

Title: Draft repertoire for PDAM2 of ISO/IEC 10646:2012 (3rd edition)

Date: 2011-09-26

L2/11-450

Source: Michel Suignard, project director

Status: *Project Editor's summary of the character repertoire addition as of December 5th 2011*

Action: For review by WG2 and UTC experts

Distribution: WG2 and UTC

Replaces:

Status

This document is intended to support the process of synchronization between the Unicode Standard and ISO/IEC 10646. It may be used by WG2 delegates interested in the results of the review of the ballot document and other pending character proposals by the Unicode Technical Committee (UTC). In this version of the document, the names and code positions are shown as currently approved by UTC for future versions of the Unicode Standard or as submitted in ballot comments and character encoding proposals. It is not a summary of WG2 decisions -- that document will be released at the end of the WG2 meeting.

Manner of Presentation

The character names and code points shown are the same for Unicode and ISO/IEC 10646, including annotations.

In this document, the new characters are not shown in the context of the existing characters. The existing characters will be shown in the final ballot document or character names list. The occasional use of the word <reserved> in this draft is an artifact of the production process and should be ignored.

Information about the status of a character proposal in WG2 and UTC as well as other information about the proposal is presented in a marginal note. Where a proposal refers to characters that are not in a single range, the information is repeated as necessary. A series of \$\$\$\$ indicates the presence of an issue that needs to be resolved as part of synchronization. The WG2 document number for all proposals has been provided for reference, as well as the UTC document number.

Note to Reviewers

UTC reviewers, please use this document as a summary of UTC review of pending ballots and proposals.

Despite best efforts there may be minor discrepancies in this document, particularly in terms of this summary and the status information printed in the margins.

Contents

This document lists 259 characters.

The following list shows all 10 blocks (existing or new) to which characters are proposed to be added, or which have been affected by other changes documented here.
