

Title: Draft repertoire for FDAM1 of ISO/IEC 10646:2012 (3rd edition)**Date: 2012-10-25****L2/11-xxx WG2/N4381**

Source: Michel Suignard, project editor

Status: Project Editor's summary of the character repertoire as result of changes in M60

Action: For review by WG2 and UTC experts

Distribution: WG2 and UTC

Status

This document presents a summary of all characters that constitute the tentative repertoire of the amendment 1 to ISO/IEC 10646:2012, with code positions, representative glyphs and character names. In this document, the names and code positions are shown as currently approved by WG2 for the text of the forthcoming ballot. The purpose of this document is to allow WG2 delegates to review the character names, code positions and glyphs and notify the editor if they differ from what was approved in the meeting. A separate ballot document will be submitted by the project editor after the meeting.

Manner of Presentation

The character names and code points shown are the same for Unicode and ISO/IEC 10646, including annotations.

Note to Reviewers

Please review that this document accurately reflects the decisions taken at meeting M60, and if possible, alert the project and contributing editors to any discrepancies before the ballot is issued.

Despite best efforts there may be minor discrepancies in this document, particularly in terms of this summary and the status information printed in the margins.

Contents

This document lists 1769 characters.

Existing characters from ISO/IEC 10646:2010, for which glyph corrections have been requested are not shown in this summary document, but they will be shown in the ballot documents.

The following list shows all 47 blocks (existing or new) to which characters are proposed to be added, or which have been affected by other changes documented here.

Astrological digits

These digits also known as Sinhala Lith Illakkam have been primarily used for writing horoscopes. This number system has a zero place holder concept unlike the Sinhala archaic numbers, Sinhala Illakkam, encoded in the 111E0-111FF range.
