## Proposed New Characters: Pipeline Table

The following is a summary of the characters, scripts and variation sequences that the [Unicode Technical Committee](#) has accepted for inclusion in future versions of the Unicode Standard. It is presented here to help implementers track future additions to the Standard. For more information, including the planned use of remaining code space, see [About the Pipeline Table](#). Experts interested in reviewing proposed scripts should consult the [Proposed New Scripts](#) page.

*This page was last updated 21-May-2008*

**Caution:** use of proposed or accepted characters is at implementers' own risk; the composition and allocation of the characters may [change](#) before they are adopted in the Unicode Standard.

**NOTE:** If the Proposed Allocation or Character Sequence field below is marked with a "\*", there is a pending change in the code points for the proposed allocation, a pending name change, or both. Action by a subsequent UTC meeting is required to resolve such differences, and the results will be posted back into this table once the differences between the UTC and ISO positions are formally reconciled by the UTC.

Entries in active technical ballot (Stage 4 and Stage 5 in the ISO Status fields) have a light green background. Entries not yet in active technical ballot (N/A, Stages 1 - 3 in the ISO Status fields) have a light yellow background. Entries which have completed technical balloting and which are either in JTC 1 consideration ballot or pending publication (Stages 6 - 7 in the ISO Status fields) have a white background.

### Characters and Scripts Accepted for Unicode

| Proposed Allocation | Count | Name                                                                       | UTC Status              | ISO Status |

### Variation Sequences Accepted for Unicode

| Character Sequence   | Context | Description of Variant Appearance | UTC Status | <u>ISO Status</u> |
|----------------------|---------|-----------------------------------|------------|-------------------|
| no entries currently | --      | --                                | --         | --                |

### Named Sequences Accepted for Unicode

| Character Sequence | Name               | UTC Status           | <u>ISO Status</u>   |
|--------------------|--------------------|----------------------|---------------------|
| 0B95<br>0BCD**     | TAMIL CONSONANT K  | 2008-Feb-07 Accepted | 2008-Apr-25 Stage 4 |
| 0B95<br>0BBE**     | TAMIL SYLLABLE KAA | 2008-Feb-07 Accepted | 2008-Apr-25 Stage 4 |

\*\* These two entries are illustrative. The Unicode Technical Committee has accepted named sequences for all Tamil consonants and syllables. For the complete list of these accepted named sequences, see [NamedSequencesProv.txt](#). The accepted sequences will be moved to [NamedSequences.txt](#), after the required synchronization with ISO/IEC 10646 has been completed.
