Subject: Inter-racial mixed marriage emoji

Date:1/12/2014

There is a lot of mixed marriages in the North America, Europe and South America, South Africa, which lacks meta communication representation that why we i want Unicode to include inter-racial emoji of African man and European woman in love; African woman and light skinned man in love. Many diasporas African marry light skinned lovers but lacks cyber-visual explanation of their love one through unavailable emoji during conversation on instant messengers both on mobile and PC.

I am aware of this esteemed organization drive for racial diverse emoji with racial skin tone and colors for all the major race of the world.
