Doc Type:	**Working Group Document**
Title:	**Updated proposal on Gongche characters for Kunqu Opera**
Source:	**Eiso Chan(陈永聪), Jerry You(游程宇),**
	Wang Xiaolei(王晓磊), Hou Le(侯乐)
Status:	**Individual Contribution to WG2 #67, London, UK**
Action:	**For consideration by JTC1/SC2/WG2 and UTC**
Date:	**2018-06-01**
References:	**L2/17-087, L2/17-103, L2/18-189, IRGN2299, IRGN2290, IRGN2293**

We submitted the proposal called "*Proposal to encode characters for Gongche Notation in SMP*" (aka L2/17-087) to UTC last year. That document had been discussed in UTC #151, please see 151-A79 and 151-A80 in the minutes (aka L2/17-103).

> **E.5 Proposal to encode characters for Gongche Notation in SMP [Chan, et al, L2/17-087]**
>
> **[151-A79] Action Item for** John Jenkins: Add the seven Gongche characters in L2/17-087 with a "tiny slash downwards" to UAX #45.
>
> **[151-A80] Action Item for** Ken Lunde: Respond to submitter of L2/17-087 with UTC disposition.

For 151-A79, John has added these seven characters to UAX #45 as UTC-03160 through UTC-03166, and they will be included in the Version 11. Please also see Section 4 in this document. And then, Eiso submitted the document called "*Request to discuss how to handle seven unencoded Gongche characters for Kunqu Opera*" (aka IRGN2299) to IRG. IRGN2299 has been discussed in IRG #50 in Beijing, China. After the discussion, IRG thought these seven Gongche characters were not suitable to encode as the CJK Unified Ideographs. Please see IRG M50.8 in IRGN2290 (aka L2/18-189) and Section 13 in IRGN2293.

> **[IRGN2290]**
>
> **Recommendation IRG M50.8: Encoding of Gongche Characters**
> **(IRGN2299, IRGN2293)**
>
> **Unanimous**
>
> IRG reviewed IRGN2299 and considers Gongche symbols are for music notations and should not be included in CJK unified ideograph blocks (IRGN2293).

13. Encoding of Gongche Characters

Reference:

- IRGN2299: Request to discuss how to handle seven unencoded Gongche characters for Kunqu Opera

The editors acknowledged the needs of these characters. The editor considered these characters to be symbols for musical notations and should not be in the CJK Unified Ideographs blocks.

This document provides the explanations and evidences of seven unencoded Gongche characters. As we know, the differences between these seven characters and the common ideographs are obvious, but there are so many Gongche characters which has been included in ISO/IEC 10646 and Unicode as CJK Unified Ideographs.

I request WG2 and UTC to encode these seven Gongche characters separately as non-CJKUI and create a new block called **Gongche**, if IRG's recommendation M50.8 been accepted.

On the other hand, there are also seven characters which are "合", "四", "一", "上", "尺", "工", "凡" with double tiny slashes downward shown in Figs. 3 & 4. Mr. Wang Xiaolei, Ms. Hou Le and I have checked so many books on Gongche notation. We can confirm those characters are uncommon, so there is no need to encode them at present.

Those seven characters which are "合", "四", "一", "上", "尺", "工", "凡" with double tiny slashes downward are theoretical Gongche characters. If any expert concerns with those ones, we think the better way is to make the **Gongche** block contain 32 characters.

1. Introduction

Gongche notation (工尺谱/工尺譜) is a traditional musical notation method, once popular in ancient China, and now it's also used in Chinese local operas, especially Kunqu Opera (昆曲/崑曲), Peking Opera (京剧/京劇), Yueju Opera (粤剧/粤劇) and so on. It uses the characters like Chinese ideographs to represent musical notes. It was named after two of the Chinese ideographs that were used to represent musical notes, namely "工" gōng and "尺" chě.

Many characters for Gongche Notation have the same appearances with Chinese ideographs exactly, so the vast majority of them could be used isomorphic ideographs to indicate. Hong Kong SARG once submitted two ideographs which are just used in the lyrics of Yueju Opera as UNCs in IRGN1405R. Please see Fig. 1. And UTC has submitted other two ideographs which are used in the lyrics of Kunqu Opera and traditional Gongche Notation to WS2017. Please see Fig. 2.

Fig. 1 H-87D2 & H-87D6 in IRGN1405R

| 2 | 伋 | II-87D2 | 0365.211 | 彳 | 4 | 囗彳尺 | Chinese character used in the lyrics of Cantonese opera (粵曲曲譜子符). Sample is shown in Annex III.

Cantonese opera is regarded as a cultural heritage of the People's Republic of China (see http://www.gov.cn/zwgk/2006-06/02/content_297946.htm). |
| 3 | 伍 | H-87D6 | 0365.211 | 彳 | 4 | 囗彳五 | - Ditto - |

Fig. 2 UTC-02976(01240) & UTC-02977(01242) in WS2017

60.0 彳					仩 UTC-02976
囗彳上					
3	6				
60.0 彳					仈 UTC-02977
囗彳凡					
3	6				

However, some characters' appearances do not conform to the general principles of writing Chinese ideographs. The end strokes of "合", "四", "一", "上", "尺", "工", "凡" are extended by a tiny slash downward.

According to Fig. 3, when these 7 characters and UTC-02976, UTC-02977 would be included in ISO/IEC 10646 and Unicode, we can get the table for Gongche Notation as below.

Table 1 Characters for Gongche Notation

N/A	N/A	N/A	N/A	合	四	一
1̤	2̤	3̤	4̤	5̤	6̤	7̤
上	尺	工	凡	合	四	一
1̣	2̣	3̣	4̣	5̣	6̣	7̣
上	尺	工	凡	六	五	乙
1	2	3	4	5	6	7
仩	伬	仜	仈	伏	伍	亿
1̇	2̇	3̇	4̇	5̇	6̇	7̇
仩	伬	仜	仈	伏	伍	亿
1̈	2̈	3̈	4̈	5̈	6̈	7̈

After the discussion in IRG #50, it looks the better way to encode them is to treat them as the non-CJKUIs. If WG2 and UTC agree with the recommendation IRG M50.8, the new block should be created and include these seven Gongche characters in it. Please see or review Sections 2 and 3.

The other way is still to encode them as CJKUI, but IRG didn't think it was really a good way for this issue. Please see Sections 4 and 5.

2. Proposed Characters as Non-Ideographs

The ordering of these seven Gongche characters is based on the original natural ordering of the musical scale.

合 ‹‹ 四 ‹‹ 亠 ‹‹ 上 ‹‹ 尺 ‹‹ 工 ‹‹ 凡

(合=5, 四=6, 亠=7, 上=1, 尺=2, 工=3, 凡=4)

There is a character like kana の(U+306E) and a character like kana の(U+306E) by a tiny slash downward in the evidences, but, in fact, they are same with 四(U+56DB) and 四 (U+56DB) by a tiny slash downward. Kana の(U+306E) looks like cursive form of 四 (U+56DB). Notice that the kana の is from 乃(U+4E43) not 四(U+56DB), and the corresponding hentaigana letter is 𛂙(U+1B099).

We can know the variant form for 凡(U+51E1) is 凢(U+51E2) by Unihan Database, and some evidences show the glyph is 凢(U+51E2) by a tiny slash downward. According to Fig. 3, 凢 (U+51E2) by a tiny slash downward and 凡(U+51E1) by a tiny slash downward are the same character.

These two characters should be normalized to be "四" and "凡". Please see Table 4 as well.

亠 can't be unified with ⏗(U+31D6) or 乛(U+4E5B).

Table 2 Proposed Gongche Characters

UCS	Representative Glyphs	Proposed Character Name	Evidence
U+19BF0	合	GONGCHE CHARACTER HE BY A TINY SLASH DOWNWARD	Fig. 3, 4, 28

工尺谱 中国音乐传统记谱法的一种。广泛用于民间歌曲、器乐曲、说唱音乐和戏曲音乐的记谱方法。近代流行的工尺谱常用"合、四、一、上、尺、工、凡、六、五、乙"作为音名和唱名记录音高，它们相当于 sol、la、si、do、re、mi、fa、sol、la、si 或简谱的 5̣、6̣、7̣、1、2、3、4、5、6、7 等音。比"乙"高的加"亻"旁，如仩(1̇)、伬(2̇)、仜(3̇)等，比"合"低的写作"上(1̣)、尺(2̣)、工(3̣)、凡(4̣)。板眼符号用"ヽ"或"×、一"、或"∟、O、●、△"等。明清以来通行的工尺谱是由唐代的"燕乐半字谱"及宋代的"俗字谱"等演变而来。

Notice that China once submitted 丄 & 凡 as G_BK100001 and G_BK100010 to CJK C1 and CJK D, but, as we know, they hadn't been included in the final version of CJK Ext. E.

A. Administrative

1. **Title:**	***Updated proposal on Gongche characters for Kunqu Opera***
2. Requester's name:	*Eiso CHAN, Jerry YOU, WANG Xiaolei and HOU Le*
3. Requester type (Member body/Liaison/Individual contribution):	*Individual contribution*
4. Submission date:	*2018-06-01*
5. Requester's reference (if applicable):	
6. Choose one of the following:	
This is a complete proposal:	*YES*
(or) More information will be provided later:	

B. Technical – General

1. Choose one of the following:	
a. This proposal is for a new script (set of characters):	*YES*
Proposed name of script:	*Gongche*
b. The proposal is for addition of character(s) to an existing block:	*NO*
Name of the existing block:	
2. Number of characters in proposal:	*7*

3. Proposed category (select one from below - see section 2.2 of P&P document):

A-Contemporary	B.1-Specialized (small collection)	X B.2-Specialized (large collection)
C-Major extinct	D-Attested extinct	E-Minor extinct
F-Archaic Hieroglyphic or Ideographic		G-Obscure or questionable usage symbols

4. Is a repertoire including character names provided?	*YES*
a. If YES, are the names in accordance with the "character naming guidelines" in Annex L of P&P document?	*YES*
b. Are the character shapes attached in a legible form suitable for review?	*YES*
5. Fonts related:	
a. Who will provide the appropriate computerized font to the Project Editor of 10646 for publishing the standard?	
Jerry YOU	
b. Identify the party granting a license for use of the font by the editors (include address, e-mail, ftp-site, etc.):	
Jerry YOU, chengyu517@hotmail.com	
6. References:	
a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?	*YES*
b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?	*YES*
7. Special encoding issues:	
Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)?	*YES*

8. Additional Information:

Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behaviour information such as line breaks, widths etc., Combining behaviour, Spacing behaviour, Directional behaviour, Default Collation behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at http://www.unicode.org for such information on other scripts. Also see Unicode Character Database (http://www.unicode.org/reports/tr44/) and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.

---

[1]. Form number: N4502-F (Original 1994-10-14; Revised 1995-01, 1995-04, 1996-04, 1996-08, 1999-03, 2001-05, 2001-09, 2003-11, 2005-01, 2005-09, 2005-10, 2007-03, 2008-05, 2009-11, 2011-03, 2012-01)

C. Technical - Justification

1. Has this proposal for addition of character(s) been submitted before? *NO*

   If YES explain

2. Has contact been made to members of the user community (for example: National Body,

   user groups of the script or characters, other experts, etc.)? *NO*

   If YES, with whom?

   If YES, available relevant documents:

3. Information on the user community for the proposed characters (for example:

   size, demographics, information technology use, or publishing use) is included? *NO*

   Reference:

4. The context of use for the proposed characters (type of use; common or rare) *Rare*

   Reference:

5. Are the proposed characters in current use by the user community? YES

   If YES, where?   Reference:

6. After giving due considerations to the principles in the P&P document must the proposed characters be entirely

   in the BMP? *NO*

   If YES, is a rationale provided?

   If YES, reference:

7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)? *YES*

8. Can any of the proposed characters be considered a presentation form of an existing

   character or character sequence? *NO*

   If YES, is a rationale for its inclusion provided?

   If YES, reference:

9. Can any of the proposed characters be encoded using a composed character sequence of either

   existing characters or other proposed characters? *NO*

   If YES, is a rationale for its inclusion provided?

   If YES, reference:

10. Can any of the proposed character(s) be considered to be similar (in appearance or function)

    to, or could be confused with, an existing character? *NO*

    If YES, is a rationale for its inclusion provided?

    If YES, reference:

11. Does the proposal include use of combining characters and/or use of composite sequences? *NO*

    If YES, is a rationale for such use provided?

    If YES, reference:

    Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided?

    If YES, reference:

12. Does the proposal contain characters with any special properties such as

    control function or similar semantics? *NO*

    If YES, describe in detail (include attachment if necessary)

13. Does the proposal contain any Ideographic compatibility characters? *NO*

    If YES, are the equivalent corresponding unified ideographic characters identified?

    If YES, reference:
