

Report on Diversity Emoji Use in iDiversicons and Proposal to Add New Emoji from iDiversicons Collection to Unicode

Katrina Parrott <katrina@idiversicons.com>, Cub Club Investment, LLC.
Shervin Afshar <shervin@shervinafshar.name>, HighTech Passport, Ltd.

Introduction

This document is a revised version of previously submitted document L2/14-085.

iDiversicons is a mobile app by Cub Club Investment, LLC available on iOS and Android devices which allows users to select from a collection of diverse emoji symbols for use in communications through email, text-messaging, and social media. For more about iDiversicons diverse emoji, see <http://www.idiversicons.com>.

Cub Club would like to work with the Unicode Technical Committee in an effort to:

- Encourage Unicode to advocate that protocol and platform developers work together to provide smoother user interfaces for embedding graphic images in messages of all forms (text messages, email and social media) and a way for developers to supply keyboard-like user interfaces for input of these images that behave like the emoji keyboards from the major players in the mobile technology industry
- With the current set of people emoji, a single image for any of these emoji characters might be perceived as excluding people who look significantly different from that image. Some way is needed to provide more images for the people emoji (and perhaps more people emoji), as well as a way to provide more control over character appearance for people and body part emoji. Furthermore, the current set of emoji might be seen as having bias in areas such as the selection of symbols with religious associations

This document is consisted of two parts:

- Part 1: Input on the use cases of ethnically diverse emoji in iDiversicons, mapping existing Unicode emoji to the iDiversicons collection, and feedback regarding future work in Unicode;
- Part 2: Proposal for new additions to the Emoticons or Miscellaneous Symbols and Pictographs block from iDiversicons collection.

The following charts are referred to throughout the text:

- [Chart 1](#) [Chart1-Mapping.pdf]: Mapping iDiversicons emoji collection to existing Unicode emoji;
- [Chart 2](#) [Chart2-Diversity.pdf]: Feedback Regarding Implementation of Diversity Emoji in iDiversicons;
- [Chart 3](#) [Chart3-AllSubmissions.pdf]: All submitted emoji by iDiversicons for addition to Unicode;
- [Chart 4](#) [Chart4-SuitableSubmissions.pdf]: A subset of submitted emoji by iDiversicons suitable for addition to Unicode.

Part 1: Feedback

Analysis

Majority of emoji existing in iDiversicons collection can be considered presentation forms of emoji already added to Unicode (as of version 7.0). For this group, in the rest of this document the methodology used by iDiversicons to implement diversity is surveyed, a mapping between various diverse presentation forms and the existing code point is established, and finally a chart of this mapping is generated.

The remaining emoji are those that do not have respective characters in Unicode. Some of these emoji that fit the new character addition criteria, the app developer would like for UTC to consider as an addendum to our original proposal (or as new proposal if required).

Surveying the Usage of Diversity Emoji in iDiversicons

The diversity factors used in design of iDiversicons emoji are:

- Skin tone
- Gender
- Skin tone combinations (for emoji with more than one person)
- Clothing
- Hair style
- Complexion
- Color of clothing

From these factors, the first three were selected for the survey.

Skin tone

Emoji in iDiversicons collection can be categorized to five major skin tones as follows:

Skin tone	1	2	3	4	5
Sample	以人为例的emoji	人为例的emoji	人为例的emoji	人为例的emoji	人为例的emoji

A special sixth case is considered for emoji with mixed skin tones:

Although for most diversity emoji it has been tried to provide at least one emoji for each skin tone category, but the frequency distribution of emoji with each specific skin tone to Unicode code point does not seem to follow any specific rule. For a breakdown of frequency distribution, see [Chart 2](#).

Gender

Although the coverage is not exhaustive, gender variations exist for some of the relevant emoji in iDiversicons collection of which the following are

non-smiley emoji.

	Name	Male	Female
U+1F46E	Police Officer	👮‍♂️👮‍♂️👮‍♂️👮‍♂️👮‍♂️	👮‍♀️👮‍♀️👮‍♀️👮‍♀️👮‍♀️
U+1F477	Construction Worker	👷‍♂️👷‍♂️👷‍♂️👷‍♂️👷‍♂️	👷‍♀️👷‍♀️👷‍♀️👷‍♀️👷‍♀️

For gender variations for the rest of collection, please see [Chart 2](#).

Part 2: Proposal

iDiversicons requests the addition of some new emoji to the Emoticons or Miscellaneous Symbols and Pictographs block. The submitted emoji from iDiversicons are listed in [Chart 3](#). From these submissions, there are 47 unique emoji that are tentatively decided as suitable to be proposed for addition. These 47 emoji are listed in [Chart 4](#).

Proposed Characters

There are 47 emoji characters proposed below. Those with “?” as code point are characters that the authors could not decide about their code point allocation and would like opinion of the committee on that subject.

Code point	Image	iDiversicons suggested name	Recommended Unicode name	Notes
U+1F3F8		lawyer	office worker	
U+1F3F9		businessman	person holding briefcase	

?		rosary beads		
?		buddha		
?		new year celebration		
?		cinco de mayo		
?		halloween celebration		
U+1F45C		unicorn		
U+1F4FF		hand holding smartphone
