Date: November 4, 2011
Title: Comments accompanying the U.S. positive vote on ISO/IEC 14651:2011/PDAM 1
Source: INCITS/L2
Action: Forward to INCITS

The U.S. National Body is voting Yes with comments on the following SC2 ballot: SC2 N4205:
Information technology -- International string ordering and comparison -- Method for
comparing character strings and description of the common template tailorable ordering

Technical Comments:
T.1.
Because of a change in UCA for version Unicode 6.1 there is no need for specific weight symbols for U+0F3E and
U+0F3F. To keep generation of the C.T.T. for 14651 in synch, the unused symbols <S0F3E> and <S0F3F> should be
removed. This change will bring the CTT and the UCA 6.1 table into synchrony.

T.2.
The U.S. requests the collation for U+214D to be changed in the C.T.T. to be equivalent to the sequence "A / S".
This change will bring the CTT and the UCA 6.1 table into synchrony.

T.3.
The U.S. requests that the entry for the Tifinagh character 2D66 TIFINAGH LETTER YE be changed in the C.T.T. so
that it occurs directly after that for 2D3B TIFINAGH LETTER YEY. This is a correction based on feedback from
IRCAM in Morocco.

Template for comments and secretariat observations
