

ESC comments on PRI 330 feedback

To: UTC
From: Emoji Subcommittee
Date: 2016-11-06

Comments on <http://www.unicode.org/review/pri330/feedback.html> ;
the items that may need discussion are: 1, 6, and 8; we think the others do not or are covered by other agenda items.

1. Aug 11 Roozbeh feedback:
 - a. emoji presentation and variation selectors in sequences, discuss in meeting
 - i. Limit sequences to non-component chars
 - b. UN flag, review note for meeting
2. Aug 12 Gender feedback (E, Buff):
 - a. Gender options for PREGNANT WOMAN, BRIDE WITH VEIL, MAN IN TUXEDO and MAN IN BUSINESS SUIT LEVITATING, MAN WITH GUA PI MAO
 - b. Non-binary and/or neutral options for professions, other people
 - c. Paul Hunt has prepared an individual contribution [L2/16-317](#). This involves both 3 new gender-nonspecific people characters to add, as well as additional data updates to consider for a future version of emoji data (including emoji-fying an additional symbol).
3. Aug 15 Overington: we do say a ZWJ image has to be a sensible visual ligature of elements
4. Aug 19 Stomps: This is fixed in the [draft beta version](#)
5. Aug 12 Päper: There is no need to assign similar properties to similar characters
6. Aug 25 Burge: Partly fixed, the current annotation is “people/men/women with bunny ears partying” (to address completely we would remove the “partyng” aspect to an annotation). Can forward UTC recommendation to CLDR
7. Aug 26 Burge: Fixed, current names are “man/woman wearing turban”
8. Aug 26 Päper: Typos noted; will clarify the language about presentation of ZWJ sequences. **TODO**
9. Aug 28 - Sep 28 Dunn, TL, Brown: Gender issues (non-binary, pregnant man) - See b.iii
10. Oct 11 O’Toole: We already have 2 shrimp, U+1F990 is the animal without breeding (Unicode 9), U+1F364 is fried shrimp with breeding.
11. Oct 19 Miyamura: Yellow reminder ribbon (and by extension other colors). Does not have a proposal.
12. Oct 21 Ewell: There are documents about flags in the registry.
13. Oct 24 Overington: Possible clarification, emoji *can* include abstract symbols.
14. Oct 31 Edberg: Turn into a doc, add to registry: done. [L2/16-332](#)
15. Oct 31 Davis: Turn into doc, add to registry: done.
