ISO/IEC JTC1/SC2/WG2 N2316

## Title: Graphic representation of the Roadmap to the BMP, Plane 0 of the UCS

Source: Ad hoc group on Roadmap **Status: Expert contribution** 

Date: 2001-01-09

Action: For confirmation by ISO/IEC JTC1/SC2/WG2

Replaces: N2313

The following tables comprise a real-size map of Plane 0, the BMP (Basic Multilingual Plane) of the UCS (Universal Character Set). To print the HTML document it may be necessary to set the print percentage to 90% as the tables are wider than A4 or US Letter paper. The tables are formatted to use the Times font.

The following conventions are used in the table to help the user identify the status of the proposals here (colours can be seen in the updated HTML version of this document, http://www.egt.ie/standards/iso10646/bmp-roadmap-table.html. The PDF version of this document http://www.dkuug.dk/jtc1/sc2/wg2/docs/n2316.pdf is probably more convenient for printing.

- Bold text indicates an allocated (that is, ballotted and published) character collection. Links to the code charts are given where the text is underlined.
- (Bold text between parentheses) indicates scripts which have been accepted for processing as an amendment to the standard.
- (Text between parentheses) indicates scripts for which proposals have been submitted to WG2 or the UTC.
- ¿Text beween question marks? indicates scripts for which detailed proposals have not yet been written. ??? in a block indicates that no suggestion has been made regarding the block allocation.

NOTE: With regard to the revision practice employed in this document, when scripts are actually proposed to WG2 or to the UTC, the practice is to "front" them in the zones to which they are tentatively allocated, and to adjust the block size with regard to the allocation proposed.

The size and location of the unallocated script blocks are merely proposals based on the current state of planning. The size and location of a script may change during final allocation of the script.

NOTE: As far as is possible, half-row (128) boundaries are observed in planning.

Areas containing RTL scripts, as well as the Surrogates Zone and the Private Use Zone are shaded grey here informatively.

This document is being maintained and updated as a service to ISO/IEC JTC1/SC2/WG2 and the Unicode Technical Committee. Versions formally submitted to WG2 contain a document number in the header. The most recent WG2 document is available on the WG2 website, as N2316.
