

# Proposal to Encode Additional Glagolitic Characters in Unicode

Aleksandr Andreev\*, Heinz Miklas, Yuri Shardt

---

## Section 1. Introduction

Glagolitic, also known as “Glagolitsa”, is an alphabetic writing system used to record Church Slavonic and other Slavic languages. Originating in the 9<sup>th</sup> Century, it is the earliest known Slavonic alphabet. The creation of the alphabet is attributed to the younger of the teachers of the Slavs, St. Cyril.

Glagolitic writing may be found in mediæval manuscripts and in printed liturgical books, mostly of a Croatian origin. In Bulgaria, Glagolitic was gradually replaced by the Cyrillic alphabet, and this Cyrillic alphabet was subsequently used also by other Slavs. For its part, the Glagolitic script has been preserved by some communities in Croatia even up to the present. Extant Glagolitic texts are of enormous value to linguists, paleographers, and scholars of liturgy.

Support for Glagolitic in the Unicode standard is necessary for two purposes. First, for the digital storage of manuscripts and printed matter in an electronic format (including associated functions such as searching and string comparison). Second, for the development of computer fonts that contain the repertoire of Glagolitic characters necessary for use in academic publications. In this proposal, we will provide examples of Glagolitic characters both from the manuscript tradition and from recent academic works.

The base repertoire of Glagolitic characters has been included in the Unicode standard since version 4.0. Nonetheless, this repertoire is incomplete because it lacks combining (superscript) Glagolitic letters. Such combining letters exist in the Glagolitic script and play a function that is analogous to their role in Cyrillic – that is, they are used in abbreviations that are either space saving devices (for example, commonly written words are often abbreviated) or in *nomina sacra*. For full support of the Glagolitic writing system in Unicode, we therefore propose the creation of an additional block of characters entitled *Glagolitic Extended*. We propose also the encoding of two additional characters to the Glagolitic block of Unicode. These characters occur in recently discovered manuscripts and have been also used in academic literature that discusses these manuscripts. We also propose to change the properties on two Cyrillic characters so that they may be used with Glagolitic writing.

## Section 2. Combining Glagolitic Letters

The following table contains examples of combining Glagolitic letters that occur in various Glagolitic manuscripts and in printed literature. We propose to encode the characters as one block, in the same codepoint order as the non-combining (base) Glagolitic letters encoded at U+2C00 and following. This allows for simple computer manipulation of Glagolitic characters, as well as leaving some encoding positions empty to be used in the unlikely instance that additional combining characters are discovered by researchers and need to be encoded. Note that all of the indicated codepoints in this proposal are provisional codepoints in the Private Use Area (PUA).

### Section 3. Proposed Changes to Cyrillic Characters also Used in Glagolitic

Combining Glagolitic Letters are sometimes “covered” by an arc-like or line character (called “Pokrytie” and “Vzmet”, respectively). We propose that the existing Cyrillic characters be used for this purpose: U+0487 Combining Cyrillic Pokrytie and U+A66F Combining Cyrillic Vzmet. For this purpose, the script property on these two characters should be changed from Cyrillic to Common by making the appropriate changes in Scripts.txt; likewise the appropriate annotations should be added to the characters.

#### Changes proposed in Scripts.txt

Current	Proposed
0487 ; Cyrillic # Mn COMBINING CYRILLIC POKRYTIE	0487 ; Common # Mn COMBINING CYRILLIC POKRYTIE
A66F ; Cyrillic # Mn COMBINING CYRILLIC VZMET	A66F ; Common # Mn COMBINING CYRILLIC VZMET

#### Changes proposed in NamesList.txt

Current	Proposed
0487 COMBINING CYRILLIC POKRYTIE * used only with letter titlos x (combining inverted breve - 0311) x (combining cyrillic vzmet - A66F)	0487 COMBINING CYRILLIC POKRYTIE * used only with letter titlos * used also for Glagolitic x (combining inverted breve - 0311) x (combining cyrillic vzmet - A66F)
A66F COMBINING CYRILLIC VZMET * used with Cyrillic letters to indicate abbreviation x (combining cyrillic titlo - 0483) x (combining cyrillic pokrytie - 0487)	A66F COMBINING CYRILLIC VZMET * used with Cyrillic and Glagolitic letters to indicate abbreviation x (combining cyrillic titlo - 0483) x (combining cyrillic pokrytie - 0487)

## Section 4. Glagolitic Letter Broad Onu

The Glagolitic Letter Broad Onu has been identified in Glagolitic manuscripts recently discovered at St. Catherine's Monastery in Sinai, Egypt, including *PsDem* and *MissSin*. It may also be found in the St. Petersburg Sluzhebnik (the “Folios of Krylov and Uspensky”) and in the *EuchSin*. The character, which at first glance visually resembles U+2C11/U+2C31 Glagolitic Letter Onu (ǫ), is wider in appearance and has a strongly convex arc as opposed to the nearly vertical line of the narrow form (see Figure 14). The character is in fact its own character and not simply a graphical variant of Onu. It functions in the same manner as the Cyrillic Broad On (encoded in Unicode as U+047B Cyrillic Letter Round Omega), as a wide letter On used in specific instances, mostly in initial position. In Figures 14 and 15, we demonstrate the usage of this character in *PsDem*, where it occurs as the initial letter of the prefix ǫⱸ (“or”, meaning “from”). Note in these Figures that both the regular Onu (ǫ) and the Broad Onu (Ǿ) are used in the manuscript. In fact, Stankovska (2000) has demonstrated that all three forms of the Glagolitic letter “O” – U+2C41 Glagolitic Letter Onu (ǫ), U+2C49 Glagolitic Letter Otu (Ɱ) and the proposed U+2C5F Glagolitic Letter Broad Onu (Ǿ) – are used in *EuchSin*. Because all of the Glagolitic characters are encoded in Unicode with two forms – a lowercase form and an uppercase form – we likewise propose for encoding two characters at the two remaining empty codepoints in the Glagolitic block.

Characters Proposed for Encoding

Codepoint	Name	Appearance
U+2C2F	Glagolitic Capital Letter Broad Onu	Ǿ
U+2C5F	Glagolitic Small Letter Broad Onu	ǿ

Figure 14: Different appearances of Glagolitic Letters Onu and Broad (German: “breites”) Onu in *PsDem* (p. 88).

Figure 15: Broad Onu (boxed in red) and regular Onu (boxed in blue) in *PsDem*, f. 56r. Note that regular Onu may also occur in initial position preceding the letter Tvrido (Ɱ) (boxed in black) so contextual substitution cannot be used to render this character at the font level.

Figure 16: Note the use of three forms of the letter O: Glagolitic Letter Broad Onu (proposed for encoding; boxed in red); Glagolitic Letter Onu (boxed in black); and Glagolitic Letter Otu (boxed in blue). All three characters occur immediately before Glagolitic Letter Tvrido. Source: EuchSin.

The following entries are proposed for inclusion in UnicodeData.txt:

```
2C2F;GLAGOLITIC CAPITAL LETTER BROAD ONU;Lu;0;L;;;;N;;;;2C5F;
2C5F;GLAGOLITIC SMALL LETTER BROAD ONU;Ll;0;L;;;;N;;;;2C2F;;2C2F
```

The following changes are proposed in Scripts.txt:

Current	Proposed
2C00..2C2E ; Glagolitic # L& [47] GLAGOLITIC CAPITAL LETTER AZU..GLAGOLITIC CAPITAL LETTER LATINATE MYSLITE	2C00..2C2F ; Glagolitic # L& [48] GLAGOLITIC CAPITAL LETTER AZU..GLAGOLITIC CAPITAL LETTER BROAD ONU
2C30..2C5E ; Glagolitic # L& [47] GLAGOLITIC SMALL LETTER AZU..GLAGOLITIC SMALL LETTER LATINATE MYSLITE	2C30..2C5F ; Glagolitic # L& [48] GLAGOLITIC SMALL LETTER AZU..GLAGOLITIC SMALL LETTER BROAD ONU
# Total code points: 94	# Total code points: 96

### Collation

As has been discussed above, the proposed collation order for the Broad Onu is as follows:

ə <<< ǫ <<< ǫ̃ < ə̃ <<< ǫ̃ < ʀ <<< ʀ̃ <<< ʀ̃

**ISO/IEC JTC 1/SC 2/WG 2  
PROPOSAL SUMMARY FORM TO ACCOMPANY SUBMISSIONS  
FOR ADDITIONS TO THE REPERTOIRE OF ISO/IEC 10646<sup>1</sup>**

Please fill all the sections A, B and C below.

Please read Principles and Procedures Document (P & P) from <http://std.dkuug.dk/JTC1/SC2/WG2/docs/principles.html> for guidelines and details before filling this form.

Please ensure you are using the latest Form from <http://std.dkuug.dk/JTC1/SC2/WG2/docs/summaryform.html>.

See also <http://std.dkuug.dk/JTC1/SC2/WG2/docs/roadmaps.html> for latest Roadmaps.

**A. Administrative**

1. Title:	<b>Proposal to Encode Additional Glagolitic Characters in Unicode</b>
2. Requester's name:	<i>Aleksandr Andreev, Heinz Miklas and Yuri Shardt</i>
3. Requester type (Member body/Liaison/Individual contribution):	<i>Individual contribution</i>
4. Submission date:	<i>April 14, 2014</i>
5. Requester's reference (if applicable):	<i>N/A</i>
6. Choose one of the following:	
This is a complete proposal:	<input checked="" type="checkbox"/>
(or) More information will be provided later:	<input type="checkbox"/>

**B. Technical – General**

1. Choose one of the following:	
a. This proposal is for a new script (set of characters):	<input type="checkbox"/> YES
Proposed name of script:	<i>Glagolitic Extended</i>
b. The proposal is for addition of character(s) to an existing block:	<input type="checkbox"/> YES
Name of the existing block:	<i>Glagolitic</i>
2. Number of characters in proposal:	<i>40</i>
3. Proposed category (select one from below - see section 2.2 of P&P document):	
A-Contemporary <input type="checkbox"/>	B.1-Specialized (small collection) <input checked="" type="checkbox"/>
C-Major extinct <input type="checkbox"/>	D-Attested extinct <input type="checkbox"/>
E-Minor extinct <input type="checkbox"/>	F-Archaic Hieroglyphic or Ideographic <input type="checkbox"/>
G-Obscure or questionable usage symbols <input type="checkbox"/>	B.2-Specialized (large collection) <input type="checkbox"/>
4. Is a repertoire including character names provided?	<input type="checkbox"/> YES
a. If YES, are the names in accordance with the "character naming guidelines" in Annex L of P&P document?	<input type="checkbox"/> YES
b. Are the character shapes attached in a legible form suitable for review?	<input type="checkbox"/> YES
5. Fonts related:	
a. Who will provide the appropriate computerized font to the Project Editor of 10646 for publishing the standard?	<i>Aleksandr Andreev (<a href="mailto:aleksandr.andreev@gmail.com">aleksandr.andreev@gmail.com</a>; <a href="http://www.ponomar.net/cu_support.html">http://www.ponomar.net/cu_support.html</a>)</i>
b. Identify the party granting a license for use of the font by the editors (include address, e-mail, ftp-site, etc.):	<i>Menaion Unicode font licensed under GNU GPL by Aleksandr Andreev and Yuri Shardt</i>
6. References:	
a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?	<input type="checkbox"/> YES
b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?	<input type="checkbox"/> YES
7. Special encoding issues:	
Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)?	<input type="checkbox"/> NO

**8. Additional Information:**

Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behaviour information such as line breaks, widths etc., Combining behaviour, Spacing behaviour, Directional behaviour, Default Collation behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at <http://www.unicode.org> for such information on other scripts. Also see Unicode Character Database ( <http://www.unicode.org/reports/tr44/> ) and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.

<sup>1</sup> Form number: N4502-F (Original 1994-10-14; Revised 1995-01, 1995-04, 1996-04, 1996-08, 1999-03, 2001-05, 2001-09, 2003-11, 2005-01, 2005-09, 2005-10, 2007-03, 2008-05, 2009-11, 2011-03, 2012-01)

### C. Technical - Justification

1. Has this proposal for addition of character(s) been submitted before? If YES explain		NO
2. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)? If YES, with whom? If YES, available relevant documents:	<i>Institut für Slavistik at the University of Vienna, Udmurt State University</i> <i>E-mail correspondence</i>	YES
3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included? Reference:	<i>Used by academics studying Glagolitic manuscripts. See Section 1, Introduction</i>	YES
4. The context of use for the proposed characters (type of use; common or rare) Reference:	<i>Rare. See Section 1, Introduction</i>	YES
5. Are the proposed characters in current use by the user community? If YES, where? Reference:	<i>Academic publications and digital storage of manuscripts. See Section 1</i>	YES
6. After giving due considerations to the principles in the P&P document must the proposed characters be entirely in the BMP? If YES, is a rationale provided? If YES, reference:	<i>N/A</i>	NO
7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?		YES
8. Can any of the proposed characters be considered a presentation form of an existing character or character sequence? If YES, is a rationale for its inclusion provided? If YES, reference:	<i>N/A</i>	NO
9. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters? If YES, is a rationale for its inclusion provided? If YES, reference:	<i>N/A</i>	NO
10. Can any of the proposed character(s) be considered to be similar (in appearance or function) to, or could be confused with, an existing character? If YES, is a rationale for its inclusion provided? If YES, reference:	<i>N/A</i>	NO
11. Does the proposal include use of combining characters and/or use of composite sequences? If YES, is a rationale for such use provided? If YES, reference: Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided? If YES, reference:	<i>N/A</i> <i>N/A</i>	NO
12. Does the proposal contain characters with any special properties such as control function or similar semantics? If YES, describe in detail (include attachment if necessary)	<i>It is proposed to change the script property and annotations on two Cyrillic characters. See Section 3, Proposed Changes to Cyrillic Characters also Used in Glagolitic</i>	YES
13. Does the proposal contain any Ideographic compatibility characters? If YES, are the equivalent corresponding unified ideographic characters identified? If YES, reference:	<i>N/A</i>	NO
