Attachment 1 - China

China is in favor of SC2 N 3449, Amendment of ISO/IEC 10646-1: 2000, with comments.

1) China agrees to add 5 Yi radicals raised by Ireland (WG2 resolution M38.8), China proposes to add 2 more radicals in addition to those 5 radicals.

glyph	name
⌒	WW (This is a secondary high tone symbol)
∫	MIEP

2) Considering comments from Chinese linguists, China is against the proposal on 61 CJK compatibility ideographs from JIX X0213 (WG2 resolution M38.11).

Attachment 2 - Japan

Japan agrees the proposal described in SC2 N3449. However, There is a draft AMD-1 as WG2 N2228. This draft is not complete, therefore, review process of the n2228 is needed.

Attachment 3 - Norway

We do not believe there should be a large architectonic change in 10646 at present. We also think that there may be needs in the future for space exceeding 21 bits (combination of glyphs and coded characters etc). We want to keep the 31 bit code space opportunity.
