

US/Unicode review of IRG N1748

U+2536C through U+27D21, per IRG N1745

by Dr. Richard Cook and Dr. Ken Lunde, 2011-01-31.

Major issues are **marked in red** under Comment Type.

NOTE #1: References to Kangxi Radicals in the Comment column are by integers prefixed with a "#" symbol.

Note #2: The simplified (one less stroke) Radical #188 component of U+25C6A and U+25E20 is a general problem that seems to affect all V-source glyphs in all CJK Unified Ideograph blocks.

Note #3: The V-source glyphs are severely inconsistent with regard to the Radical #140 instances.

Note #4: This report excludes those items previously reported by the Japan NB in IRG N1707, except for those for which additional details are provided.
