

Title: Introducing the Kirat Rai Script
Author: Anshuman Pandey (pandey@umich.edu)
Status: Individual Contribution
Action: For consideration by WG2 and UTC
Date: 2011-05-01

1 Introduction

The purpose of this document is to bring to the attention of the Unicode Technical Committee (UTC) the Kirat Rai script. This script is used for writing Bantawa (ISO 639: bap), an eastern Kiranti language of the Sino-Tibetan family. Bantawa is spoken in Sikkim and Nepal by some 390,000 persons. It is related to the older Khambu Rai script, which is described briefly in N4018 L2/11-105. It appears to be a modification of the Khambu Rai script. The Kirat Rai script is maintained by the All-India Khambu Rai Society (AKRS).

The Kirat Rai script is an alphasyllabary based upon the Brahmi model. Consonants possess an inherent vowel. Vowels are written using a vowel-carrier letter and combining signs. There is a VIRAMA-like character. The script has decimal digits.

Research on the script is ongoing. This document provides a preliminary code chart, names list, and list of character properties. An allocation for Kirat Rai should be made in the roadmap to the Supplementary Multilingual Plane. A minimum of four columns is required for the script. Additional information will be provided as it is obtained.

2 Character Repertoire and Properties
