

Tamil SHRII Conjunct – comment

N. Ganesan

April 30, 2018

Named sequences for Tamil clearly states how SHRII conjunct has to be formed in Tamil fonts,
<http://www.unicode.org/Public/UCD/latest/ucd/NamedSequences.txt>
 TAMIL SYLLABLE SHRII; 0BB6 0BCD 0BB0 0BC0

The base letter, SHA in SHRII conjunct is evident:

This formation of SHRII conjunct in Tamil script can be shown in the Tamil section of the Unicode Standard. Also, a statement like the one below will make the font developers become aware of the correct sequence to use for SHRII conjunct in Tamil. The statement is:

It is encouraged to use TAMIL SYLLABLE SHRII; <0BB6 0BCD 0BB0 0BC0> for Tamil SHRII conjunct in input editors. <0BB8 0BCD 0BB0 0BC0> sequence for Tamil SHRII is deprecated.

Thanks,

N. Ganesan
