Foreword

This European Prestandard has been prepared by Technical Committee CEN/TC 304 "Information and Communications Technologies – European Localization Requirements", the secretariat of which is held by STRÍ.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to announce this European Prestandard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

This European Prestandard is a revision of the European Standard EN 1923:1998. The main purpose of the revision is to include, and thereby to publicize the availability of, 8-bit code tables developed after the publication of EN 1923:1998; in particular the code table of ISO/IEC 8859-15 and the tables of other additions to the ISO/IEC 8859 series.

Although CEN/TC 304 decided that a revision of the contents of EN 1923:1998 was necessary, some uncertainty existed whether the standard as such is needed by the data community in the present-day direction towards multi-octet coding schemes. The committee therefore decided to classify the revised document as a European Prestandard. Its usefulness will thereby become evaluated.

The contents of this document differs from that of EN 1923:1998 in the following respects:

- Additional coding scheme options have been introduced, corresponding to ISO/IEC 8859 parts 14, 15 and 16 (Latin-8, Latin-9 and Latin-10), and also to ISO-IR 204 ("Latin-1 alternative with Euro").
- For consistency, the definitions of all options now refer to registrations according to ISO 2375:1985 in the ISO "International register of coded character sets to be used with escape sequences". Relationships to ISO/IEC 10646-1:2000 specifications are also given, to the extent applicable.
- An informative Annex A has been added, containing ISO/IEC 10646-1:2000 identifications for all characters in the options character sets.
- An informative Annex B has been added, illustrating the code tables for all options.
- An informative Annex C has been added, listing relationships to ISO/IEC 7/8-bit coding standards.
- Some editorial changes have been made to the text.

This European Prestandard is only available in English.

This page intentionally left blank

European character repertoires and their coding – 8-bit single-byte coding

1 Scope

This European Prestandard specifies the graphic character repertoires and their single-byte coding, which are available for use for information interchange between information processing systems and for use within such systems, in the scripts that are commonly used by the members of CEN/CENELEC and the Institutions of the European Union and the European Free Trade Association.

This European Prestandard does not specify the interchange of information using a telematic service. The character repertoire and the coding used by a telematic service are defined by the specification of that service. The transmission of information based on the specifications of this European Prestandard using a telematic service may necessitate an adaptation of the number of characters of a repertoire (repertoire transformation function) or a change to the coding (code transformation function).

2 Normative references

This Prestandard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this Prestandard only when incorporated by amendment or revision. For undated references the latest edition of the publication referred to applies.

ISO/IEC 2022:1994, *Information technology – Character code structure and extension techniques*.

ISO 2375:1985, *Data processing – Procedure for registration of escape sequences*

ISO/IEC 4873:1991, *Information technology – ISO 8-bit code for information interchange – Structure and rules for implementation*.

ISO/IEC 10367:1991, *Information technology – Standardized coded graphic character sets for use in 8-bit codes*

ISO/IEC 10646-1:2000, *Information technology – Universal Multiple-Octet Coded Character Set (UCS) – Part 1: Architecture and Basic Multilingual Plane*.

3 Definitions

For the purposes of this Prestandard the definitions of ISO/IEC 10646-1:2000 and the following definitions apply:

3.1 CC-data-element: An element of interchanged information that is specified to consist of sequences of coded representations of characters, in accordance with one or more identified standards of coded character sets.

3.2 device: A component of information processing equipment which can transmit, and/or can receive, coded information within CC-data-elements. (It may be an input/output device in the conventional sense, or a process such as an application program or gateway function).

3.3 user: A person or other entity that invokes the services provided by a device. (This entity may be a process such as an application program if the "device" is a code converter or a gateway function, for example).

3.4 G-set: The same as "coded graphic character set" in ISO/IEC 2022:1994.

4 Scenario description

4.1 Repertoires

There are four collections of graphic characters identified in this European Prestandard, comprising the characters needed for the:

- Latin Script
- Greek Script
- Cyrillic Script
- Symbols Repertoire

These collections are further divided into repertoires as described in clause 6.

4.2 Combinations of repertoires and their coding

This European Prestandard identifies combinations of character repertoires and their coding as options. An option identified in this European Prestandard defines only the minimum requirements, in terms of character repertoire and coding, applied to a conforming device. Additional capabilities of the originating or receiving device may be used, during the information interchange, subject to bilateral agreement.

8-bit single byte coding shall be a version of ISO/IEC 4873:1991, clause 9; with the exception of the Invariant-Latin repertoire (see below).

NOTE – This European Prestandard is intended to be used with other standards specifying control functions, as needed by the base coding standards.

5 Conformance

5.1 Conformance for information interchange

A CC-data-element within coded information for interchange is in conformance with this Prestandard if it conforms to the requirements of clause 5.2.2, and either or both of clauses 5.2.3 and 5.2.4. A claim of conformance shall identify the document which contains the description specified in clause 5.2.2, and shall identify the option adopted.

5.2 Conformance of devices

5.2.1 General

A device is in conformance with this Prestandard if it conforms to the requirements of clause 5.2.2, and either or both of clauses 5.2.3 and 5.2.4. A claim of conformance shall identify the document which contains the description specified in clause 5.2.2, and shall identify the option adopted.

5.2.2 Device description

A device that conforms to this Prestandard shall be the subject of a description that identifies the means by which the user may supply characters to the device, or may recognize them when they are made available to him, as specified respectively in clauses 5.2.3 and 5.2.4.

5.2.3 Originating devices

An originating device shall allow its user to supply any sequence of graphic characters from the option adopted, and shall be capable of transmitting their coded representations within a CC-data-element.

5.2.4 Receiving devices

A receiving device shall be capable of receiving and interpreting any coded representations of graphic characters that are within a CC-data-element, and that conform to clause 6.1, and shall make the corresponding characters available to the user in such a way that the user can identify them from among those conforming to the option adopted, and can distinguish them from each other.

6 Repertoire descriptions

The following descriptions refer to registrations according to ISO 2375:1985 in the ISO "International register of coded character sets to be used with escape sequences" (ISO-IR).

NOTE – Some identical coded character sets or subsets/supersets of them also exist in ISO/IEC 10646:2000 and/or in ISO/IEC 7/8-bit standards; see annexes A and C for details.

6.1 Latin Script

Nine subsets of this collection of graphic characters are identified, each with a subset/superset relation with the others. The subsets are the following:

The **Invariant-Latin** repertoire containing 83 characters as defined in ISO-IR 170 (repertoire **IVL**).

The **Initial-Latin** repertoire containing 95 characters as defined in ISO-IR 6 (repertoire **IL**). It is a true superset of the Invariant-Latin repertoire.

The **Basic-Latin-a** repertoire comprising the Initial-Latin repertoire plus the repertoire of ISO-IR 100 "Latin-1 Supplement" (repertoire **BLa**). It is a true superset of the Initial-Latin repertoire.

NOTE – This set was named **Basic-Latin (BL)** in EN 1923:1998.

The **Basic-Latin-b** repertoire comprising the Initial-Latin repertoire plus the repertoire of ISO-IR 204 "Supplementary Set for Latin-1 alternative with Euro sign" (repertoire **BLb**). It is a true superset of the Initial-Latin repertoire.

NOTE – The set has been added in the revision, to provide a coding scheme corresponding to Basic-Latin-a but also containing the Euro sign.

The **Basic-Latin-c** repertoire comprising the Initial-Latin repertoire plus the repertoire of ISO-IR 203 "European Supplementary Latin Set ('Latin-9')" (repertoire **BLc**). It is a true superset of the Initial-Latin repertoire.

NOTE – The set has been added in the revision, to provide a coding scheme containing the Euro sign, and also to complement the repertoire of European letters.

The **Large-Latin-8-a** repertoire for the 8-bit environment, comprising the union of the Basic-Latin-a repertoire with the repertoires of ISO-IR 101 and ISO-IR 154 (repertoire **LL8a**). It is a true superset of the Basic-Latin-a repertoire.

The **Large-Latin-8-b** repertoire for the 8-bit environment, comprising the union of the Basic-Latin-b repertoire with the repertoires of ISO-IR 101 and ISO-IR 154 (repertoire **LL8b**). It is a true superset of the Basic-Latin-b repertoire.

The **Celtic** repertoire containing 96 characters as defined in ISO-IR 199 (repertoire **BK**).

NOTE – The set has been added in the revision. It is intended for use together with the Initial-Latin repertoire.

The **Romanian** repertoire containing 96 characters as defined in ISO-IR 226 (repertoire **BR**).

NOTE – The set has been added in the revision. It is intended for use together with the Initial-Latin repertoire.

6.2 Greek Script

In the 8-bit environment only one Greek repertoire is defined, which is:

The Basic-Greek repertoire comprising the characters defined in ISO-IR 227 (**Repertoire BG**).

6.3 Cyrillic Script

In the 8-bit environment only one Cyrillic repertoire is defined, which is:

The Basic-Cyrillic repertoire comprising the characters defined in ISO-IR 144 (**Repertoire BC**).

6.4 The symbols repertoire

This repertoire shall comprise the characters defined in ISO-IR 155 (**Repertoire BS**).

7 Coding methods applicable

7.1 Eight-bit single-byte coding

Each character shall be coded by the use of a single byte. No control function shall be used that would cause characters within a repertoire to be combined to represent any other character.

The various repertoires shall form G-sets, according to the relevant provisions of ISO/IEC 2022:1994.

When code extension techniques are applied, then the provisions of ISO/IEC 2022:1994 and ISO/IEC 4873:1991 shall be followed. The application should always conform to a certain level of ISO/IEC 4873:1991 (except for the Invariant-Latin repertoire; see below).

When code extension techniques are applied, then all the necessary control functions must exist, coded as specified in ISO/IEC 4873:1991.

7.2 Formation of G-sets

The characters belonging to the repertoires defined in clause 6 shall be arranged to the code table positions and shall form G-sets as specified in the following.

7.2.1 Invariant-Latin repertoire

The IVL repertoire shall always form a G0 code element according to ISO/IEC 2022:1994.

The characters shall be arranged in the code table as specified in ISO-IR 170.

The escape sequence to designate this set will be:

ESC 02/08 02/01 04/02

7.2.2 Initial-Latin repertoire

The IL repertoire shall always form a G0 code element in a version of ISO/IEC 4873:1991.

The characters shall be arranged in the code table as specified in ISO-IR 6.

The escape sequence to designate this set will be:

ESC 02/08 04/02

7.2.3 Basic-Latin-a repertoire

The BLA repertoire shall form two G-sets in a version of ISO/IEC 4873:1991.

The G0 element shall contain the Initial-Latin repertoire and shall be coded and designated according to paragraph 7.2.2.

The "Latin-1 Supplement" repertoire shall form either a G1 or a G2 or a G3 set in a version of ISO/IEC 4873:1991. The characters shall be arranged in the code table as specified in ISO-IR 100.

The escape sequences to designate this set will be:

ESC 02/13 04/01 as G1

ESC 02/14 04/01 as G2

ESC 02/15 04/01 as G3

7.2.4 Basic-Latin-b repertoire

The BLb repertoire shall form two G-sets in a version of ISO/IEC 4873:1991.

The G0 element shall contain the Initial-Latin repertoire and shall be coded and designated according to paragraph 7.2.2.

The "Supplementary Set for Latin-1 alternative with Euro sign" repertoire shall form either a G1 or a G2 or a G3 set in a version of ISO/IEC 4873:1991. The characters shall be arranged in the code table as specified in ISO-IR 204.

The escape sequences to designate this set will be:

ESC 02/13 06/03 as G1

ESC 02/14 06/03 as G2

ESC 02/15 06/03 as G3

7.2.5 Basic-Latin-c repertoire

The BLc repertoire shall form two G-sets in a version of ISO/IEC 4873:1991.

The G0 element shall contain the Initial-Latin repertoire and shall be coded and designated according to paragraph 7.2.2.

The "European Supplementary Latin Set" repertoire shall form either a G1 or a G2 or a G3 set in a version of ISO/IEC 4873:1991. The characters shall

be arranged in the code table as specified in ISO-IR 203.

The escape sequences to designate this set will be:

ESC 02/13 06/02 as G1
ESC 02/14 06/02 as G2
ESC 02/15 06/02 as G3

7.2.6 Large-Latin-8-a repertoire

The LL8a repertoire shall form four G-sets in a version of ISO/IEC 4873:1991.

Two G-sets will contain the BLa repertoire and shall be coded and designated according to 7.2.3.

The rest of the repertoire shall be arranged in the code table positions as specified in ISO-IR 101 and ISO-IR 154, thus forming two G-sets that can be used as G1 or G2 or G3 sets in a version of ISO/IEC 4873:1991.

The escape sequences to designate the registration 101 set will be:

ESC 02/13 04/02 as G1
ESC 02/14 04/02 as G2
ESC 02/15 04/02 as G3

The escape sequences to designate the registration 154 set will be:

ESC 02/13 05/00 as G1
ESC 02/14 05/00 as G2
ESC 02/15 05/00 as G3

7.2.7 Large-Latin-8-b repertoire

The LL8b repertoire is identical to Large-Latin-8-a except that two G-sets will contain the BLb repertoire, coded and designated according to 7.2.4. For the rest of the repertoire the same coding and designations as specified in 7.2.6 applies.

7.2.8 Celtic repertoire

The BK repertoire shall form one G-set in a version of ISO/IEC 4873:1991.

The repertoire shall be arranged in the code table as specified in ISO-IR 199 as a G1 or G2 or G3 set.

The escape sequences to designate this set will be:

ESC 02/13 05/15 as G1
ESC 02/14 05/15 as G2
ESC 02/15 05/15 as G3

7.2.9 Romanian repertoire

The BR repertoire shall form one G-set in a version of ISO/IEC 4873:1991.

The repertoire shall be arranged in the code table as specified in ISO-IR 226 as a G1 or G2 or G3 set.

The escape sequences to designate this set will be:

ESC 02/13 06/06 as G1
ESC 02/14 06/06 as G2
ESC 02/15 06/06 as G3

7.2.10 Basic-Greek repertoire

The BG repertoire shall form one G-set in a version of ISO/IEC 4873:1991.

The repertoire shall be arranged in the code table as specified in ISO-IR 227 as a G1 or G2 or G3 set.

The escape sequences to designate this set will be:

ESC 02/13 / as G1
ESC 02/14 / as G2
ESC 02/15 / as G3

NOTE – Registration 227 is still under processing, and final bytes have not yet been assigned.

7.2.11 Basic-Cyrillic repertoire

The BC repertoire shall form one G-set in a version of ISO/IEC 4873:1991.

The repertoire shall be arranged in the code table as specified in ISO-IR 144, as a G1 or G2 or G3 set.

The escape sequences to designate this set will be:

ESC 02/13 04/12 as G1
ESC 02/14 04/12 as G2
ESC 02/15 04/12 as G3

7.2.12 Symbols repertoire

The BS repertoire shall form one G-set in a version of ISO/IEC 4873:1991.

The repertoire shall be arranged in the code table as specified in ISO-IR 155, as a G1 or G2 or G3 set.

The escape sequences to designate this set will be:

ESC 02/13 05/01 as G1
ESC 02/14 05/01 as G2
ESC 02/15 05/01 as G3

8 Identification of options

If a reference to this European Prestandard is made in another European Standard or Prestandard, the option adopted shall be clearly identified.

Table 1 on the next page summarizes the options that conform to the requirements of this European Prestandard.

Table 1

OPTION	REPERTOIRE	G-SET USED	ISO/IEC 4873 LEVEL
A	IVL	G0	(Not applicable)
B	IL	G0	1 OR 2 OR 3
Cx	BLx	G0/G1	1 OR 2 OR 3
Dy	LL8y	G0/G1/G2/G3	2 OR 3
E	BG	G1/G2/G3	1 OR 2 OR 3
F	BC	G1/G2/G3	1 OR 2 OR 3
G	BS	G1/G2/G3	1 OR 2 OR 3
H	BK	G1/G2/G3	1 OR 2 OR 3
J	BR	G1/G2/G3	1 OR 2 OR 3
BE	IL+BG	G0/G1	1 OR 2 OR 3
CxE	BLx+BG	G0/G1/G2	2 OR 3
BEG	IL+BG+BS	G0/G1/G2	2 OR 3
CxEg	BLx+BG+BS	G0/G1/G2/G3	2 OR 3
BF	IL+BC	G0/G1	1 OR 2 OR 3
CxF	BLx+BC	G0/G1/G2	2 OR 3
BFG	IL+BC+BS	G0/G1/G2	2 OR 3
CxFG	BLx+BC+BS	G0/G1/G2/G3	2 OR 3
BEF	IL+BG+BC	G0/G1/G2	2 OR 3
BEFG	IL+BG+BC+BS	G0/G1/G2/G3	2 OR 3
CxEF	BLx+BG+BC	G0/G1/G2/G3	2 OR 3
BH	IL+BK	G0/G1	1 OR 2 OR 3
BJ	IL+BJ	G0/G1	1 OR 2 OR 3

The letter "x" in the table above stands for "a", "b" or "c", indicating repertoire Basic-Latin-a, Basic-Latin-b or Basic-Latin-c, respectively. The letter "y" stands for either "a" or "b", indicating repertoire Large-Latin-8-a or Large-Latin-8-b respectively.

For instance, option Ca will specify repertoire Basic-Latin-a; and option CcE repertoire Basic-Latin-c + Basic-Greek.

2001-03-03

Annex A (informative)

Specifications of referenced ISO-IR code tables

Several of the ISO-IR registrations referenced in clauses 6 and 7 were developed before ISO/IEC 10646 existed. The character names in those registrations are therefore not harmonized with the names in ISO/IEC 10646-1, and character identifications (on the form U+xxxx) are missing.

In this informative annex the code tables of all the registrations referred to are presented, with character names harmonized and identifiers added. Comments on their relationship to corresponding tables in ISO/IEC 10646-1:2000 are also provided.

The characters of this set are defined in ISO/IEC 10646-1:2000 in its Row 25

NOTE – This registration is still under processing. The table above shows the scheme as submitted by the sponsoring authority (ELOT).

This page intentionally left blank

Annex B (informative)

Code table illustrations

In the following pages the code tables of all the options are illustrated. This informative annex is intended as an easy-to-use guide for implementors.

It shall be noticed that EN 1923 – as different from e.g. ISO/IEC 8859 – permits the assignment of all its defined "right-hand" character sets as either G1 or G2 or G3. The use of the three grids named G1/G2/G3 in the following illustrations therefore does not imply any fixed set assignments for the respective schemes.
