

Re: ESC Recommendations for 2018Q2 UTC

From: ESC

Date: 2018-05-01

The following are the ESC recommendations for the set of draft candidates for Emoji 12.0 / Unicode 12.0.

1. Some of the characters are different from what was in the original proposal, and marked with comments.
2. Some do not have positive recommendations (“Neutral” — the character was borderline in terms of statistics for expected usage.)
3. The Emoji Count is greater than the Char Count when the emoji is expected to take skin-tones and/or gender.
4. The images are largely taken from the proposals. They are only illustrative, and not reflective of the quality of images that would be used by vendors. They are approximately the same resolution as typically used on phones, but higher resolution than would typically appear on laptops. The size, however, is typically smaller, so zoom out on the page with your phone nearby to see what they would look like at emoji sizes.
5. For details, see the [proposals](#).

The ESC will have recommendations for RGI sequences for Emoji 12.0 / Unicode 12.0, but will present those in the 2018Q3 UTC meeting, since they do not need to be decided in the 2018Q2 meeting.
