These are based on suggestions by Jeremy Burge from Emojipedia.org, and I propose that Unicode accept these changes.

See also Recommended Unicode Glyph / Nameslist changes

U+1F624 ( 😃 ) FACE WITH LOOK OF TRIUMPH
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f624
  a. Fix glyph to appear like it is winning, not angry / fed up.
  b. Is there an language issue in the naming of this as a winning/triumphant, but the glyph (and common usage of this) displaying what appears to be extreme frustration or being fed up.

U+1F626 ( 😞 ) FROWNING FACE WITH OPEN MOUTH
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f626
  a. Fix glyph to appear less shocked, and more frowning.
  b. A frown with an ‘open mouth’ is difficult to achieve. Twitter achieves a clearer version of this than the glyph.

U+1F633 ( 🧄 ) FLUSHED FACE
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f633
  a. Fix glyph to appear with eyes open, and a straight mouth, to clarify embarrassment more clearly. Use 1F610 (Neutral Face) and add shading for red cheeks to achieve this.
  b. This emoji is difficult to use at present due to the wide variety of implementations: Apple (alarmed), Google (resigned), or Microsoft (happy go lucky, but with sheepish eyes)

U+1F483 ( 🎉 ) DANCER
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f483
  a. Fix glyph to use a woman instead of a man dancing.
  b. Apple’s dancing woman image has become very iconic, and seems to imply a different meaning to the disco-dancing man.
  c. A gender-neutral image like Android or Windows might be a noble goal, but it removes some aspect of how this is used. Generally as “let’s party” or “let’s forget our worries and have a good time”.
  d. Add to nameslist annotation: “party” or “partying”

Mark: I agree that it takes a lot of the flavor out of this to make it gender neutral. Perhaps add another dancer so that we can have both genders?
U+1F48F (吻) KISS
U+1F491 (❤️) COUPLE WITH HEART
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f48f
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f491
  a. Make the glyph be gender-neutral using smiley faces.

U+1F47B (👻) GHOST
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f47b
  a. Fix glyph to use an identifiable face on the ghost.
  b. Commonly used for Halloween, and light-hearted matters. The glyph at present is a scarier-looking ghost than most interpretations.

U+1F33B (🌻) SUNFLOWER
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f33b
  a. Fix glyph to include stem and leaves on the sunflower.
  b. This is how sunflowers are generally drawn, the leaves being an important part of identification. Apple, Windows and Twitter are good examples.

U+1F335 (🌵) CACTUS
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f335
  a. Fix glyph of cactus to use three-prong cactus (Saguaro), easily identifiable by more people.
  b. All platforms already use this style.

U+1F35C (🍲) STEAMING BOWL
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f35c
  a. Fix glyph to tilt the bowl to show that the contents are food, and not beverage.
  b. Makes this distinct from 1F375 Teacup Without Handle.

U+1F373 (🍳) COOKING
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f373
  a. Fix glyph to use top-down image of frypan with egg.
  b. Current glyph is difficult to see.

U+1F69C (🚜) TRACTOR
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f69c
  a. Fix glyph to appear like a modern tractor, without a driver. See the vendor glyphs from the link.
a. Fix glyph to flip horizontal orientation of phone receiver.
b. Receiver faces left at present, whereas all platforms except Android show this the opposite way.

---

U+1F4DC (_scroll) SCROLL
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f4dc

a. Fix glyph to show as a traditional scroll with a roll at the top and bottom, like the Apple or Twitter images.

---

U+1F4B1 (_currency exchange) CURRENCY EXCHANGE
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f4b1

a. Fix glyph to appear more similar to iOS, Windows, or Twitter versions with an arrow pointing between currencies. This shows an exchange, whereas the current glyph looks like “multiple currencies” or “money” without any indication of exchange.

---

U+1F4E7 (_email symbol) E-MAIL SYMBOL
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f4e7

a. Consider using a glyph of an envelope with @ symbol on it, instead of the letter E. Like Google uses in the Android image, or Windows uses. Few people would equate “E” with email more than than @ symbol.

---

U+1F621 (-widgets) POUTING FACE
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f621

U+1F63E (widgets) POUTING CAT FACE
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f63e

U+1F64E (widgets) PERSON WITH POUTING FACE
http://www.unicode.org/Public/emoji/1.0/full-emoji-list.html#1f64e

a. If changes are made from L2/15-015R to make the pouting face look less furious and more pouting, make sure the others are aligned.
