Subject: Hentaigana List after Matsue discussion

Attached file is a new list of Hentaigana after Matsue discussion.

After the discussion, 13 Hentaiganas are unified and total proposed code positions of hentaigana became 286.

As we mentioned in our original proposal, it is appropriate for Hentaigana to identify it by the pair of its "mother ideograph" and "phonetic value" rather than sample glyph image.

So, the "character name" in attached file consists of phonetic value , variation number and information of mother ideograph. As shown in the format, we are thinking that phonetic value and variation number should be normative and mother ideograph information may be informative. We are expecting this "character names" will appear as they are on the list in ISO/IEC 10646.

The order (positions in the list) of unified Hentaiganas and order of phonetic value in each character name will be another important points. The orders in attached excel file reflects the consensus of Hentaigana experts in Japan.

"old #" and "unified old#" on the attached excel file have same values in the original proposal document used in Matsue meeting.

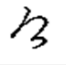

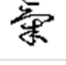

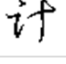

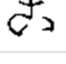

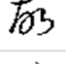

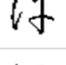

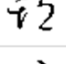

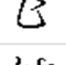

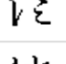

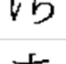

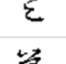

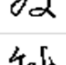

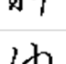

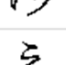

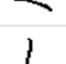

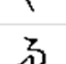

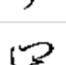

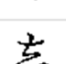

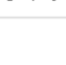

"Tentative UCS" and "source ID" are just for our internal reference.

Best regards,
Shuichi Tashiro
