

ISO/IEC JTC 1/SC 2/WG 2
Universal Multiple-Octet Coded Character Set (UCS)
Secretariat: ANSI

Title: JPNddd vs. JIS X 0213 mapping table**Doc. Type:** National body contribution**Source:** Japan NB -SY/tks**Project:** 02.18.02**Status:** **For CD 10646-2 up-date.****Date:** 2000-04-06**Distribution:** SC 2/WG 2 members**Reference:** CD ballot comment J-6 on CD 10646-2, WG2 N2217

Attached please find a JIS X 0213 vs. JPNddd mapping table which to be used to convert JPNddd source data to JIS X 0213: 2000 code point data.

The conversion is requested by Japanese NB as a CD ballot comment J-6 for ISO/IEC CD 10646 part-2. And comment is accepted by the WG2 in it's #38 meeting in Beijing, China.

There are two notations. J3 and J4.

J3: This character is at JIS X 0213: 2000 level-3. (thus code point is level-3 xxxx)

J4: This character is at JIS X 0213: 2000 level-4.

Please note that the level-3 and level-4 are using different planes of JIS X 0213, thus they may have the same code points each other. Therefore, the J3/J4 notation is necessary.

While preparing this information, Japan noticed that there is a need of one more technical comment on clause 10.2 of the CD 10646-2.

The notations for dictionary and each national sources are missing. It is necessary to add information what's _HZ (, _KX, K, V3, HA) means. Referring to clause 27 of the part-1 may work for Taiwanese TCA-CNS, but does not work for any other sources.

Japan strongly requests to add those source notation information on FCD 10646-2 as a normative information. (It may be either in clause 10.2 or source data list)

--attachment--

This is a mapping table of Japanese Kanji in UCS Extension B. (2000.3.29 SY)

Column 1-6: JPNddd

Column 7-12: X0213:2000

J3: Level 3 Kanji

J4: Level 4 Kanji
