Proposal for New OYSTER Emoji

Submitter: Fred Benenson ([Emoji Dick](https://www.emojidick.com) and [How to Speak Emojis](https://www.emojispeak.com))
Date: March 31st 2018

Abstract

This proposal is to request inclusion of a new emoji as a Unicode character: OYSTER emoji. Oysters are common food items across all cuisines and cultures. This proposal represents a unique opportunity to broaden the set of food emojis by including a universally well known and well loved delicacy.

---

1 [Brad Ellis](https://www.bradellis.com) (a fellow oyster enthusiast) created this image specifically for this proposal but the proposer encourages any software vendor to use it in their platform as it has been released into the public domain under the CC0 dedication.
Introduction

The oyster is a staple of human cuisines around the world, and oyster middens are some of the best evidence we have of early human civilizations depending on local diets.

Today, oysters are enjoyed as local delicacies in almost every country with coasts – they are hearty creatures that can survive in polluted water and provide valuable filtering for ecosystems. They provide a renewable source of protein at low environmental cost, and run the gamut in terms of culinary appeal – everything from fast food fish shacks to the most sophisticated restaurants offer them on their menu.

Several usages, meanings and idioms exist around oysters:

- Oysters & champagne: decadent seafood related celebration
- “The world is your oyster” - Shakespeare

Adding OYSTER to the Unicode emoji set would unquestionably contribute to our shared visual language. It’s inclusion represents an opportunity to highlight and celebrate a unique culinary item that is shared by virtually every civilization.

Names

CLDR Short Name: Oyster
CLDR Keywords: Oyster, mollusk, half-shell, shellfish
Selection Factors: Inclusion

Compatibility

This is a new emoji for inclusion in Unicode and then other systems. It will contribute to the various phrases and usages defined below.

Currently the Line app (see below) has an Oyster emoji in the form of a sticker, and Facebook has offered “Sinister Oyster” stickers since 2014.

Expected Usage Level

Evidence of Frequency

It’s the proposer’s expectation that the oyster emoji will have high and widespread global use.

The results for “oyster” compared to “hamburger” across are as follows: Google (31.5 vs. 48.2 million), Bing (34.5 vs. 39.3 million), YouTube (1.84 vs. 3.93 million), Google Trends (~75 out of 100) and Google Trends Image Search (~75 out of 100).

Google Web Search

![Google search results for hamburger and oyster](image)
Google Trends (Web Search)

Compared to the reference emoji of “hamburger” Oyster does notably well, and having closed a gap in 2013, now has just slightly less interest over time:
Oysters have seen gradual increase in interest over the last decades, but their relative high interest in the UK is likely due to focus around the Oyster metrocard in the UK.

It is worth noting, however, that oyster ranks well in non-US countries such as South Africa, Singapore and Australia.
Comparatively speaking, Oyster has been trending far better than other search terms such as “fried shrimp”, octopus\(^2\), prawn, and squid — all shellfish that already have their own emoji:

As can be seen from the Frequently Requested section below, people are using the phrase “oyster emoji” typed in full on social networks like Twitter and would certainly use the emoji if available.

\(^2\) With the exception of a 2009 spike for the term “octopus” which is likely correlated with the release of the monster film “Mega Shark Versus Giant Octopus”
Multiple Usages

Aside from the obvious literal interpretations (as food items), oysters can be used in a number of contexts:

- Oysters have been scientifically established as aphrodisiacs and thus have light sexual connotations
- Oysters are ugly things that make something beautiful (pearls)
- Oyster mushroom (a delectable culinary treat in its own right, easily derived with the mushroom emoji)
- Mother of Pearl and Oyster White (popular paint colors)
- Oyster card in UK
- A prairie oyster (or prairie cocktail) is a drink consisting of a raw egg, Worcestershire sauce, tomato juice, vinegar, hot sauce, salt and ground black pepper. The drink is typically served as a hangover cure.
- Rocky Mountain oysters: food made from animal testicles
- “As dumb as an oyster”

Use in Sequences

The oyster emoji is a singular item and will work effectively by itself (i.e., it does not need any ZWJ modifiers).

Image Distinctiveness

Due to its unique shell formation, the oyster emoji is a highly distinctive visual symbol which will be recognizable by virtually any owner of a smartphone.

Completeness

This will continue build out commonplace and daily items in the Nature part of emoji. It is not a direct part of a series such as Zodiac symbols.
Frequently Requested

In a 2015 article, Emoji LINE, a brand publisher, posted a BuzzFeed article with the subtitle “The world is your [oyster emoji]” despite not having an official Unicode oyster emoji:

These Are The 31 Emoji You Should Be Using Right Now

The world is your [oyster emoji].

Posted on June 18, 2015, at 3:23 p.m.

Line does, however, include an oyster emoji in their in-app set:

9. The Oyster Emoji

Use it to say: "I can do anything."
Facebook has a “Sinister Oyster” sticker set published in 2014:

**21 Reasons Facebook's Sinister Oysters Are The Best Thing On The Internet**

No other emoticon understands how socially awkward you can be.

Replying to @Sarah...mel
Is there the closest thing to an oyster emoji
Counterarguments to Factors for Exclusion

Overly Specific
The oyster emoji is not overly specific and can be used in a number of contexts through its use in numerous phrases, ideas, and concepts.

It can be used to represent food (oysters), as an analogy (beauty in nature, rarity), or as an metaphor (“The world is your oyster.”)

Open Ended
The oyster is not one just one of many items within a set; it is distinct and doesn’t open up a direct open-ended set of related symbols.

Already Representable
The oyster emoji cannot be easily representable given current emoji. The closest option to an oyster emoji might be 🦀 (Spiral Shell Emoji) but neither can properly substitute for a food item.

Transient
Oysters are not transient symbols in culture, and oysters have been part of human diets since the dawn of time.

Logos, brands, UI icons, signage, specific people, deities
The oyster emoji has only coincidental associations with any specific logos, brands, UI, icons, signage, people or deities. The only realistic comparison might be to the Oyster Card in the UK, but this is likely to increase its usage – since the Oyster Card is commonplace in civic life in London.

Generally, oysters are commonplace items that are universally recognizable and unlikely to be associated with any particular stigma or brand.

Faulty Comparison
The submission for the oyster emoji is one made on its own merits; in line with the Unicode selection factors for inclusion (above) and that it avoids the factors for exclusion (also above).
No case is made that the oyster emoji should be included due to other emojis; emoji patterns; or due to comparison to others.

**Sort location**

**Category**
The proposer suggests the oyster emoji be inserted next to the Food & Drink category.

**Emoji Before**
Ideally the oyster emoji would appear next to the fried shrimp emoji.

**In Situ**
Here is the emoji placed next to “fried shrimp” emoji in macOS's emoji chooser:
Other Information

Resubmitting A Year Later

Since proposer’s previous proposal for OYSTER WITH PEARL⁴, proposer has received significant interest in the opportunity to create an oyster emoji.

In a show of support, an organization proposer is a board member on wrote a piece titled “Reconsider the Oyster”⁵. In it, Lauren Studebaker makes the argument that:

*The oyster emoji’s appearance reflects the emergence of a population of new urban creatives that are building a shared visual culture through digital conviviality...*

In an unsolicited letter an engineer named Deryck Chan wrote to proposer noting that the oyster featured in my past submission was actually a pearl clam, not a food oyster:

"Oyster" emoji submission

Dear Mr. Benenson,

However, I believe your submission has conflated two very different uses of the human language concept of an "oyster". The submission proposes to use a single emoji to represent both a "pearl-producing shell" and a "food oyster". A comparison between the graphic you provided in page 1 of your submission and the LINE oyster emoji shows significant differences; your submission is actually a pearl clam, not an oyster.

I believe oyster enthusiasts around the world would greatly appreciate if you would revise your submission into a submission for a pearl clam using the graphic you have currently proposed, and a new food oyster emoji based on e.g. the LINE oyster emoji.

Best regards,
Deryck Chan
Department of Engineering, University of Cambridge, U.K.
(Personal food blog here: [https://www.instagram.com/deryckchan/](https://www.instagram.com/deryckchan/) )
(Work website here: [https://www-geo.eng.cam.ac.uk/directory/deryck-chan](https://www-geo.eng.cam.ac.uk/directory/deryck-chan)

This friendly correction is a good indication that there is ambient awareness and demand for OYSTER emoji and that it’s time has come.

Oysters are Not Clams

It is important, as Deryck Chan pointed out, that the OYSTER emoji not be confused with clam or any other mollusk.

Particular attention should be paid to the shape of the shell, and as it is a food item, it should be open and look appealing to eat.
