Korea JTC1/SC2, Committee on Character Codes

Date: 2014.09.24.

Source: Korea

Status: NB position

Subject: A preliminary proposal requesting a horizontal extension of 152 Hanja chars

Relevant documents: IRG N1805 (= K 2095), IRG N1857 (= K2147)

- Rep. of KOREA requests a horizontal extension of the following 152 Hanja characters, which are extracted thanks to the research project carried out by the National Institute of the Korean Language in 2011 (the main contribution by PYO Seungju, SIN Sang-hyun, and KIM Kyongsok)

- The source of these characters is KS X 1027-5.

- ROK finalized the text for KS X 1027-5 (This new source will be named "K6") which accommodates these 152 Hanja characters. KS X 1027-5 is expected to become a KS by the end of Dec. 2014. See attachment IRG N2034_2 (= K2244_2).

- ROK will appreciate if member bodies would make comments/ feedback.

- **Note. Rows #051, #120, and #140 are blank lines.**
