## 1. Introduction

Orok (Орокский язык; ISO 639-3: oaa) is the Russian name for the language known by its speakers as Ulta or Ujlta (ульта, уйлта). It is counted among the Tungusic languages. The language is spoken in the Poronaysky and Nogliksky Administrative Divisions of Sakhalin Oblast, in the Russian Federation.

According to the 2002 Russian census there were 346 Oroks living in Russia, of whom 64 were competent in Orok. Additionally, Oroks live on the island of Hokkaido in Japan.

Orok is used conversationally in everyday situations by the members of the older generation. It is also the language of oral folk literature.

An alphabetic script, based on Cyrillic, was introduced in 2007. A primer has been published, and the language is taught in one school on the island of Sakhalin [1] [2].

*(The text of this introduction up to here is an augmented and revised excerpt from [3].)*

This alphabet contains one letter "en with left hook" which is not included in Unicode 6.0.

This letter (i.e. the case pair comprising it) is proposed here.

It is emphasized that this letter occurs together with, and in contrastive use to, the already encoded letter "en with hook" (U+04C7/U+04C8).

## 2. Proposed Characters

### **Block: Cyrillic Supplement**

#### **Additions for Orok**
