for the letter A or E and the preceding consonant. When rendered in visible form it is generally shown as a narrow space between the letters, but it may sometimes be shown as a distinct graphic symbol to assist the user.
