

To: Unicode Technical Committee
From: Moses Ekpenyong, and Eno-Abasi Urua, Andrij Rovenchak (via Debbie Anderson)
Subject: Medefaidrin corrections for 11.0
Date: 11 April 2018

Debbie Anderson and Andrij Rovenchak received feedback from the experts M. Ekpenyong and Eno-Abasi Urua on the 11.0 beta charts and names list for Medefaidrin.

The following errors and comments were submitted:

Code point	Current name:	Recommended change:
16E56	MEDEFAIDRIN CAPITAL LETTER HP	MEDEFAIDRIN CAPITAL LETTER H
16E76	MEDEFAIDRIN SMALL LETTER HP	MEDEFAIDRIN SMALL LETTER H
16E57	MEDEFAIDRIN CAPITAL LETTER NY	MEDEFAIDRIN CAPITAL LETTER NG
16E77	MEDEFAIDRIN SMALL LETTER NY	MEDEFAIDRIN SMALL LETTER NG
16E5A	MEDEFAIDRIN CAPITAL LETTER OE	MEDEFAIDRIN CAPITAL LETTER OO (or OH?)
16E7A	MEDEFAIDRIN SMALL LETTER OE	MEDEFAIDRIN SMALL LETTER OO (or OH?)
16E99	MEDEFAIDRIN SYMBOL AIVA	MEDEFAIDRIN SYMBOL OR

Comments:

1. Evidence for H instead of HP and NG in place of NY is provided below (from proposal: <https://www.unicode.org/L2/L2015/15117r2-medefaidrin.pdf>)
2. The current “MEDEFAIDRIN LETTER OE” is meant to represent an open o (o). If “OE” is the usual Unicode representation for an open o, the name as it stands (OE) is fine.
3. The glyphs for 16E56 MEDEFAIDRIN CAPITAL LETTER HP [sic] and 16E6B MEDEFAIDRIN SMALL LETTER I need slight modification (see below)

Examples of H, HG and open O (from proposal: <https://www.unicode.org/L2/L2015/15117r2-medefaidrin.pdf>)
