DE	General	General	ge	The German comments regarding unnecessary proliferation of Canaanite scripts made in the PDAM and FPDAM Ballots, which are given in the DoC in document JTC1/SC2 N 3832, were not accepted by JTC 1/SC 2/WG 2. We are of the opinion that these technical comments are still valid and thus the German vote on the ISO/IEC 10646:2003/FDAM 2 remains negative.

Comment document:

ISO/TR 11941:1996 reflects both proposals of north and south on the transliteration of Korean script into Latin characters.

But the reversion of ISO/IEC 10646:2003 reflects only the south Koreans proposal.

Example: AC00 * GA (KA) original

AC00 * GA reversion
