Title: Proposal to establish an “AJ1” source for the `kIRG_USource` field (Revised)

Source: Dr. Ken Lunde, Adobe Systems Incorporated

Status: Member Body Contribution

Action: For consideration by the IRG

Date: 2011-11-11

A total of 27 CJK Unified Ideographs have been submitted by Adobe thus far, through the UTC, and are currently attributed to the language- and region-agnostic `kIRG_USource` field. Because the Adobe-Japan1-6 character collection can be considered their true source, which can be attributed to Japanese, I propose that a new “AJ1” (*Adobe-Japan1*) source be established for the `kIRG_USource` field to make the originally submitted source clearer. The source reference is “AJ1-” followed by the Adobe-Japan1-6 CID (*Character ID*; in decimal). The following is a complete list of the affected CJK Unified Ideographs and their proposed new `kIRG_USource` source references:

URO, Unicode Version 5.1: 7 characters (See IRG N1256 → IRG 27)

U+9FBC	kIRG_USource	UTC-00836	→	AJ1-15431

U+2B81A	kIRG_USource	UTC-00859	→	AJ1-14278

Although this proposal is to change the `kIRG_USource` source references for 27 CJK Unified Ideographs, their representative glyphs should not be changed. This proposal, if accepted, involves changes to UAX #38 and UTR #45. That is all.
