Title: Code table and names list for encoding Nüshu

Source: Michael Everson

Status: Individual Contribution

Action: For consideration by JTC1/SC2/WG2 and UTC

Date: 2013-07-23

Based upon the outcome of the discussion on Nüshu at the WG2 meeting in Vilnius (N4461 *Nüshu ad hoc report*), this document contains a new code table and names list based on the following agreed principles:

- 1 The repertoire of characters to be encoded shall be based on the tables in pages 36–56 of 女书读本 *Nǚshū Dúběn* 'Nüshu Reader' ISBN 978-7-5438-5282-2.
- 2 The repertoire shall be ordered according to each character's stroke count as given in *Nüshū Dúběn*, and within each stroke-count set the characters are ordered according to pronunciation, sorting first by rhyme, then by initial, and then by tone. The phonetic transcription and UCS version of this are given here:

Rhymes:

a	ua	ya	ie	Ø	uø	уø	uə	уə	ew	i	iu	u
A	UA	YA	IE	OE	UOE	YOE	UE	YE	WE	I	IU	U
yu	У	ш	ai	uai	yai	au	iau	ou	iou	ət	u	uow
YU	Y	W	ΑI	UAI	YAI	AU	IAU	OU	JOI	J E	W	UOW
you	ı u	w :	yn	aŋ	iaŋ	uaŋ	yaŋ	əŋ	oŋ	ioŋ	iŋ	ŋ
YOV	V UW	/ YN	ANG	IAN	G UA1	NG YA	NG E	NG C	ONG 1	ONG	ING	NG

Initials:

pp'mfvtt'nltsts'stete'ngekk'nghØPPHMFVTTHNLTSTSHSTCTCHNJCKKHNGHØ

Tones, in the form of five-degree contour tone marks:

/.44/ /.42/ /.35/ /.13/ /.21/ /.33/ /.5/

3 Character names shall be based on the most frequent reading of a character, typically the topmost entry within any box in the tables on pages 36–56 of Nushū Duběn. Where two character names are identical, the most frequent shall be given first, with lesser-used characters indicated by name extensions. For instance U+1B18A is NUSHU CHARACTER SAI44 (1862 citations, p. 43a) precedes U+1B18A is NUSHU CHARACTER SAI44-A (245 citations, p. 50b) and U+1B18A is NUSHU CHARACTER SAI44-B (123 citations, p. 43b).

- 4 Although in Vilnius there was discussion of unifying the character U+1B140 分 NUSHU CHARACTER TCHIE44, shown in *Nǚshū dúběn* on page 39b with the previous character U+1B13F 分 NUSHU CHARACTER TCIE44, there does not seem to be any advantage to making this unification. Although the shapes are similar, the reading 称 *chēng* 'to call' is found only with TCHIE44 and not with any of the glyphs used for TCIE44 (see tcie⁴⁴, p. 32, and tc'ie44, p. 34 in 女书用字比较 *Nǚshū Yòngzì Bǐjiào* 'Comparison of Nüshu characters' ISBN 978-7-80198-261-2). If unified, this would be the only character listed in *Nǚshū Dúběn* which would not be encoded distinctly.
- 5 A number of characters are "direct slanting loans" (with little or no stroke change or modification) from Chinese; these are given in the names list with cross references to the corresponding CJK characters. It is not proposed to unify these with CJK.
- 6. Some readings are problematic. 1B175 \$\frac{1}{2}\$ NUSHU CHARACTER NOE33 is listed as NO33 in N\bar{u}\text{sh}\bar{u}\$ D\bar{u}\text{b}\bar{e}n\$ and N\bar{u}\text{sh}\bar{u}\$ Y\degreen nogz\hat{i}\text{B}\bar{i}ji\degreen 0\text{—but the vowel [o] is not given alone in the source materials descriptions or in the ordering specification; only [\varphi] and [ou] are. This needs clarification.
- 7. Code charts with updated names are given below.
