Subject: Suggestions on some Al-Dani Quranic Marks proposition
Date: 5 September 2016

In this circumstance, we feel it is important to begin by recalling that in Unicode, for any encoded character, only his Codepoint and his Name that are standardized. However, Unicode provides a range of other information on its form, its use, the relationship with the other characters, etc. In fact, the presented glyph/shape of encoded character is only indicative. So, other calligraphic variations could be used for the same character, during display through used font.

After reviewing all documents of Reference about what is named Al-Dani Quranic Marks proposition [5,6,7], we suggest that:

1. all the marks in the Table 1, proposed in [5,6,7], should be encoded, as it was recommended in [1,3].
2. the mark in the Table 2, proposed differently in [5,6,7], should be encoded, as it is a legitimate character, not exactly as it was recommended in [1,3].
3. all the marks in the Table 3, proposed in [5,6,7], should not be encoded, as it was recommended in [1,3]. Indeed, they are a simply typographic variant of the already existing ones. They are either single or sequence combination. As they do not represent any new semantics, a specific font could offer them.
4. all the marks in the Table 4, proposed in [5,6,7], should not be encoded, as they do not represent any new semantics. Indeed, they are a calligraphic mistakes or diligences of the scripiter.

Some arguments are presented in Comment columns.

Table 1: New marks suggested to be encoded [1,3]

Proposed Shape	Proposed Names	Comments
	ARABIC ALTERNATE SIGN OF WAQAF [5] ALDANI ARABIC SIGN OF WAQAF [6]	<p>We need to encode it [1,3]. We suggest it with the name: ARABIC SIGN WAQF or ARABIC STOP SIGN.</p> <p>There is a relation with:</p> <p>U+06D6  ARABIC SMALL HIGH LIGATURE SAD WITH LAM WITH ALEF MAKSURA</p> <p>U+08DF  ARABIC SMALL HIGH WORD WAQFA</p> <p>However, semantically, there is no relation with Wasla without the Alef, not as [3], of:</p> <p>U+0671  ARABIC LETTER ALEF WASLA</p> <p>U+0610  ARABIC SIGN SALLALLAHOU ALAYHE WASSALLAM</p> <p>U+08E1  ARABIC SMALL HIGH SIGN SAFHA</p>
	ARABIC SMALL WAW BELOW [5]	<p>We need to encode it at least for  [6][1,3]. We suggest it with the name: ARABIC SMALL WAW BELOW [5].</p> <p>There is a relation with:</p> <p>U+08F3  ARABIC SMALL WAW ABOVE</p>

Table 2: New mark suggested to be encoded

Proposed Shape	Proposed Names	Comments
		<p>We need to encode it at least for  [6] and for  [5].</p> <p>In that case, we will be able to use it in others situations (ex. without diacritic or combined it with other diacritics and/or others letters). We suggest it with the name: ARABIC SMALL HIGH ALEF MAKSURA.</p> <p>There is a relation with:</p> <p>U+0649  ARABIC LETTER ALEF MAKSURA</p>

Table 3: Variant marks already encoded

Proposed Shape	Proposed Names	Comments
	ARABIC ALTERNATE DAMMA [5] ALDANI ARABIC DAMMA [6]	No new semantic, it is a simple variant of U+064F 
	ALDANI ARABIC DAMMATAN IN CASE OF ETHHAR [6]	No new semantic, it is a simple variant of U+064C 
	ARABIC ALTERNATE DAMMATAN 1 [5] ALDANI ARABIC DAMMATAN IN CASE OF EDGAHM AND EKHFA [6]	No new semantic, it is a simple variant of U+08F1  ARABIC OPEN DAMMATAN (=ARABIC SUCCESSIVE DAMMATAN)
	ARABIC ALTERNATE DAMMATAN 2 [5] ALDANI ARABIC DAMMATAN IN CASE OF EQLAB [6]	It could be a simple variant of a combination of U+064F  ARABIC DAMMA and U+06E2  ARABIC SMALL HIGH MEEM ISOLATED FORM (However, 06D8  ARABIC SMALL HIGH MEEM INITIAL FORM is used for another meaning)
	ARABIC ALTERNATE FATHATAN [5] ALDANI ARABIC FATHATAN IN CASE OF EQLAB [6]	It could be a simple variant of a combination of U+064E  ARABIC FATHA and U+06E2  ARABIC SMALL HIGH MEEM ISOLATED FORM (However,  U+06D8 ARABIC SMALL HIGH MEEM INITIAL FORM is used for another meaning)
	ARABIC ALTERNATE KASRATAN [5] ALDANI ARABIC KASRATAN IN CASE OF EQLAB [6]	It could be a simple variant of a combination of U+0650  ARABIC KASRA and U+06ED  ARABIC SMALL LOW MEEM
	ALDANI ARABIC LETTER ALEF KHINGARIH [6]	No new semantic, it is a simple variant of U+0670  ARABIC LETTER SUPERScript ALEF
	ALDANI ARABIC LETTER NOON WITH SMALL HIGH YEH WITH FATHA ABOVE [6]	It could be a simple variant of a combination of U+0646  ARABIC LETTER NOON and U+064E  ARABIC FATHA and  ARABIC SMALL HIGH ALEF MAKSURA the new future mark suggested in Table 2.

	ARABIC SMALL HIGH YEH WITH FATHA ABOVE [5]	It could be a simple variant of a combination of U+064E ARABIC FATHA and U+0647 ARABIC LETTER HEH and U+064F ARABIC DAMMA and U+0648 ARABIC SMALL HIGH ALEF MAKSURA the new future mark suggested in Table 2. Not exactly as it is recommended in [1].
	ALDANI ARABIC LETTER HAH WITH DAMMA ABOVE AND SMALL WAW BELOW [6]	It could be a simple variant of a combination of U+0647 ARABIC LETTER HEH and U+064F ARABIC DAMMA and U+0649 ARABIC SMALL WAW BELOW the new future mark suggested in Table 1
	ALDANI ARABIC LETTER YEH WITH HIGH YEH MAQUSA ABOVE [6]	After ligature, it could be a simple variant of a combination of U+064A ARABIC LETTER YEH and U+06E7 ARABIC SMALL HIGH YEH
	ARABIC SMALL WAW INSIDE TATWEEL [5] ALDANI ARABIC SMALL WAW INSIDE TATWEEL [6]	It could be a simple variant of a combination of U+0640 ARABIC TATWEEL and U+08F3 SMALL WAW ABOVE
	ARABIC HAMZA INSIDE TATWEEL [5] ALDANI ARABIC HAMZA INSIDE TATWEEL [6]	It could be a simple variant of a combination of U+0640 ARABIC TATWEEL and U+0654 ARABIC HAMZA ABOVE

Table 4: Alternative calligraphic marks choice

Proposed Shape	Proposed Names	Comments
	ARABIC LETTER ALEF MOKHASES [5] ALDANI ARABIC LETTER ALEF MOKHASES [6]	No new semantic, it is a simple variant of U+0670 ARABIC LETTER SUPERSCRIPT ALEF Surely it is a calligrapher diligence of used for letters of small length, as Seen and Ain, in order to fill the space. Although it is important to reproduce a rendering as close to the accustomed people, it is not permitted to use two different marks with same semantic in quranic script.
	ARABIC LETTER ALEF MOKHASES WITH MADDAH ABOVE [5] ALDANI ARABIC LETTER ALEF MOKHASES WITH MADDAH ABOVE [6]	It could be a simple variant of a combination of U+0653 ARABIC MADDAH ABOVE (or U+06E4 ARABIC SMALL HIGH

		MADDA) and U+0670  ARABIC LETTER SUPERSCRIPT ALEF
و	ALDANI ARABIC LETTER SAD WITH OUT SENNA [6]	In all calligraphic styles, the letters SAD and DAD must have the SENNA. The unique shown example at [6] is only a scripeter mistake. It is a little as [5], but not as [1,3]. There is a relation with: U+0635  ARABIC LETTER SAD
ظ	ALDANI ARABIC LETTER DAD WITH OUT SENNA [6]	In all calligraphic styles, the letters SAD and DAD must have the SENNA. The shown example at [6] of DAD have a SUNNA (See Figures 1 and 2). It is little as [5], but not as [1,3]. There is a relation with: U+0636  ARABIC LETTER DAD
ن ○	ARABIC LETTER HIGH YEH MAQUSA WITH DOT ABOVE [5] ALDANI ARABIC LETTER HIGH YEH MAQUSA WITH DOT ABOVE [6]	It could be a simple variant [1] of U+06E8  ARABIC SMALL HIGH NOON

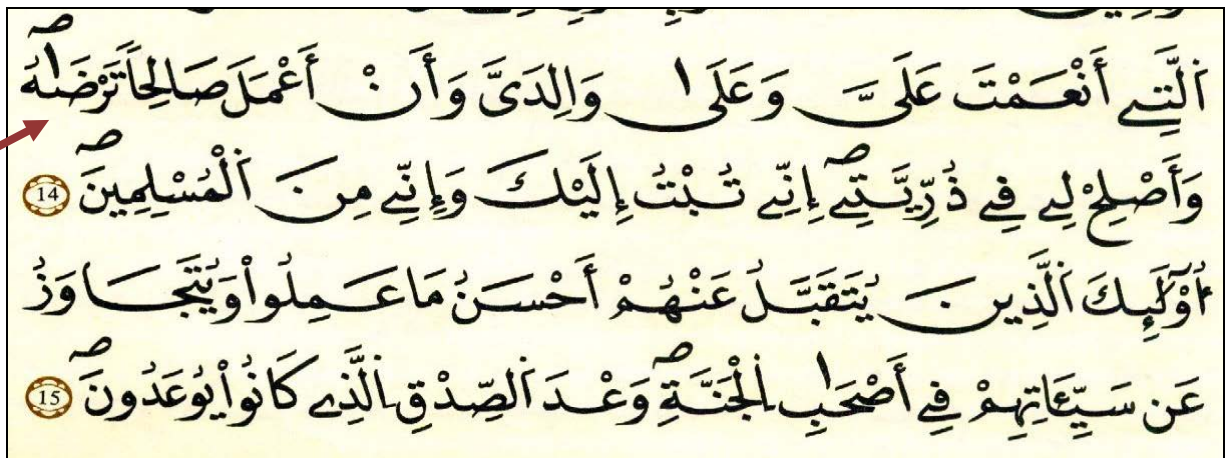

Figure 1: Part of Figure 7 of [6] without red rounded of DAD

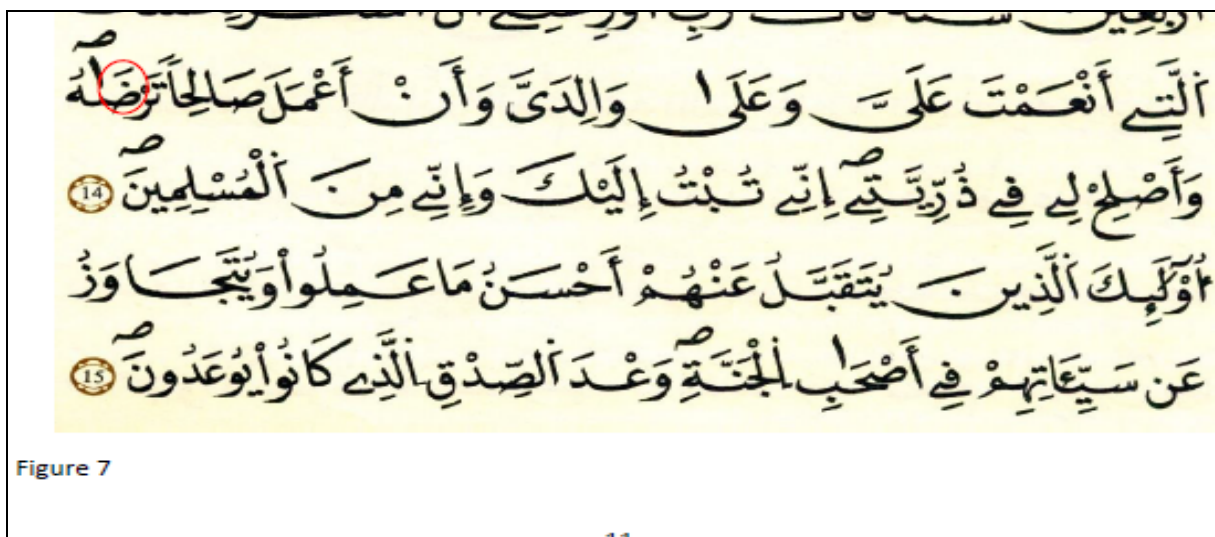

Figure 2: Part of Figure 7 of [6]

Note:

For the others marks, we are still working at it. However, they need more surveys, investigations and consultations, which requires more time.
