US			T.1.	The US made numerous comments in the NP ballot for this effort. This present ballot is based on the same original working draft, and does not address any of our comments. Moreover, we feel that the editor's response to our NP ballot comments did not adequately address our concerns.		
US			T.2.	The claim that this TR is required by the Unix implementers is not substantiated; see JTC1/SC22/WG20 N922 for a contrary point of view from the Linux community.
