ISO/IEC JTC 1/SC 2/WG 2

Universal Multiple-Octet Coded Character Set (UCS) - ISO/IEC 10646

Secretariat: ANSI

Doc Type	Working Group Document
Title	Proposal for encoding Nüshu in the SMP of the UCS
Source	China
Action	For consideration by UCS
Date	2009-3-18

Secondly Revised Proposal for encoding Nüshu**Note:**

This revised proposal on Nüshu Scripts was generated according to comments or questions raised in SEI UC Berkley's proposal WG2n3497 (Comments on N3463: Revised Proposal for encoding Nüshu in the SMP of the UCS). Chinese Nüshu scholars and proposers will appreciate WG2 experts for more comments to perfect the proposal.

1. Naming

According to comments in WG2n3487, the character names were renamed, e.g., "YIA" → "YI-A", "YID" → "YI-D", etc., to distinguish variants which have the same basic readings. Besides, the pronunciations of some characters based on "chengguan (城關)" phonology were revised too.

2. Allograph

Allograph issues were already stated in previous proposals: Allograph is a popular phenomenon in languages, especially for characters in folks. There is NO authoritative criterion for this issue. Our methodology is: first, to apply the statistic analysis towards the original data (corpus of 220,000 characters) word by word; second, we choose the theory of "character-base" as basement of encoding proposal. (Similar to the phonological criterion theory, pick those in highest frequency as basic characters.) Thus, the encoded characters are sufficient to record native language completely.

Nüshu is a kind of "living script" which is still in use today. The application of encoded basic characters will avoid unnecessary and new creation of characters, and confusion in writing, which is in favor of the scientific use of Nüshu.

It is believed by Nüshu scholars in China that it is unnecessary and impossible to encode all allograph in UCS. The scholars do not oppose to extend the repertoire to include all Nüshu allograph, but not on current stage. The most important is to meet

demands of needing of encoded basic characters of Nüshu.

A. Administrative

1. Title:	Proposal for encoding Nüshu in the SMP of the UCS
2. Requester's name:	China
3. Requester type (Member body/Liaison/Individual contribution):	Member body
4. Submission date:	2008-10-06
5. Requester's reference (if applicable):	
6. Choose one of the following:	
This is a complete proposal:	Yes
(or) More information will be provided later:	

B. Technical – General

1. Choose one of the following:		
a. This proposal is for a new script (set of characters):	Yes	
Proposed name of script:	Nüshu	
b. The proposal is for addition of character(s) to an existing block:		
Name of the existing block:	389	
2. Number of characters in proposal:		
3. Proposed category (select one from below - see section 2.2 of P&P document):		
A-Contemporary	B.1-Specialized (small collection)	B.2-Specialized (large collection)
C-Major extinct	D-Attested extinct	E-Minor extinct
F-Archaic Hieroglyphic or deographic	G-Obscure or questionable usage symbols	
4. Is a repertoire including character names provided?	yes	
a. If YES, are the names in accordance with the “character naming guidelines” in Annex L of P&P document?		
b. Are the character shapes attached in a legible form suitable for review?	Yes	
5. Who will provide the appropriate computerized font (ordered preference: True Type, or PostScript format) for publishing the standard?	Weifang Beida Jade Bird Huaguang Imagesetter Co., Ltd.	
If available now, identify source(s) for the font (include address, e-mail, ftp-site, etc.) and indicate the tools used:		
used: chenzh@cesi.ac.cn		
6. References:		
a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?	Yes	
b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?	Yes	
7. Special encoding issues:		
Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please		
No		

enclose information)?

8. Additional Information:

Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behaviour information such as line breaks, widths etc., Combining behaviour, Spacing behaviour, Directional behaviour, Default Collation behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at <http://www.unicode.org> for such information on other scripts. Also see <http://www.unicode.org/Public/UNIDATA/UCD.html> and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.

C. Technical - Justification

1. Has this proposal for addition of character(s) been submitted before?

No

If YES explain

2. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)?

Yes

If YES, with *the Government of Yongzhou; The Committee for Female's Script whom? (Niushu) of Chinese Folk Literature and Art Society*

If YES, available relevant documents:

3. Information on the user community for the proposed characters (for example:

size, demographics, information technology use, or publishing use) is included?

Yes

Reference: *Niushu was used by women in Jiangyong and now by local people.*

4. The context of use for the proposed characters (type of use; common or rare)

common

Reference *It is widely used for communication and tourism development by local people*

5. Are the proposed characters in current use by the user community?

Yes

If YES, where? Reference:

Jiangyong, Hunan, China

6. After giving due considerations to the principles in the P&P document must the proposed characters be entirely

in the BMP?

No

If YES, is a rationale provided?

If YES, reference:

7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?

Yes

8. Can any of the proposed characters be considered a presentation form of an existing

character or character sequence?

No

If YES, is a rationale for its inclusion provided?

If YES, reference:

9. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters?

No

If YES, is a rationale for its inclusion provided?	
If YES, reference:	
10. Can any of the proposed character(s) be considered to be similar (in appearance or function) to an existing character?	<i>No</i>
If YES, is a rationale for its inclusion provided?	
If YES, reference:	
11. Does the proposal include use of combining characters and/or use of composite sequences?	<i>No</i>
If YES, is a rationale for such use provided?	
If YES, reference:	
12. Does the proposal contain characters with any special properties such as control function or similar semantics?	<i>No</i>
If YES, describe in detail (include attachment if necessary)	
13. Does the proposal contain any Ideographic compatibility character(s)?	<i>No</i>
If YES, is the equivalent corresponding unified ideographic character(s) identified?	
If YES, reference:	

D Proposal

I Introduction

(I) Generalization

Nüshu is a kind of one and only female characters in today's world, which comes down around Xiaoshui Valley in Jiangyong County, Hunan Province. It is widely used for narrative and private prosecution among local women. Customarily Nüshu characters appear to be italics ,with a rough shape as the Chinese character "多". In this sense, Nüshu is defined as a variant form of Chinese characters. A character of Nüshu represents an independent syllable that maybe records a group of homophone or a group of characters with similar pronunciation in their local dialect. Based on survey and statistics of the works of Nüshu old ladies in the last generilaztion we can find, we found that everyone just used about four or five hundred characters to record a complete local dialect. There are two separate writing systems in Jiangyong: one is Chinese characters used by men while the other is Nüshu which is written

to communicate among local women. We will introduce Nüshu as following:

A. Nüshu is not a secret language, but free, open, natural and positive. The reason why its use is limited among the women is that local male society has paid no attention to the activity of women such as reading and singing the songs written in the paper and fans (that is typical Nüshu culture activity.)

B. Nüshu records the local Chinese dialect as a syllabic words system. A character represents a group of homophones and characters with similar pronunciation. So less than four hundred basic characters are enough to record and represent their local dialect of Xiaoshui in Jiangyong which is the area of Chenguan local dialect (according to Huang Xuezhen, 2003) . Every Nüshu elder woman just used no more than 400 basic characters (about from four hundred to five hundred with allograph included) to record more than 400 syllables (about 1200 syllables with tones included). Its most typical feature is to record many words with few characters. So it is a false view to create and add certain characters arbitrarily just because of limited existing characters.

C. Nüshu is a variant form in the development process of Chinese character. Specially, it is a variant form of Kaishu (a regular Chinese script). After the statistics and research of the basic characters from traditional passed down works of anonymous writers, we have come to the conclusion that Nüshu originates from Chinese characters and there are three ways to change into Nüshu: basically direct borrowing from Chinese, modified variant and derivative new characters from common components.

D. Seven-character songbook is the main form besides few five-character poems. Autobiographies, letters, folk songs, monody, narration and translation constitute its most contents, which reflect the regional historical culture and civil life. The study of these songbooks has widely academic value such as history, nation, folk-custom, literature and linguistics.

E. Nüshu-writers usually write on cloth covers, scrip, fans, cloth-handkerchiefs and flowered belt.

F. There is no punctuation in the the system of Nüshu except one sign  representing repeating characters and one small circle and one small arrow filling in the blank at the end of the lines in the works.

Nüshu came to the world and developed with the development of history. But now the aboriginality of Nüshu has disappeared from the stage of the history. The local government hasn't cared about it until the end of the twentieth century. So most works were scattered and lost at home and abroad. Since the beginning of the twenty-first century, endangered Nüshu has suddenly become hot. Inauthentic characters, books, villages and some nonsensical sayings concealed the real Nüshu. So it is time for us to prevent the abnormal phenomena and keep it from distortion.

(II)Nüshu is widely used and has great value nowadays.

Nüshu has successfully been a member of the first national culture heritage list, and the government is trying their best to apply for the world non-material culture heritage to the UN.

A. There are two kinds of script systems to record their dialect: Nüshu used by women and chinese characters used by men. A new book *Nüshu chrestomathy* has been published by

Hunan People Press as the local textbook.

B. Local women still use Nüshu to record important things and create literatures. Some examples: He Yanxin once writed to farm leaders to ask for help in Nüshu and created many poems during the period of SARS; He Jinghua mourned for her son and comforted her daughter-in-law after her son died from a traffic accident and shared similar experiences with other old ladies in the form of writing letters in Nüshu.

C. Local women would publish many poems in ***Hunan Daily*** especially during some important holidays such as He Jinghua.

D. One People's Congress Commissioner Hu Meiyue made a speech in the People's Congress of Yongzhou city.

E. Several Nüshu handwriting societies have been built up accompanying with Nüshu handwriting turning up such as Zhengzhou of Henan Province and Yongzhou of Hunan Province. Nüshu is gradually used to write some poems of Mao Zedong, some logoes of welcoming Olimpic Games at 2008. Besides that, Nüshu was sent to Foreign President's wife as a national gift. Up to now, some men share with the joys brought by Nüshu and become Nüshu lover.

F. The font of Nüshu becomes to be a style of Hanzi such as Songti, Kaiti and Lishu.

Now Nüshu gradually comes into the times of industrialization; especially as a travel resource.

(III) Related research association and its function

CFFSCFLAS is the short of The Committee for Female's Script (Nüshu) of Chinese Folk Literature and Art Society. It is a unique research organization in China. You can find its related rules through <http://www.nvshu.com.cn/association/zhangcheng.htm>. And it has rights to offer good advice to the government. And this organization suggests basic characters should be prior to be spread and popularized in the text book which is published by the Jiangyong Government.

II Process description

(I) Choosing graphs

1. the collection and collation of Nüshu characters

Chinese Nüshu works collection which is published by *China Publishing House at 2005* included more than 90% original ecological data. We identified every Nüshu character of the book by finding its corresponding Chinese character. Besides that, based on the *Chengguan* accent which is investigated and published as *Jiangyong dialect research* by Huang Xuezhen, 1993, we make out the pronunciation of each Nüshu character and establish a character table respectively in the order of strokes and phonetics.

The following table shows us the difference of the number due to the individual habit. The table shows us one of the statistic results of the book *Nüshu Character comparison*.

Authors of the works	Basic characters	Total number
Anonymous works	358	34800
Gao Yinxian	334	62100
Yi Nianhua	362	49700
Yang Huanyi	304	36000

He Yanxin	380	39600
Total Number	398	220000

2. the judgment and collation of Nüshu basic and variant characters

Nüshu variant characters differ from the concept of Chinese allograph characters that usually refers to the characters with the same phonetic and meaning but with different graphs. Nüshu originates from Chinese characters, but differs a lot. A Nüshu character represents a syllable which records a group of local homophone. That is to say, the meaning of a Nüshu character is uncertain and needs inferring by the context. The difference between basic characters and allograph is not rooted by different languages or dialects, but by personal writing habit which causes more than one graph for one character.

We have two principles to deal with this problem: character cell and frequency.

A. The theory of Character Cell

We divided basic characters and allograph on the basis of *character-cell theory*.

Similar with the "PHONEME" in the phonology and "MORPHEME" in the morphology, one character cell is functionally distinctive in graphs, which is the theory to deal with the variant words. That is:

If one word has many forms but these forms meet the following items, they are accepted as one character cell, and we regard the graph which has the highest frequency as the basic character.

- a. come from the same origin (originate from the same Hanzi),
- b. have the same word-building method with similar structure and shape,
- c. have the same pronunciation,
- d. have no difference in meaning.

B. Prior to basic characters according to their frequency

That is to say, within the characters of the same character cell, we chose the character with the highest frequency. The character with the highest frequency is called basic representative and others as allograph. The final result of the study and the statistics can be referred to '*Nüshu basic characters and their origin verification*' (published in *Nüshu character-comparison, 2006*).

Take the following table to explain:

y ⁴²	如余餘 儒虞娛	 如 105	 如 131 余 10	 如 213 余 2	 如 75 余 3	 如 141 余 3
		 如 10	 如 54	 如 3	 如 11	 如 11
		 如 8	 如 2 儒 1	 如 1	 如 11	 如 4

There are three main graphs for the sound of    y⁴² 如⁵⁹⁰⁻⁸⁹⁻¹², which has the same pronunciation and the meaning and has general similar structures. The first one has a rather high

frequency. So  is the representative glyph.

3. about the allographs.

Allographs are common phenomenon especially in the minority scripts. Because Nüshu has not finished the process of standardization, and most of natural women knowing the script well went to heaven, many people or even scholars created some new characters subjectively. So if taking the later-created characters and all the into consideration, Nüshu would lose its original appearance.

The Committee for Female's Script (Nüshu) of Chinese Folk Literature and Art Society suggested to the local government that the representative graphs are prior to be taught in the school to make it normal. So the representative graphs are prior to be encoded first. We will deal with allographs in the later time.

In conclusion, the character set we propose encoding is the basic representative graph set, which is scientific and integrated.

(II) Order rules

389 basic characters included different-origin ones are encoded. These graph are in good order by the amount of strokes from small to multi separately. And within the same amount of the stroke, we order them by their sound: finals, initials, and tones. There is a principle of the amount of the character: only two basic strokes existing in Nüshu, the dot and the curve (mainly referring to arc), which is traditional writing rules for the Nüshu elderly women. Even a circle is made up by two arcs.

The final order:

a ua ya ie ø uø yø uø yø i iu u yu y u ai uai yai au iau ou iou øuø uø yuø yn aŋ iaŋ uaŋ yaŋ eŋ oŋ ion iŋ ŋ

the initials order:

p p' m f v t t' n l ts ts' s tç tç' nç c k k' ñ h ø

the tone order: we present them in the form of five-degree contour tone marks.

.44/ /.42/ /.35/ /.13/ /.21/ /.33/ /.5/

(III) Character names

We name the characters with the Chenguang sound (spoken in the local town)which is the standard pronounciation of Nüshu. Local women like to read Nü shu in Chenguang Sound as a graceful action. Following the rules of naming characters of the UCS, we spell their sounds with Roman scripts.

Each of the symbols and marks in the proposed Nüshu character set ought to be of one-one correspondence with one code.

(IV) About the font

There are no unified standards and rules for Nüshu and many graphs seem vague. So after we picked the chosen characters, we invited the local calligrapher to write the picked Nüshu characters one by one. Then we scanned the handwriting, processed it by Photoshop and use FONTCREATOE professional tools to make a preliminary font. the font of Nüshu characters is greatly improved by Weifang Beida Jade Bird Huaguang Imagesetter Co., Ltd which is famous and professional in China. And the codes of characters begin from 1B000 to 1B184 with 389 graphs included.

III Prospects

(I) Nüshu is a kind of mature character symbol system. As a unique character type, Nüshu is a new category to various characters in the world, a new kind of datum to the research of linguistics, and some new subjects are put forward such as how to translate Chinese works into Nüshu.

(II) There are large amount of literatures written in Nüshu, most of which record some important historic events of the time such as Taiping rebellion, some crime of Japan when invading into China, land reforming movement in China. Besides that, some folkways and anecdotes are included. All of them are valuable historical data.

(III) Nüshu is a kind of one and only female characters in today's world, which is of great impetus to the research of female culture both in China and in the world.

(IV) The important function of Nüshu is to confide, hearken and communicate in the groups, which is made good use of to modern mind cure. It has a universal meaning in the world. Should this proposed set be accepted as a part of the plane of ISO/IEC 10646, it will facilitate the globalization progress of information processing with Nüshu. The protection and save of some important data and further related research are more available and convenient for Nüshu lovers.

IV Acknowledgement

This report is drawn up by the Committee for Female's Script (Nüshu) of Chinese Folk Literature and Art Society and the School of Humanities and Social Sciences of Tsinghua University. The government of Jiangyong in Hunan Province supports us greatly. At the same time, acknowledgement for China Electronic Standardization Institute, the Institute of Linguistics of the Chinese Academy of Social Sciences, Tsinghua University Computer Department and Computational Linguistics Laboratory.

V Connections

If any questions, please send email to Zhao Liming(zhaolm@mail.tsinghua.edu.cn) and Wu Ruixing(wurx03@mails.tsinghua.edu.cn, and cc Chen Zhuang (chenzh@cesi.ac.cn) who is the head of this program.

Notes to the mapping table

Some characters are absent in the book of William W. Chiang in the mapping table in the Nüshu proposal. Some explanations as following:

First, the book of Mr. Chiang was published in the 1995 as a paper of Doctor Degree, and the related research to linguistics was only one part of the book, and many issues were not solved clearly. All of the graphs came from 128 documents of Nüshu works. Some researches were limited by the data he had at that time. Nüshu Yongzi Bijiao comes to the world later, which was from *Zhongguo Nüshu Heji* in 2005. As you know, *Zhongguo Nüshu Heji* contains more than 90% data collected from Nüshu old successors.

Second, the absent mapping to the book of Mr. Chiang mainly referred to several characters which are not used frequently. It can be found by checking the book of *Nüshu Yongzi Bijiao*, most of which has low frequency. There are several graphs in the book of William W. Chiang which we regard as allograph in our research, because we have other widely-used representative graphs to replace them. The graph  in that book is replaced with . The absence of allograph does not affect daily communication.

Third, there are two causes to choose these uncommon characters to encode. One is that most of them have their independent origin. The other is that in *Nüshu Yongzi Bijiao*, some Hanzi is uniquely-presented as the graph we encode. If we don't take these uncommon graphs into consideration, there will be no graph in Nüshu to represent these Hanzi. Another way to solve such problem is that find one graph with similar syllable to replace it, but this disobeyed the principals to choose graphs of Nüshu. If there exists one graph to represent related Hanzi in *Nüshu Yongzi Bijiao*, we will pay attention to it.

Appendix D1 About the book of “We Two Know the Script; We Have Become Good Friends”

This book has a good introduction and guidance about Nüshu from the multi aspects to us. The author got 719 basic graphs from 1535 allographs in 128 pieces of works with the total number of 107,465. But something should be stressed here:

1 About the syllables

492 syllables are listed in all in the book which does not equal to 492 characters. As stressed in the book, ‘many of these graphs represent more than one syllable’ (P50), and some syllables include more than one graph which are different origin from Chinese. ‘but the predominant relation is one syllable/one graph’ is right. In fact, based on the *Jiangyong Dialect Research* by Huang Xuezhen, we published the *Nüshu character comparison* (2006), which contains 956 syllables with tones included. Take the syllable ‘pa’ for example, we listed ‘pa⁴⁴’, ‘pa³⁵’, ‘pa¹³’, ‘pa²¹’, ‘pa³³’ and ‘pa⁵’, but in Chiang’s book, there are only two: ‘pa⁵⁵’, ‘pa⁴⁴’.

2 About the number of characters.

In Chiang’s book, ‘the figure ‘719’ is adopted as a basis for further discussions’ (P50). But ‘due to different data bases and different ways of counting, Chen Jin and Zhou Shuoqi have identified some 600 Women’s Script graphs’ (P72). *Chinese Nüshu Collection* contains more than 90% ecological and original data of Nüshu, with more than 220,000 characters. We translated one by one, established two character tables, and do the frequency statistics to the every graph. Based on that, we published the paper of *the Nüshu basic characters and their origin verification* in which we identified basic characters and merged variations according to their frequency and the theory of Character-cell which has been mentioned above.

3 About the Chinese origin.

Chiang was uncertain about the actual origin of the Women’s script, as is mentioned ‘there is no evidence on actual origin,...all said, the only concrete evidence I have concerning the origin of the script is its close connection to Hanzi.’ (P49) But the book does not list all the Chinese origin of Nüshu characters. we have discussed the relationship between Nüshu and Chinese characters above, and the paper *Nüshu basic characters and their origin verification* showed us almost all the Chinese origin. We scientifically and objectively tried our best to

seek the Chinese Origion, although some variants appares and some graphs confused (爻釵: 爻在/爻金) .We will make a corresponding mapping between Chinese origin and the Nüshu basic character in the appendix of this report.

4 About the amount of stroke.

In Chiang's book, 'basic graph strokes include slants from upper right to lower left and upper left to lower right, circles, dots, and curves.'(P51). That is to say, there are four basic strokes. But according to our investigation from the old natural women, only two basic strokes constitute the script. One is the dot 'dian', the other is curved arc 'hu'. There exist many variations in the process of its spread and spelling by different people. Concretely speaking, the circles are made up by two curves (arcs), not a stroke. So we count the amount of stroke following the rule of two basic strokes strictly.

Appendix D2 About Nuhan Dictionary of Chen Qiguang

There exists a huge dictionary in China: Nuhan Dictionary, which is known by some foreign experts. But this huge dictionary contains more than 3400 characters. We need to make an essential explanation.

The following three points should be stressed:

First, we scanned and photocopied all the original works, and cut and saved all the characters one by one from the photocopied pictures rather than imitate. We listed the frequency of all the characters by counting and by comparing the difference among different individuals from all the works as far as we can find. According to the basic theory about the character cell and the frequency, we regarded the characters with the highest frequency as the basic characters, which have been submitted to UCS and UTC as a proposal.

But all the characters in Nuhan Dictionary is written by the author himself, some of which is faked and created by him. They have never photocopied one character from the original works. Besides that, they have not done the limited and completed statistics to support themselves.

Second, all the data that Nuhan Dictionary followed and relied on is the collected data from Tsinghua University other than one piece of work that was collected by his student Mao Zhenlin instead of him.

Chinese Nüshu works collection was published by Tsinghua University Publishing House in March, 1992, which was supported by President Fund of Tsinghua University and sorted out and translated by Zhao Liming and Zhou Shuoyi (the local manager of culture field). In order to explain that Nüshu doesn't have relationship with Yaoyu (a language of minority), we invited Chen Qiguang from The Central University for Nationalities, the expert of Yaoyu and the author of Nuhan Dictionary to attend our project. Chinese Nüshu works collection contains 629 pieces of works, but Chen Qiguang provided only one piece from his student. As early as the end of eighties of Twentieth Century, Mr. Chen arrived in Jiangyong, but went to hospital for cure since the second day.

On the international discussion forum of Nüshu in 2004 which was held by Chinese Academy of Social Sciences, Mr. Chen announced that he would have more than 400 pieces of Nüshu works to publish. At that time, we started to realize he had copied all the original data from Chinese Nüshu works collection which we translated every word and sentence one by one and with the original sample following.

Third, Nüshu Character comparison and Nüshu basic characters and their origin verification which has been in the attachment in our proposal has been published and discussed on the international discussion forum of Nüshu in 2004. All the members of the conference got one copy, including the author of Nuhan Dictionary. That is to say, Nüshu Character comparison and Nüshu basic characters and their origin verification were published

first, and the Nuhan Dictionary came out later. So obviously Nuhan Dictionary referred to the Nüshu Character comparison and Nüshu basic characters and their origin verification, but the author has never mentioned that.

Then let's focus on the statistics of 3400 characters in Nuhan Dictionary.

As an independent kind of script that can record the language, there must be inner rules. That is to say, the most widely acceptance and convenience is necessary. So the use of basic characters are determined by the principle of economy when the script is regarded as a communicating tool. As a kind of script system which is used by rural women, it is impossible for them to have a huge and complicated script system such as three or four thousand characters included. It is possible and necessary for a good and responsible professional researcher to make up the data with the guidance of academic theory and scientific attitude. The theory of character cell is a good and important guide to deal with allograph and standardization for the consideration of its inheriting and usage.

The frequency of the characters is ignored by Nuhan Dictionary, nor listed all the allographs mapping to one character. It is inconvenient for the user to check and choose the normative graphs to use and useless for the researcher to clarify the basic graphs and make up a standard. It is said in preface there are 3400 characters in all. We can take an example of “安”(an) to find him how this number was calculated.

We can find about 17 “安”(an) at least by doing a rough statistic. There are nine graphs who have eight strokes, and six in seven strokes, and four in six strokes, which can be found at the page of 196,197,141,142 and 96 as following:

八畫

“安”字變形。
ㄞ⁴⁴ 安 安人門要恬靜。

“安”字變形。
1.ㄞ⁴⁴ ①安 送出姑娘心不安。
②嗯 即便回家嗯嗯哭。
2.ㄞ³⁵ 碗 臺上碗碟無人收。
3.ㄞ³³ 餓 細崽沒奶餓煞了。
4.ㄞㄨ³³ 誤 一世夫妻誤了場。

“安”字變形。
ㄞ⁴⁴ ①安 沒日安心過一時。
②嗯 一家老少嗯嗯哭。

“安”字變形。
ㄞ⁴⁴ ①庵 不如割髮入庵堂。
②安 我亦安心並無愁。
③“磨”青石磨刀不要水。

“安”字變形。
ㄞ³³ 餓 餓煞多少英雄漢。

“安”字變形。
ㄞ⁴⁴ 安 氣得無安心亂滾。

“安”字變形。
1.ㄞ⁴⁴ ①安 祇得神內去安身。
②鞍 好馬不配雙鞍子。
③嗯 三歲孩兒嗯嗯哭。

| 7. ㄩ ⁴⁴ | 埃 | 𩫑 | 翻身跌倒地埃塵。 |

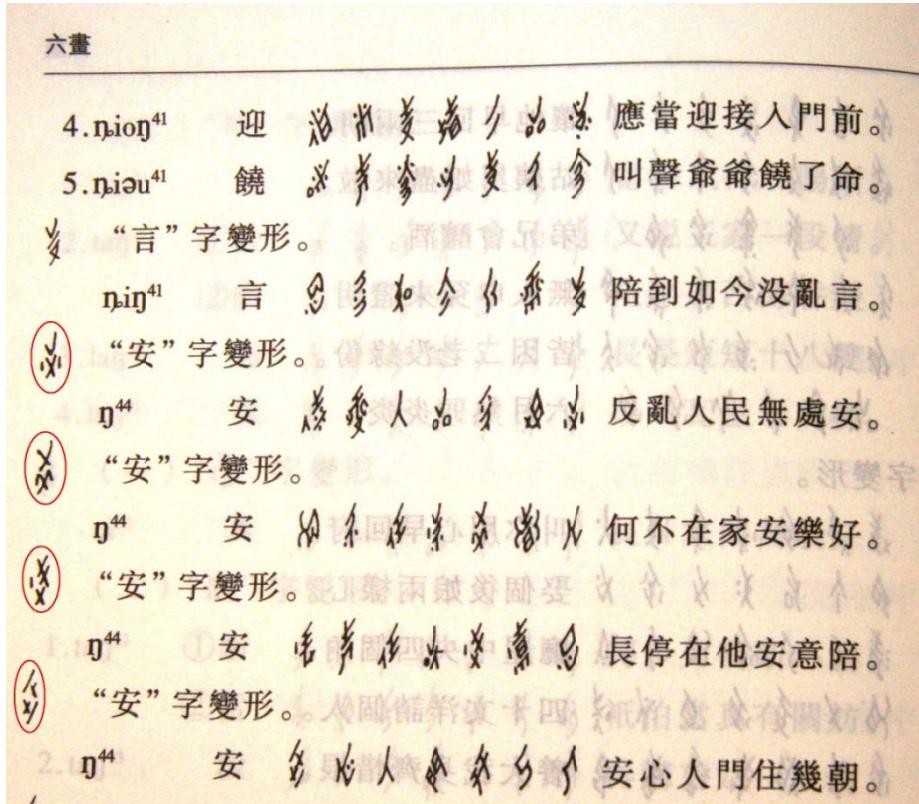

Figure D-1 samples of “安” in Nuhan Dictionary

Actually, we have got the conclusion after the use of Character Cell, frequency and comparison among the graphs in the following table:

Table D-6 statistic results of “安”

	ŋ^{44}	安 ¹⁶⁰⁻¹⁴⁰⁻⁴⁶ 鞍 ⁷⁻¹¹⁻⁴ 噴 ⁵ 廂 ¹
(安)	ŋ^{33}	饿 ³⁴⁻¹³
	ŋ^{35}	碗 ¹⁶⁻⁴
	ŋu^{33}	误 ²
	ŋ^{42}	磨 (~刀) ¹

There existed some faked and created graphs subjectively by the author in Nuhan Dictionary which have never been found in the original works. It is a serious problem which will affect and undermine the reliability of this huge dictionary. Take the dictionary's name Nuhan Dictionary as an example. Among the four characters, there are two faked graphs which have never appeared in the original works. Among the name of the book,  “汉” and  “典” has never been found in the Nüshu works as far as we know. The proper and right graphs should be   . It is probable that the

author created it subjectively. As everybody knows, not too many people know this script in China.

1、About the character “汉”.

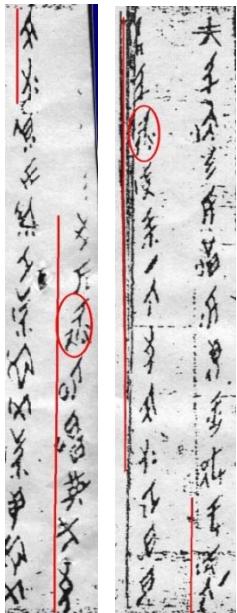

It should be  in Nüshu. The author of this huge dictionary changed the graph  (黄/皇) into  by adding three points to the prior graph subjectively. Obviously, the Chinese origin of faked graph  is not the “汉”.

Table D-7 statistic results of “

	hanj ²¹	汉 ³²
(欢)	hanj ⁴⁴	欢 ¹⁵
	hanj ³³	唤 ¹⁵
	hanj ³³	换 ¹⁴ 焕 ¹¹ 汗 ⁷ 唤 ⁶ 翰 ⁶
	hanj ¹³	旱 ¹³
	k‘aj ⁴⁴	糠 ¹
	hanj ⁴²	寒 ¹⁶⁹ 行 ¹⁶³ 又huow ⁴² 皇 ¹⁶³ 黄 ¹⁵³ 杭 ⁵⁹
(黄)		含 ¹⁰ 衡 ⁷ 韩 ⁴ 蝗 ³
	huow ⁴²	烦 ²⁶ 行 ²
	honj ⁴²	咸 ¹⁰

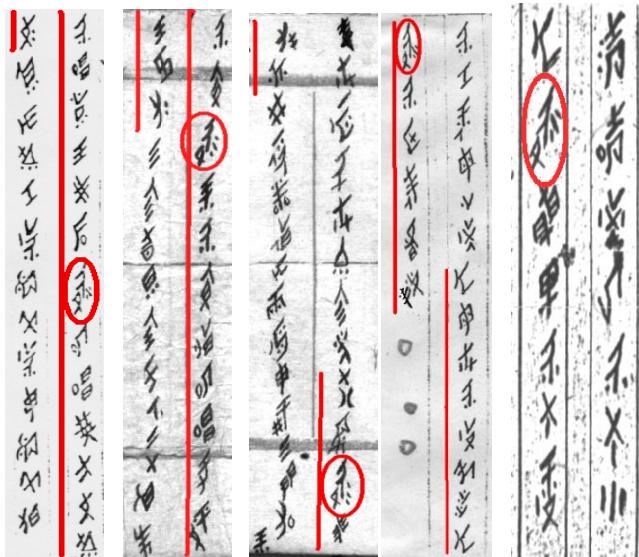

In the practical use of Nüshu characters,  and  have never been in confusion. Take the“女汉字典”for example. We searched all the works of Nüshu, but never found a graph of  to map with Chinese character“汉”.Instead, “汉” is usually written as . We can understand it better by following the examples:

Two examples about the character “汉” in the anonymous works:

(不唱前王) 并后汉 听唱英台女娇娘《祝英台》(《中国女书合集》卷一)
去时一个男子汉归来一个女娇娘《祝英台》(《中国女书合集》卷一)

Thirteen examples about the character “汉” in the GaoYinxian works:

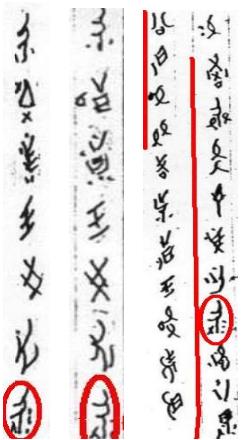

不唱前王并后汉 听唱英台女祝娘《祝英台》(《中国女书合集》卷二)
不说汉来说唐 听唱看经《王五娘》(《中国女书合集》卷二)
十八罗汉排左右 《王五娘》(《中国女书合集》卷二)
好马吃不回头草 好汉不讨半路妻《闺女怨》(《中国女书合集》卷二)
青石开刀不要水 好汉寻姊不要媒《好汉寻姊不要媒》(《中国女书合集》卷二)

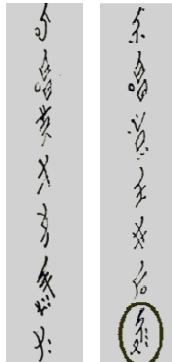

Five examples about the character “汉” in the Yi Nianhua works:

不唱前王并后汉 听唱年华姓义人《義年華自傳》(《中国女书合集》卷三)
 饿死多少英雄汉 路上枯骨白如霜《太平军走永明》(《中国女书合集》卷三)
 饿杀多少英雄汉 饿杀多少妇道人《太平军走永明》(《中国女书合集》卷三)
 前朝后汉均不唱 听唱南回县里人《肖氏女》(《中国女书合集》卷三)
 Three examples about the character “汉” in the YangHuanyi works:

不说前王并后汉 《梁祝故事片段》《中国女书合集》卷四)
 不唱前王并后汉 《梁祝故事》《中国女书合集》卷四)
 饿死多少英雄汉 路上枯骨白如霜《咸丰五年走贼》《中国女书合集》卷四)
 One examples about the character “汉” in the He Yanxin works:

不唱前王并后汉 听唱英台女娇娘《祝英台》(《中国女书合集》卷五)

2、About the character “典/点”.

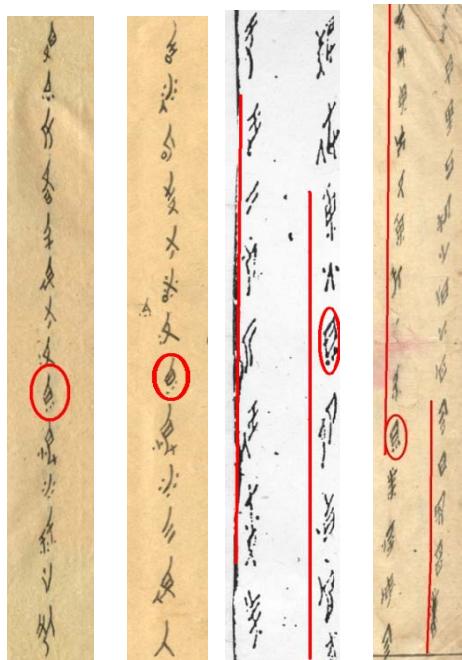

All the “典” appearing in the Nüshu works is written as , not  but there is seldom  in <女汉字典> with all of the  instead. We can infer that the author changed the character (念) into , which is of confusion.

Table D-8 statistic results of “” and “”

 (点)	nəŋ ³⁵	点 ³⁰⁴ 典 ⁵
nəŋ ³³	念 炼 恋 验 谚 砚	念 ²⁵ 典 ⁶⁵ 炼 ² 验 ¹ 砚 ¹
		念 ²⁹ 典 ⁷³ 验 ⁴ 验 ⁶ 砚 ¹ 砚 ¹
		念 ²² 炼 ³ 验 ¹ 砚 ⁴ 验 ² 砚 ³

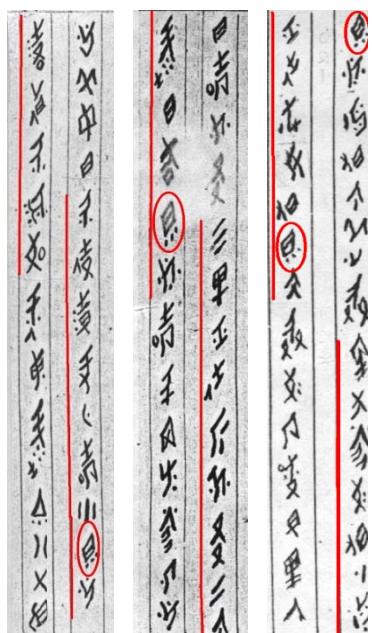

Nüshu is a syllable script. One character records several homophones and similar pronunciation. So  represents 点³⁰⁴ 典⁵ and 念¹⁴¹.

Here is the specific examples about the “典”and ”点” in the Nüshu works.
The writing style of “点” in the handworks of the anonymous author:

取念依尽仔俠义 留点疼心妹上头《身坐娘楼修书到 看傑细姊在他门》
 (《中国女书合集》卷一, 下同)

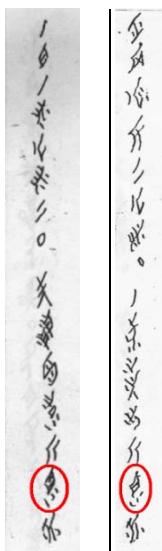

灯火点明团围亮 看望二个没在楼《五心乱溶全不静 书本共言看傑身》
 今日別房落他府 身出却低头不点《取道提言做书本 奉到良门恭贺亲》
 The writing style of “点” in the handworks of GaoYinxian.

不信远看屋舍水 点点落地不差余《高银仙自述可怜》(《中国女书合集》卷二)
 三姊正是没忧虑 两个娇儿一点花《天开南门七姊妹》(《中国女书合集》卷二)
 (三个哥爷二) 点花, 房有个芳上嫂 宽待爷娘有细心 正是如依有点份《取道提言诗

一首 书本传文到贵家》(《中国女书合集》卷二)

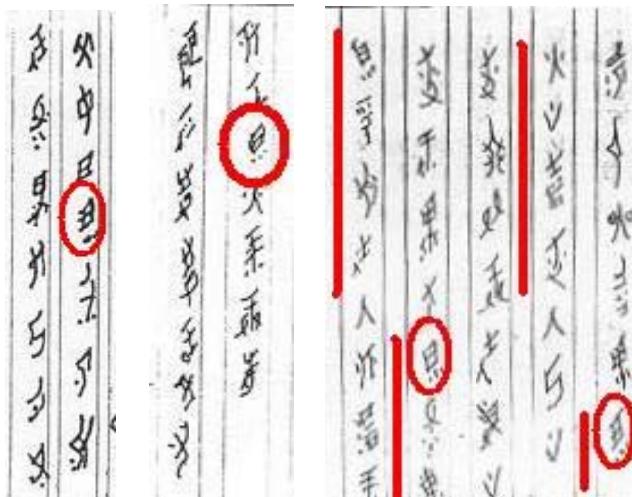

The writing style of “点” in the handworks of Yi Nianhua:

一儿一花好过日夫妻房前没点忧《义年华自传》(《中国女书合集》卷三)

正月新年日好过 一家遥遥没点忧《寡妇歌》(《中国女书合集》卷三)

The writing style of “点” in the handworks of YangHuanyi:

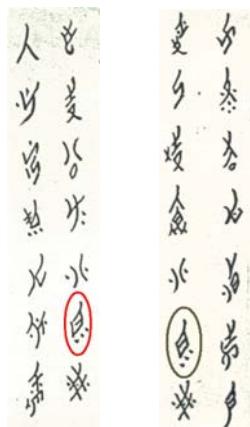

父母恩典不曾拜 再尊独边曰可怜《开口提言诉我苦 诉我苦情传四边》

(《中国女书合集》卷四)

夜间点火来做伴 眼泪行行到天光《阳焕宣自传》(《中国女书合集》卷四)

点火上高楼 点尽贵油无心事《红纸写书信 我来诉一篇》(《中国女书合集》卷四)

The writing style of “典” in the handworks of He Yanxin:

突然发生非**典**病 人人感觉好忧愁《万众一心团结起 坚决战胜非典病》
(《中国女书合集》卷四)
万众一心团结起 坚决战胜非**典**病 (同上)

Appendix D3 Explanations to other problems

【about the calligrapher】

The selection of basic characters is based on the scientific method, and not related with calligrapher who just wrote down the graphs we had selected. We sorted out of thousand of original material of 22 thousands words and made the exhaustive statistics and comparation. Finally we selected the characters which have the highest frequency and widest use among the users. There is absolutely no subjective inclination.

【about the competing analyses】

1、CFFSCFLAS.

The proposal of encoding Nüshu is the collective research results of The Committee for Female's Script (Nüshu) of Chinese Folk Literature and Art Society (CFFSCFLAS) for nearly twenty years. CFFSCFLAS is made up with many famous experts in academy including Dr. Li Lan and Prof. Huang Xuezhen from the Institute of Linguistics of the Chinese Academy of Social Sciences, Dr. Cao Zhiyun and Dr. Zhao Rixin from Beijing Languages and Culture University, Dr. Chen Hu from China Book House ,Prof. Nie Hongyin from the Institute of Ethnology and Anthropology, Chinese Academy of Social Sciences. Besides that, Prof. Ji Xianlin and Prof. Hu Houxuan (who is dead) from Peking University, both of whom are academicians in China, Prof. Zhou Youguang from National language committees, Prof. Li Xueqin who was the president of he Institute of History of the Chinese Academy of Social Sciences and now in Tsinghua University, and Prof. Qiu Xigui who is now in Fudan University from Peking University, all of them are the representatives of China's highest academic standards and have given CFFSCFLAS valuable suggestions and guidance.

2、the book by William Chiang and the dictionary by Chen Qiguang

The detailed explanations about the book by William Chiang and the dictionary by Chen Qiguang are attached in the Appendix E1 and E2.

3、Acceptance of our research results

The research result Nüshu Character comparison and Nüshu basic characters and their origin verification (the mapping table between Nüshu and Hanzi) has been published publicly in the International Seminar of Nüshu which was held by the Chinese Academy of Social Sciences in 2004. Everyone in the meeting has got one copy. The paper was accepted and authorized by National Languages Committee and research organization of Nüshu in Japanese. Other people with experts included referred to our research result. So is Nuhan Dictionary.

4、Unreasonable opinions and sayings

There are some other strange and ridiculous sayings and opinions which were created subjectively and intentionally. For example, some people said that Nüshu came out into the world in the Matrilineal society more than ten thousand years ago. The only reason is that women at that time would not only give birth but to creat Nüshu. People with this opinion

admitted that they want to make some local leaders happy and get the money for tickets to go home. Another opinion holds that Nüshu is earlier than Jiagu script after some people compared with several simple signs such as “one, two, three”, which has been objected by Hu Houxuan and Qiu Xigui who are the experts in Jiagu Script.

In recent years, Nüshu was confused by the fake work and counterfeit. Especially after 2002, Nüshu script was created subjectively, and so are Nüshu works and dictionaries. A faked village was created in Hubei Province. It is facing the problem of not being lost, but being distorted.

【about the relationship with hanzi】

- 1、The nature of Nüshu is the variation of Hanzi, which constitutes the mainly and key part of Nüshu script system.
- 2、We did not find proper origin for the several special graphs of Nüshu at the beginning. But later we successfully found the originated Hanzi.

行 (花) ← 花 衍 (草) ← 草、冂 (树) ← 鼠、刂 (刻) ← 刻、忄 (悲) ← 悲

3、Nüshu has strong female characters. It is related with women weaving (Nuhong, which is tiny and trivial work especially in the ancient). We published our research results twenty years ago when we had already asserted that “Nüshu graphs come into the shape of the related images, and the related images come into the shape of the script graphs.”(女书字图案化，图案女书字化) The shape of Nüshu graphs usually reflect the direction of the brocades and embroidery patterns, such as 衤万、彳天、父. The name of related paper is <奇特的女书>, which is published by Beijing Languages University Press, 1995.

【Nüshu differs with Hanzi】

Nüshu originated from Kaishu which was the important stage in the history of Hanzi. This point is to stress the relationship with Hanzi and not as the reason to be encoded. Nüshu script has its unique characters compared with Hanzi and is regarded as an independent and distinctive script system. It has only two kinds of basic strokes, which has been mentioned in our original proposal and added proposal.

- 1、the different appearance. Customarily Nüshu characters appear to be italics ,with a rough shape as the Chinese character “多”; while Hanzi is in the squared-shape.
- 2、different nature. Nüshu records the local Chinese dialect as a syllabic words system with less than 400 characters. The number of graphs adds up to the tens of thousand.
- 3、different user community. Nüshu is used by un-educated rural women.

【about the ideographic syllable and the relationship between oral language and written language】

- 1、like the Japanese kana, Nüshu is a syllable script, which is our published research results as

early as twenty years ago. But kana is spelled by phonetic alphabets with every syllable as a basic unit. For example, the word “I” in Japanese is spelled with three kana. While Nüshu is kind of characters syllable words, which means a character or syllable represents a group of homophones and characters with similar pronunciation.

Nüshu is at an important stage in the development of Chinese from the system of ideographic characters to ideographic-syllables. The development process of Hanzi in China—Nüshu—Kana in Japan—Korean constitutes a complete script chain. (a complete script chain from ideographic to syllables in the Chinese Culture Circles, Zhao Liming, studies of Chinese and Chinese script in the period of computer, Tsinghua University Press, 1996)

2、Nüshu is a kind of mature script with monosyllabic presenting characters. There is a one-to-one relation between spoken syllable and character writing that syllable. That is to say, Nüshu can record the oral words one-to-one.

3、Obviously there existed some difference between oral language and written language. The style of Nüshu works is poem, most of which is seven-character or five-character per sentence. There are some old words used in the past which is not widely used in daily life nowadays besides some difference between their natural dialect and regional standard pronunciation. (Huang Xuezhen、Cao Zhiyun and Li Lan wrote many papers about that.)

【about Ouyang hongyan】

We know Ouyang hongyan very much. She is one of the earliest businessmen who manage the deals of Nüshu. Her father got many photos of Nüshu since 1980. And she put Nüshu into the way of business in the early year of 2000. She made some crafts and performances and began to learn to write Nüshu, in the purpose of doing business. She has not been accepted by any college or university. So she lacks the ability to do research. We know her website which is used for trade and not about academy. So it is just a reference for you.

【about the history】

1、The information on history and origin of Nüshu is mentioned in the website www.nvshu.com.cn. The information is not vague but that some questions could not be solved at short time. Maybe some are mystery forever such as the history you are eager to know, which we also really wanted to work out. We have been seeking and seeking the first historical mention of the script and what is the earliest known text for about twenty years in the tens of counties in several provinces nearby the region of Nüshu. Till now, the earliest mention we found is the grade coin in the period of Taipingtianguo in 1850s, which has been identified by the experts in Palace. (Attention: it hadn't been cast into coins and made into use)

The earliest text is mentioned in the local annals notes records by Hunan historiographer in 1931(the twentieth year of Minguo Period). You can find that in our official website.

2、We successfully identified twenties years ago that Nüshu originates from Kaishu in the

stage of Hanzi development which is agreed by the experts in Jiagu Script Hu Houxuan and the experts in ancient script Qiu Xigui and Li Xueqin.

3、The definite division of the history of Nüshu need more persuasive evidence. Maybe the research to the times features of the dialect will be an important key to the quiz. (Huang Xuezhan、Cao Zhiyun and Li Lan wrote many papers about that.)

【about the “□”】

There is a piece of convention and rule in the academia of dialect. If you want to make the verification of original characters and it is really difficult to find, □ is the temporary replacement. Subjective guess is prohibited.

Appendix E Nüshu basic characters and their origin verification

女书基本字与字源考

赵丽明

提要 女书是流传在湖南江永县潇水流域的一种妇女专用文字。2004年9月20日最后一位女书老人阳焕宜（1909年出生）去世，标志女书原生态历史的结束。女书有多少字？女书的历史有多久？女书是如何创造的？都是人们关心的重要问题。清华大学抢救女书小组数十名师生利用两年的时间，从近20年收集的近千篇女书原始文本资料中，整理出可识读的640篇22万字文献资料，进行翻译解读，扫描影印出版《中国女书合集》5卷本（中华书局2005年1月）。并编制了《女书字表》，并进行数字化处理，建立了《女书字库》。这些为我们考察女书基本用字，进行量化研究，提供了科学依据和数字化手段。我们又用穷尽性统计的方法，对佚名传世本以及最后一代女书自然传承人高银仙、义年华、阳焕宜、何艳新的女书作品，逐字统计字频，分栏比较，于2006年完成出版了《女书用字比较》（知识产权出版社）。

本文正是根据这些截止到20世纪末，我们所能见到的传本以及女书自然传承人的22万字的女书原件资料，逐字进行穷尽性考察统计而得出的研究成果。

通过对每个女书字符的形体以及使用频率的提取、排比、统计、整理，我们看到每个人使用单字500左右（包括异体字）。我们运用字位理论整理出女书基本字（无区别意义的同一字源的字符），只有400个左右。用这些共识的基本字可以完整记录当地土话——一种汉语方言。本文同时报告了根据女书原件素材，对每个女书基本字的造字来源的考证结果。更有力地证明了女书来源于楷书后的汉字，是方块汉字的一种变体。女书是记录汉语方言的一种音符字音节表音文字。

在此基础上，我们提交女书ISO/UCS国际编码提案并在ISO/IEC JTC1/SC2/WG2#52会议上被正式接受。

关键词 女书基本字 字源考 女书用字比较 女书ISO/UCS国际编码

Summary: Nu Shu refers to characters used by female in Jiang Yong south China's Hunan province. Ms.Yang Huanyi, known as the last woman proficient in the Nüshu writing passed away on the September 20, 2004, which marks the end of female literature's original ecologic history.

People are interested in a number of questions about Female Literature, such as how many characters in it? How long is its history? How was it initiated?

After two-year's effort of saving female literature, teachers and students in Tsinghua University succeeded in translating 640 articles of female scripts. They have printed and published Chinese Female Literature Collection, Female Script Dictionary and established Female Literature's Characters' Database. These accomplishments offer scientific evidence and means to study on female script. This book answers two questions: The minimum number of Female Scripts' Characters and the origin of them. It will help us have a better understanding of the history of female script.

This article shows the result of extensive research based on original female literature materials of over 220 thousand characters. In the meantime, it proved that Nu Shu comes from Chinese characters after "Kai Shu".

We began to propose encoding Nüshu in the UCS since 2006 and our proposal about Nüshu has been accepted in the 52th conference of ISO/IEC JTC1/SC2/WG2.

Key word: Nu Shu (Female Literature) Basic Character Graph Comparation Character Origin UCS

女书是流传在湖南江永县潇水流域的一种妇女专用文字。2004年9月20日最后一位女书老人阳焕宜（1909年出生）去世，标志女书原生态历史的结束。

女书字数到底有多少？女书到底源于何时，历史有多久？是女书研究中的尖端问题。女

书字形渊源考察研究，文字体系自身内在用字规律的考察、字数的统计归纳，是考察女书渊源的基础工作之一。

清华大学数十名师生利用两年的时间，从近千篇女书原始文本资料中，抢救编译整理出可识读的 640 篇，扫描影印出版《中国女书合集》，编制了《女书字表》，并进行数字化处理，建立了《女书字库》。为考察女书基本用字，进行量化研究，提供了科学依据和数字化手段。

在此基础上又用穷尽性统计的方法，对佚名传世本以及最后一代女书自然传承人高银仙、义年华、阳焕宜、何艳新的女书作品，逐字统计字频，分栏进行比较，于 2006 年完成出版了《女书用字比较》（知识产权出版社）。

本文所做的《女书基本字与字源考》就是根据《中国女书合集》及《女书用字比较》等整理研究的。试图回答人们关注的两个问题：女书基本字的数量，女书基本字的字源。前者有助于探讨女书文字的性质，后者有助于探讨女书产生的历史。

《女书基本字与字源考》的原则和方法如下。

一 原文献字形基础。为了严格忠实于女书自然传承面貌，《女书基本字》全部是原文献字形，没有摹写一字。第一稿的女书单字完全依据传本佚名文本前 62 篇 3 万余字的女书作品原件的扫描材料，它们最早可推至明末清初传本（经版本专家鉴定）。由于一，是自然文本，无任何功利目的，作者均已过世不可考；二，是经典文本，均为精通女书高手所书，反映基础用字。因此，字表反映了女书用字的基本原貌，可以正本清源，具有一定的规范性。

二字音基础是女书雅言“城关音”。女书记录的语言是江永方言。经过李蓝、曹志耘、赵丽明，以及黄雪贞等调查研究，尽管在女书流行的上江墟乡（镇）各村土话有异，但读女书却有其“雅言”城关话，即当地土话的“普通话”。所以，本字表依据黄雪贞先生《江永方言研究》（社会科学文献出版社 1993 年版）的城关音，用国际音标给女书注音，再结合女书作品用字整理而成。

三 统计比较法及理论基础。面对《中国女书合集》的 22 万字女书文献资料，如何确定女书到底有多少基本字就可以完全记录当地汉语土话？清华大学抢救女书 SRT 小组的同学，多次到当地对女书记录的方言进行调查。又用穷尽性统计的方法，对佚名传世本以及最后一代女书自然传承人高银仙、义年华、阳焕宜、何艳新的女书作品，逐字统计字频，分栏比较，于 2006 年完成出版了《女书用字比较》（知识产权出版社）。

我们借用音位理论，采用了字位理论来处理异体字问题。即在一字多形的情况下，①字源相同（借源于同一个汉字）②构形手段相同③字音相同④没有区别意义的异体字中，取五个用字栏目中，公用共识的、使用频率最高的常用字形作为基本字。

四 排序说明。

1 首先按笔画排序，依照女书原件中的频率最高的基本字形楷书来计算笔画。
2 其次按字音排序，同笔画中的字序依次按韵母、声母、声调排序。具体则按照《江永方言研究》中第四章《江永土话同音字表》的顺序，即

1) 韵母的排序是：

a ua ya ie ø uø yø uø yø i iu u yu y u ai uai yai au iau ou iou øuø yow uaw yw aaw iaw yaw øy oy ioy iwy y

2) 声母的排序是：

p p' m f v t t' n l ts ts' s tç tç' n ç k k' ñ h Ø

3) 声调顺序是：

阴平（44） 阳平（42） 阴上（35） 阳上（13） 阴去（21） 阳去（33） 入声（5）

3 一字多义，基本按字频排序，使用频率高者在前。

五 字源考证。大致分基本借形、变异造形、孳乳造字三类，即与所借方块汉字的血缘关系远近有三级，尽量予以说明，暂时不明字源者阙如待考。对异源形近字，尽量注明。

此外我们还以目前唯一健在的百岁阳焕宜老人（宣统元年 1909 年出生）的用字来作为考察对象。依据《阳焕宜女书常用字表》（见《百岁女书老人——阳焕宜女书作品集》，国际文化出版公司 2004 年 1 月版）撰写了《阳焕宜女书基础字考》。因为阳焕宜不识方块汉字，没有方块汉字的干扰，因此，这个字表也反映了女书用字的基本原貌。读者可以参照比对。

（就在本文发表后 10 天，2004 年 9 月 20 日阳焕宜老人去世。标志自然状态的女书历史的终结。）佚名传本和阳焕宜女书作品均保持了女书的原貌。二者作品中女书用字，对于了解女书作为表音文字记录语言的手段、特点，有着重要的意义；同时对目前女书的混乱状态具有一定的规范性。

在翻译过程中我们先后得到周硕沂、唐功炜、何艳新、曹小华等当地同志的帮助。因为女书记录的语言是当地土话，女书作品中有大量的方言土语词，又有文白异读、辈份差别、村落差异，以及女书用字未经严格规范、语句错乱等复杂情况，特别是女书是用一个字标记一组同音或近音词的音节表音文字。还有许多问题有待继续深入研究。

2006 年 10 月根据高银仙、义年华、阳焕宜、何艳新作品进行了补充。

《女书字表》《女书字库》《女书用字比较》《ISO/UCS 女书编码提案》由清华大学抢救女书 SRT 小组的同学制作。参加制作的同学主要有研究生、本科生王荣波、谢玄、莫静清、张丹、杨桦、刘双琴、赵璞嵩、吴迪、陈卉、徐荣、王琛、李文山、岳岩、牧野英惠、廖盼盼、朱文韬、朱翠芳等，还有中文系零字班、一字班、二字班以及双学位的数十名同学参与。他们制作数万个卡片，整理字表，建立字库，付出了艰苦的劳动。

女书基本字与字源考

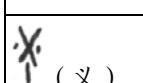

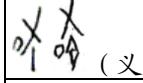

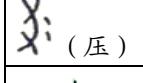

说明：1、女书基本字按笔画顺序，括号内楷体为字源，所标字义右上数字为字频。
 2、异体字取字频较高者附后，同时附字频。无标记者即为基本字形所标字义。

一 画 (1字)		
	i ⁵	— 1547

	piou ³⁵	饱 ⁹
	p [‘] iou ⁴⁴	抛 ²
	miou ¹³	卯 ¹⁰
(卯)	miou ⁴²	苗 ³ 茅 ²
	iou ¹³	酉 ³
	tsou ⁵	作 ²⁶
(作)	tsəw ³³	座 ⁷ 浊 ¹
	tsou ³³	昨 ²
	tc [‘] iou ²¹	臭 ²
(去)		
	niou ³³	肉 ⁴⁴⁻⁷ 又读 v [‘] u ³⁵
(如/肉)		
	iou ¹³	有 ¹⁵²⁸ 友 ²⁵ 西 ⁷
(有)	iou ²¹	幼 ⁷³
	y ¹³	与 ²
	huou ²¹	喊 ¹⁷
(喊)		
	kuou ⁴⁴	间 ²⁴ 更 ¹² 耕 ⁴
(耕)		
	nuow ⁴²	难 ⁵⁸⁹ 又读 nuow ³³
(难)	nur ⁵	□们 ⁵⁵² 又读 ni ⁵ nu ⁴²
	nai ⁴²	能 ⁶⁶
	cian ⁴²	常 ⁹¹ 裳 ⁶⁸ 尝 ¹⁷ 雄 ⁸⁻²
(常)		
	naŋ ¹³	暖 ⁸

	pan ⁴⁴	般 ³⁶⁰ 帮 ²⁹ 搬 ¹⁶
	pan ²¹	伴 ¹⁵¹⁻¹⁵⁻⁴ 半 ⁹⁶
(伴)	p'an ²¹	半 ⁹³ 放 ⁸⁵⁻⁶⁻⁰⁻⁰ 又读fan ²¹
		判 ⁶ 胖 ¹
	tçyø ⁵	啄 ⁰⁻⁰⁻⁰⁻³ (训读)
	pag ³³	饭 ⁰⁻⁷⁻³³⁻⁰
	lanj ⁴²	郎 ³²⁸⁻²⁶ 狼 ⁴
(郎)	lanj ³⁵	短 ²⁶ 朗 ³ 党 ² 挡 ²
	lanj ⁴⁴	当 ¹⁵ 端 ⁶
	tanj ¹³	断 ¹³⁻⁵
	lai ²¹	栋 ¹
	aj ²¹	你(自读) ⁸¹⁷
(你)	nau ¹³	恼 ²
	sianj ⁴⁴	相 ³⁴⁷ 箱 ⁵⁷ 松 ¹⁷ 镶 ⁵
(松/休)		湘 ⁵ 厢 ²
	ts'ou ²¹	凑 ¹
	tsianj ⁴²	长 ⁵²⁶ 从 ⁷² 详 ³⁰ 墙 ²⁴
(长)		祥 ⁷
	tsianj ⁴⁴	将 ¹³²⁻³³⁻¹⁰⁹ 又读tsianj ²¹
(将/象)		(大～) 浆 ¹²⁻¹⁰⁻³ 纵 ²⁻⁶⁻⁴
	tsianj ³⁵	蒋 ³⁻³⁻¹
	tsianj ³³	匠 ³⁻²⁻⁵
	tsianj ¹³	像 ³⁻¹³⁻³³ 丈 ⁰⁻¹⁰⁵⁻¹
	sianj ⁴⁴	相 ⁰⁻¹⁶⁻¹
	ianj ⁴²	阳 ¹⁶¹⁻⁵ 容 ⁶⁷⁻¹ 羊 ⁴⁸
(羊)		杨 ²² 扬 ¹⁴ 洋 ⁷ 蓉 ²
		绒 ² 融 ¹
	panj ¹³	伴 ¹⁰
	ts'ion ³⁵	请 ³⁶²
(请)	lionj ³⁵	顶 ¹
	tçinj ²¹	见 ¹ 颤 ¹
	cion ⁴⁴	声 ⁵⁰⁸ 兄 ¹⁸⁷
(声)	tc'ion ⁴⁴	清 ¹⁵
	lionj ⁴²	灵 ¹⁵ 宁 ² 零 ² 龄 ¹
(令/伶)	lie ³³	论 ³
	cij ³⁵	显 ¹⁸ 险 ² 掀 ¹
(形/显)	cij ²¹	扇 ⁹
	cij ³³	现 ⁶
	tc'yø ³⁵	扯 (~二胡) ⁶⁻² 蠢 ¹
	t'eu ⁵	托 ⁵
(扯/托)	tc'inj ⁴⁴	牵 ²⁻⁵
/牵)	t'eu ⁴⁴	拖 ¹

八画(66字)	
	la ¹³

2008年2月四稿。（基本字共398个字）

Appendix F the value of Nüshu Character comparison

《女书用字比较》的学术价值

赵丽明

在 2004 年“女书的历史、现状与未来国际学术研讨会”上，中国女书研究专业委员会、清华大学抢救女书 SRT 工作组提交了论文《女书用字比较》，参加工作的除了有赵丽明、赵日新、黄雪贞老师，还有王荣波、吴迪、陈卉、刘双琴、徐荣、赵璞嵩、杨桦、王琛、李文山、岳岩、莫静清、牧野英惠等同学。

《女书用字比较》全文约 20 万字（已出版）。由于篇幅所限，本文介绍，展示一斑。

一 《女书用字比较》制作的必要性与可能性

(一) 必要性。女书有许多谜，其中有已解之谜，还有未解之谜。已解之谜依旧有人在炒作，造成混乱；未解之谜则是尖端了，需要静下心来，做艰苦扎实的工作。从原本资料入手，来不得半点臆断和假造。

女书字数到底有多少？女书来源如何？历史有多久？是女书研究中的尖端问题。对女书字形渊源的考察研究，以及文字体系自身内在用字规律的考察、量的统计归纳，是考察女书渊源的基础工作之一。

(二) 可能性。清华大学数十名师生利用两年的时间，正本清源，从近千篇女书原始文本资料中，抢救编译整理出可识读的 630 多篇，扫描影印出版了《中国女书合集》（2005 年 1 月中华书局）。编制了《女书字表》，并初步进行数字化处理，建立了《女书字库》。这为我们考察女书基本用字，进行量化研究，提供了科学依据和数字化手段。

在 2004 年“女书的历史、现状与未来国际学术研讨会”上我提交的《女书基本字与字源考》就是根据《中国女书合集》及《女书字表》、《女书字库》整理研究的。试图回答人们关注的两个问题：女书基本字的数量，女书基本字的字源。前者有助于探讨女书文字的性质，后者有助于探讨女书产生的历史。我们还根据最后一位女书老人阳焕宜 100 多篇作品整理出《阳焕宜女书用字表》（《百岁女书老人阳焕宜女书作品集》国际文化出版公司 2004 年 1 月）。

清华大学抢救女书 SRT 工作组的师生，进而根据五卷本《中国女书合集》中传本佚名、高银仙、义年华、阳焕宜、何艳新的 22 万字女书作品，进行了全面、穷尽性地女书用字比较，全文近 20 万字。《女书用字比较》对于了解女书作为一套成熟的表音文字，其记录语言的手段、特点，有着重要的意义；同时对目前女书的混乱状态具有一定的规范性。

(三) 后女书时代的课题。就在“女书的历史、现状与未来国际学术研讨会”后 10 天，2004 年 9 月 20 日，阳焕宜老人（1909 年出生）的去世标志原生态女书历史的结束，女书进入后女书时代。女书已经作为文化遗产，提到日程上来。如何传承，如何开发，绝不能随心所欲，强行规定，任意假造，必须有原生态文本作为科学依据。

清华学子在繁重的学业之余，放弃寒暑假，没有周末节假日，花费了几年时间。承受了超常的枯燥寂寞，付出繁重的劳动，对数十万字的原始资料，细心细致地进行了解读、整理和检索统计工作。

二 《女书用字比较》制作的依据

(一) 女书字音依据

因为女书读音有“雅言”即当地土话“普通话”，因此《女书用字比较》字音部分，依

据黄雪贞先生《江永方言研究》第四章“江永土话（城关音）同音字表”。同时标出女书流行中心地区的上江墟阳家村土话、河渊村土话和女书读音。阳家土话为女书老人阳焕宜的母语。阳家是她的出生地和婚前 20 年居住地。河渊村是阳焕宜婚后 60 年生活地，更是目前会女书人最多的村子。女书读音主要为 1940 年出生的何艳新，以及何静华、胡美月的女书读音（音档工作正在进行中）。

（二）字表所收音节数量依据

《女书用字比较》收汉字约 3800 个，依据《方言调查字表》（修订本）商务印书馆，1986 年，北京略有增删。先按韵母分类，韵母相同的字按声母表次序排列，声母、韵母相同的再按声调次序排列。1) 韵母的排列顺序是：

a ua ya ie ø uø yø uø yø i iu u yu y u ai uai yai au iau ou iou eøm aøm yøm uøm
yñ añ iañ uañ yañ eñ oñ ioñ in ñ

2) 声母的排列顺序是：

p p' m f v t t' n l ts ts' s tç tç' nç c k k' ñ h Ø

3) 声调的排列顺序是：

调类	1	2	3	4	5	6	7
调名	阴平	阳平	阴上	阳上	阴去	阳去	入声
调值	44	42	35	13	21	33	5

《女书用字比较》汉字的来历根据《广韵》。来历未详暂时写不出字的音节用方框“□”代替，然后在括号内注明字义。文白异读也尽量在括号内注出。

（三）女书用字统计依据

统计材料为《中国女书合集》（中华书局 2005 年 1 月出版）22 万女书字，资料僅限於傳世佚名經典本，以及截止到二十世紀末，迄今可见到的最後一代自然傳人的全部作品，为原生态自然文本、经典文本，均为精通女书高手所书。因此，这个字表反映了女书用字的基本原貌，可以正本清源，具有一定的规范性。作品有：

1. 传本佚名女书作品（64 篇 34800 字）
2. 高银仙女书作品写本（180 篇 62100 字）
3. 义年华女书作品写本（80 篇 49700 字）
4. 阳焕宜女书作品写本（130 篇 36000 字）
5. 何艳新女书作品写本（197 篇 39600 字）

2. 4 统计方法：穷尽统计、字频统计

女书单字为原件扫描中提取，基本上是穷尽性，保留异体字。女书单字图片有近万个。女书字的每种用法标记的词后尽可能提供字频数据，由高至低排列。以利于考察确定使用频率最高的基本字，考察所谓异体字的分布和原因；也可反映个体用字的情况、女书字体的交际功能等。

三 《女书用字比较》的价值

（一）文字系统内部研究（造字、用字、异体字）价值

1 异体字处理和基本字的确定。

作为民间文字，女书没有经过规范。女书用字比较灵活，异体字情况比较复杂。对女书用字全面梳理，利用现有的原始文本，进行穷尽性比对，从而得出科学的结果。《女书用字比较》就是这样的工作。例如标记 tçie⁴⁴ 这个音节到底有几个女书字形，哪个是基本字，如何处理异体字？通过《女书用字比较》的考察，十分清楚（见下表）标记 tçie⁴⁴ 的使用频率

最高的形体是𠂇，是基本字；频率低的简体是𠂇。是异体字。而其他的写法仅一两次，多为音近临时借用，可忽略。其他如suou⁴⁴𠂇、𠂇等形体中，𠂇是基本字。

城关 音	字 源	汉字	女书用字				
			佚名作者	高银仙	义年华	阳焕宣	何艳新
tɕie ⁴⁴	珍 / 金	金真襟针 斟徵蒸珍 巾贞侦斤 筋	𠂇 金 5 真 46	𠂇 金 156 真	𠂇 金 85 真	𠂇 金 48 真	𠂇 金 75
			襟 47	110 襪 20 针	82 襪针 13	43 襪 11 针	真 73 襪
			𠂇 金 5 真 40	24 斡 4 徵 3	斟 122 徵 9	13 珍 1 巾 4	10 针 16
			襟 38 针 16	珍 16 斤 11	珍 8 贞 4 斤	斤 1	斟 4 珍 4
			𠂇 真 1	筋 4	11	𠂇 金 19 真	巾 6 斤 10
				𠂇 金 8 襪 5	𠂇 斡 1	34 襪 4 针 7	𠂇 真 1
				斤 1 针 1		珍 3 斤 2	
				𠂇 金 1 襪 2		𠂇 金 1 真 2	
				𠂇 真 1 𠂇 蒸		𠂇 真 1	
			1				
suou ⁴	山 / 生	山生牲笙 甥衫	𠂇 山 3 生 13	𠂇 山 123 生	𠂇 山 32	𠂇 生 123	𠂇 山 63
			𠂇 山 3 生 9	213 牝 10 笙	生 298	笙 3 嗽 1	生 128
			牲 1	6 嗽 30	牲 2 笙 1	𠂇 山 38	牲 3 嗽 8
			𠂇 生 10 山 1	𠂇 山 2 𠂇 山 1	𠂇 嗽 27	𠂇 山 5	衫 1
			𠂇 生 9 𠂇 嗽 1	𠂇 生 3 𠂇 生 1	𠂇 牝 1	𠂇 山 3	𠂇 山 30
							牲 1
							𠂇 衫 1

2 字源考定。通过比较用字表的考察，我们不仅非常容易地确定基本字、异体字等，更重要的是还可以清晰地看到的字源信息。如：

字源	女书 基本字	标音	可标汉字（词）	异体、衍生、借用、讹误
看	𠂇	k'anj ²¹ /k'Anj ⁵¹¹ / k'anj ³⁵ /k'Anj ⁵²⁴ / k'anj ⁵ /k'Anj ⁵	看抗炕控砍	𠂇 炕(k'ou ²¹ 叻)(𠂇 可k'ou ³⁵)
空	𠂇	k'anj ⁴⁴ /k'anj ²¹ / k'Anj ⁵⁴⁴ /k'Anj ⁵¹¹	空康堪勘糠	𠂇 糠/han ⁴⁴
孔	𠂇	k'anj ³⁵ /k'Anj ⁵²⁴	孔慷	𠂇
砍	𠂇	k'anj ⁵ /k'anj ⁴⁴ / k'Anj ⁵ /k'Anj ⁵⁴⁴	砍	𠂇 收 𠂇

3 考察女书造字法。大致分基本借形、变异造形、孳乳造字三类，即与所借方块汉字的

血缘关系远近有三级。

造字法	例字																																															
基本借形																																																
变异造形

4 考察女书用字，即记录语言方法。假借是女书记录语言的基本方法。通过比较考察，可以了解，为什么用 300 多个基本字，就可以基本上记录当地土话；也可以了解女书假借用字，与声母、韵母、声调的关系比较宽松。

1) 一个女书字形标记的一组词，在土话里声韵调相同，或略异。

ion^{42} 王嬴荣 yn^{42} 完丸员圆园沿铅元原源袁辕缘援 vanj^{42} 玩 yn^{35} 院 yn^{33} 愿

tcyn^{42} 全泉旋传 (~达) 权颧

tcyn^{13} 赚篆传

tciong⁴² 呈程擎

 kuou⁴⁴ 艰间（中～）奸关更庚羹根耕螺
kuou²¹ 监鉴舰间惯棍谏更

 ciou³³ 寿学熟
ciou¹³ 校酵效受授ciou²¹ 孝兽ciou⁴² 仇酬售爻（地名）肴淆

 tciou⁴⁴ 交郊胶周舟州洲鸠
tciou⁴² 纷稠筹求球tciou²¹ 教（～育）较救窖咒咎灸tciou³³ 旧昼

 tsau³⁵ 早枣蚤澡
tsou³⁵ 走tsa³⁵ 姊tsuow³⁵ 斩盍

 kanj⁴⁴ 甘柑干肝竿干官棺观冠冈岗刚纲钢缸光（～亮）公功攻
kanj³⁵ 感敢橄杆秆擀赶管馆港广kanj²¹ 干贯观冠罐灌杠贡

声韵相同、不同声调可共用一个字，如 通过比较字表具体考察(表式下同):

城关 音	字源	汉字	女书用字				
			佚名	高银仙	义年华	阳煥宣	何艳新
pu ⁴²	步	婆蒲菩					
pu ¹³	步	抱部埠簿					
pu ²¹	步	布佈怖					
pu ³³	步	步薄 (～荷)					
pu ⁵	腹、福、百	腹博口 (坏)					

p‘u ³⁵	父 火 甫	甫浦捕 辅普谱			浦 1		
p‘u ²¹	步	破铺 (店～) 簸	铺 5	铺 2	铺 3 破 8 1	簸 1	簸 1
p‘u ⁵	白 、 卜	卜仆扑 朴朴		扑 2			

2) 声母相同、声调相同、韵母不同也可共用一个字

sa ³⁵	死、 杀	死		死 28 死 55 死 2 (训用)	死 62 死 4 死 2	死 63 死 11	死 40 死 13 死 15
suow ³ 5		伞省 (～长) (共～党)		伞 3 伞 2 省 2	伞 2 产 5 伞 2 省 1	伞 2 省 2	伞 3 省 3 伞 2 产 1

3) 但有时字形分工十分明确，即使声韵调完全相同，也各职其字，即一音多字，如：

手首守^{ciou³⁵}同音，但^{手首}而^守；哥歌姑^{ku⁴⁴}同音，但^哥而^歌，^姑而^姑。

再如^矣i¹³已以，^意i²¹亿亿，^叶i³³亦叶易异翼肄，^医i⁴⁴医依，^遗i⁴²遗，^倚i³⁵倚；

但有时声韵完全相同，声调不同，用字不同。如，^亦i³³常用^亦，^移姨i⁴²常用^移，^倚i³⁵常用^倚，^矣i⁵常用^矣，^抑i⁵常用^抑。

^含hai⁴²含函衔寒韩行杭航黄簧皇蝗^旱hai¹³旱hai²¹汉烘hai³³汗焊翰唤换焕痪

这种现象说明，女书虽然是假借标音文字，但用字时尽量有字源字形依据。

5 考察异体字。通过交际用字比较考察，造成女书书写时异体字原因主要有：

同/近义训读互用：^日儿/二/两、^离别/离、^杀死/煞死；

同/近音音读互用：^闹难如依、^悲比被/拜、^步伴风；

形近相混互用：^比pa³⁵比、^老lau¹³老、^世少^世世；^屋u⁵屋、^飘p‘iu⁴⁴飘；

一字讹变数形: 祖 → 祖、悲 → 悲、过 → 过、多 → 多;

其中常常是省略造成的: 街 → 街、山 → 山、人 → 人;

同音字源不同: 手 (丑手) 久 (久九)、依 (依) 亦 (亦) 一 (一) 壹 (壹) 义 (义);
而具有字位价值的真正异体字是最后一种。

由上述种种原因造成了形体各异, 说明女书用字很宽容, 重视的是标音; 但一音多字中有基本字。如标记pai⁴⁴ 风宾冰奔彬枫分 (~给) 这个音节的诸多形体, 宾/风是基本字:

pa ⁴⁴	v 风	风 19 宾 4 冰 1	风 9	风 39	风
风宾	风 6		风 9	风 39	53 宾 3
冰奔	15	风 17	风 8 宾 1 风 2	风 26 风 6	冰 1
崩彬	风 7	风 9 冰 2 风 2 风	风 2 风 2	风 5 风 2 风	风
枫	风 5	1	宾 1	1	10
	风 1	宾 1 奔 1 崩 1	风 1 风 1	宾 1 风 1	风 1
		风 4 宾 1 风 1		风 1	

(二) 女书交际用字研究 (个体用字量、个体差异、共识度) 价值

1 个体用字数量

	基本字	作品总字数
传本佚名	358	34800
高银仙	334	62100
义年华	362	49700
阳焕宜	304	36000
何艳新	380	39600
总计	398	220000 (《合集》)

2 个体用字差异

在我们所知的女书老人中, 方块汉字水平最低的是阳焕宜, 因此她用字最少, 而且出现方块汉字也最少。例如:

“客”义年华用 客、何艳新用 客, 而阳焕宜用 客;

“饮”高银仙用 饮、义年华用 饮、何艳新用 饮, 阳焕宜用 饮;

“肉”高银仙用 肉、义年华用 肉、何艳新用 肉, 而阳焕宜用 肉。

“英”高银仙用 英、义年华用 英、何艳新用 英, 而阳焕宜用 英、佚名也用 英。

何艳新 (1940 年出生) 解放后上学读书几乎初中毕业, 在她的女书作品中方块汉字的

痕迹很多，除了大家都使用的（见前表）之外，还有 痕迹很多，除了大家都使用的（见前表）之外，还有

等二十多个。义年华也认识一些方块汉字，所以她也常用，如 。高银仙也偶用方块汉字。可见女书体系是个宽松、开放的系统。下面的例子也证明这一点。

3 女书受时代影响，常用字代替传统用字，如：

		传本佚名	高银仙	义年华	阳焕宜	何艳新
mau ⁴²	毛	毛 5	毛 9 毛 7	13	毛 4	毛 8 毛 2
nion ⁴⁴	英	英 1	英 44	英 5	英 13	英 47

可见阳焕宜用字比较传统，同佚名传本。还可体现在传本《祝英台》（见《中国女书合集》）。

（三）方言研究价值

女书记录的语言是当地土话，女书作品中有大量的方言土语词，又有文白异读、辈份差别、村落差异，以及女书用字未经严格规范、语句错乱等复杂情况，特别是女书是用一个字标记一组同音或近音词的音节表音文字。还有许多问题有待继续深入研究。同时也为颇具特点的湘南土话研究提供了书面资料。如：

1 舌头（知彻澄娘）、舌上（端透定泥）字多读半舌音 l-，即 l-母不仅来自中古来母，而且大量来自端母，偶而来自定母，少量来自精母，如：（括弧内汉字为借字源）

lai ⁴⁴ 东 灯 登 冬 砧（～ 板，案 板）	(东) (刀/力)	东 18 灯 10 冬 1 登 1 东 1 灯 1	登 12 灯 5 冬 9 登 4 灯 6 登 1	东 20 灯 16 登 6 冬 7 东 1	东 23 登 10 灯 16 冬 7 东 3 登 1	东 23 灯 13 登 5 冬 3 登 3 灯 1 东 3
li ⁴⁴ 低	(力) (东)	低 17 低 8 低 1	低 24	低 13	低 21	低 10
li ⁴² 犁黎	(力)		犁 1		犁 5	犁 4
li ³⁵	(鸟)	底 28 抵	底 34	底 15	底 19 抵 14	底 22

底抵		11 底 4 抵 10 底 2 抵 1	抵 8	抵 14		抵 14
lī ¹³ 礼		(了/礼) 礼 98	 礼 60	 礼 33	 礼 72	 礼 21
hī ²¹ 帝禘	 了 (刀)	 帝 3	 帝 14	 帝 2	 帝 2 帝 1	 帝 7

2. 轻唇重唇不分，中古轻唇音字多读重唇音。如 p-母有些来自中古音帮母：还有来自中古音的非母。m- 母除了来自中古音的明母还来自微母，如：(括弧内汉字为借字源)

pū ¹³ 倍妇	 (白) (父) (合) (火)	 妇 3	 妇 21 妇 14 妇 1 妇 2	 妇 98 妇 26 妇 15	 妇 21 妇 12 倍 1	 妇 20 妇 12 倍 1
pū ²¹ 背 (~脊)辈	 (白) (悲) (背) (百)	 背 36 辈 1	 背 31 背 8 背 1	 背 10 背 8 背 1	 背 11 背 4 背 4 背 3 背 1	 背 4 背 4 背 3 背 1
pan ²¹ 半 放 扮 绊	 (伴) (分) (奉) (拜/被)	 半 6 放 4 扮 67	 半 33 放 33 半 2 放 4 放 14 放 1	 半 20 放 16 半 5 放 4 放 18 放 1 扮 1	 半 27 放 37 放 4 扮 5	 半 27 放 7 放 11
pan ³³ 饭叛	 (帮/邦)		 饭 21	 饭 5	 饭 1	 饭 11

	 (伯)		 饭 2	 饭 1		
	 (非)		 饭 1			

3 江永土话其他特点，如古全浊声母现都读清音不送气。如分尖团，凡精母为尖音，见母为团音；分照二、照三。照二字归精组字，照三字归见组字；分 n-、l-；保留古舌根音，见母二等字，普通话为 tb-，土话仍为 k-；古入声韵尾消失，但古清入声字的声调自成一类（55 调），浊入声字归阴平；塞音韵尾消失；中古细音变洪音等等，女书用字均有体现。

（四）理论价值----新材料提出理论阐述、方法论要求

1 字位理论。我们借用音位理论，采用了字位理论来处理异体字问题。即在一字多形的情况下，在同一字源、基本结构相同、读音相同、没有区别意义的异体字中，取使用频率最高的常用字形作为基本字，处理为一个字位。

2 模糊理论。女书没有经过规范，但不同个体之所以可以互通共识，进行交流，就是因为语言文字符号有模糊性、羨余性，交际识别度有最大公约数的默契。

（五）信息处理价值——国际编码、数字化、数据库

在国家信息产业部电子工业标准化研究所、中国社科院语言所、清华大学计算机学院、清华大学中文系以及中国女书研究会、江永地方政府的共同努力下，提交女书的 ISO/UCS 国际编码提案 *Proposal for encoding Nüshu in the SMP of the UCS*（包括补充提案），作为中国代表团提交项目之一，在 2007 年 9 月 17~25 日 ISO/IEC JTC1/SC2 /WG2#51 会议经过严谨的讨论、答辩，取得评委们的认可、支持。并于 2008 年 4 月 21~25 日 ISO/IEC JTC1/SC2 /WG2#52 会议决议女书修订提案 N3462 作为正式被接受。

《中国女书集成》(1992) → 《中国女书合集》(2005) → 《女书用字比较》(2006) → 《女书基本字与字源考》(2004、2005、2006、2008) → 女书 ISO/UCS 国际编码、女书电子词典等，可见《女书用字比较》是女书的国际编码标准化、数字化以及数据库建设等信息处理工作的基础。

四 通过《女书用字比较》考察可得出的结论

- (一) 文字发生学定位：女书造字借源于汉字，是方块汉字的变异。
- (二) 文字的本质属性：女书是音节（字符）表音文字。
- (三) 女书基本字数量：400 个左右，并验证字位理论的必要性、实用性和可操作性。
- (四) 女书的历史：汉字楷化、中古以后。方言研究将科学证明女书的产生的时代。
- (五) 女书体系是个宽松、开放的系统。既有个体用字差异，又有交际共识度。

《女书字表》《女书字库》《女书用字比较》由清华大学抢救女书 SRT 小组的同学制作。参加的同学主要有王荣波、吴迪、谢玄、莫静清、张丹、刘双琴、杨桦、陈卉、徐荣、赵璞嵩、莫静清、王琛、李文山、岳岩、牧野英惠、朱翠芳以及廖盼盼、朱文韬，还有中文系零字班、一字班、二字班以及双学位的数十名同学参与。

本文的每个问题都可展开深入研究，由于篇幅所限，只能点到为止。以后我们将陆续发表专题研究成果。

（《女书用字比较》，已于 2006 年由知识产权出版社出版）
