RE: Unicode Localization Interoperability Technical Committee - Liason Report
(UTC #135, item B.9.1)

<http://uli.unicode.org>

ULI Status — 2012

- Internal agreement on plain text content boundary joining and separate best practices
 - UAX 29 convention: U+00F7 ÷ and U+00D7 ×
 - Agreed syntax for referencing CLDR elements for segmentation:
 - XPath to the CLDR parent element level
 - Initially vetted English, German, Russian, and Spanish
 - <http://unicode.org/uli/trac/browser/trunk/abbrs>
 - Created a demo to show behavior of updated ULI input
 - <http://demo.icu-project.org/icu-bin/icusegments>

ULI Status — 2013

- Portuguese, Italian
- Draft implementation to demonstrate ULI progress:
 - Incorporate CLDR abbreviations
 - (Example: Month abbreviations such as **okt .** for October)
- CLDR and ICU contribution integration in 2013
- Open source CAT integration in 2014

Logistics

- Meet once a month by phone
- Regular participation by:
 - IBM, Microsoft, Yahoo, Google, SAP, GALA, and XLIFF TC
 - (Facebook has attended the last meeting)
- Challenges
 - Need more active outreach
- Continue focus on key development areas and show progress
- Solicit additional participation from interested parties

Thanks
