Doc Type:	Working Group Document
Title:	Proposal to add a character used in printed Glagolitic works to the UCS
Source:	Zoran Vukojević
Status:	Individual Contribution
Date:	2019-07-20

This proposal requests the encoding of a variant of the Glagolitic letter červ. If this proposal is accepted, the following characters will exist:

↓ 2C2F GLAGOLITIC CAPITAL LETTER CHERV

• used as an alternative to #2C1D Glagolitic capital letter chrivi, and used combined with 0303 \degree combining tilde or with 0483 \degree combining Cyrillic titlo as an et cetera sign.

y 2C5F GLAGOLITIC SMALL LETTER CHERV

• used as an alternative to # 2C4D Glagolitic small letter chrivi, and used combined with 0303 ^o combining tilde or with 0483 ^o combining Cyrillic titlo as an et cetera sign.

The character is used in works printed in the Glagolitic alphabet. The first dated printed book in Glagolitic is the Missal from 1483. Religious works in the Glagolitic alphabet continued to be printed until 1927 when the last Missal in the Croatian recension of Church Slavonic was printed for the use of churches in Croatia. Scholarly works on and in the Glagolitic alphabet are still being produced.

The letter červ was used in two versions, the first is already encoded in Unicode as \mathbf{P} 2C1D GLAGOLITIC CAPITAL LETTER CHRIVI and as \mathbf{P} 2C4D GLAGOLITIC SMALL LETTER CHRIVI. The second is the one proposed in this document, \mathbf{y} GLAGOLITIC CAPITAL LETTER CHERV and \mathbf{y} GLAGOLITIC SMALL LETTER CHERV. It is derived from the handwritten form of the letter. Although both variants were used to write the sound /tʃ/, the second one was used with a combining tilde or combining tillo as an *et cetera* sign. When a combining tilde or combining tillo is used with the first variant, it indicates either the numeral 1000 – refer to figure 3 where it is used in writing the year 1561 – or as an indicator of an abbreviation – refer to figure 2.

Unicode already encodes variant letter forms for Glagolitic A – Azu and Trokutasti A. Two variant letter forms for Glagolitic M are also encoded – Myslite and Latinate Myslite. It is necessary to encode the Glagolitic letter Cherv, to indicate correctly the *et cetera* sign, and to show the palaeographic variations in books between words printed with Cherv and those printed with Chrivi – refer to figure 4 for an example. The two variants cannot be unified.

As for the name Cherv, it is the name of the letter that was used during the time when the printed works were published. Refer to figure 6 for evidence of the use of the name.

1. Unicode Character Properties. Character properties are proposed here.

Figure 2. Example from Levaković. 1629:25 showing the 🋱 GLAGOLITIC SMALL LETTER CHRIVI combined with $\tilde{\circ}$ COMBINING TILDE, used in different abbreviations. The abbreviations, starting in the tenth row, are Mčk for mučenik (martyr, masculine, nominative case), Mčka for mučenika (martyr, masculine, genitive case), Mčca for mučenica (martyr, feminine, nominative case).

Figure 3. Dalmatin and Istrijan. 1561: title page showing the use of \mathbf{y} GLAGOLITIC SMALL LETTER CHERV indicated by blue arrows, and the use of $\mathbf{\hat{w}}$ GLAGOLITIC SMALL LETTER CHRIVI, indicated by red arrows, for the sound /tʃ/. The numeral 1000 is denoted by $\mathbf{\hat{w}}$ GLAGOLITIC SMALL LETTER CHRIVI combined with $\tilde{\circ}$ COMBINING TILDE, indicated by the green arrow.

A. Administrative

Title

Proposal to add a character used in printed Glagolitic works to the UCS

Requester's name

Zoran Vukojević.
Requester type (Member body/Liaison/Individual contribution)
Individual contribution.
Submission date

2019-07-20

Requester's reference (if applicable)

Choose one of the following:

This is a complete proposal

Yes.

More information will be provided later

B. Technical – General 1. Choose one of the following: 1a. This proposal is for a new script (set of characters) No. 1b. Proposed name of script 1c. The proposal is for addition of character(s) to an existing block Yes 1d. Name of the existing block Glagolitic 2. Number of characters in proposal 2.

3. Proposed category (A-Contemporary; B.1-Specialized (small collection); B.2-Specialized (large collection); C-Major extinct; D-Attested extinct; E-Minor extinct; F-Archaic Hieroglyphic or Ideographic; G-Obscure or questionable usage symbols)

Category B.1.

4a. Is a repertoire including character names provided?

Yes.

4b. If YES, are the names in accordance with the "character naming guidelines" in Annex L of P&P document?

Yes.

4c. Are the character shapes attached in a legible form suitable for review?

Yes.

5a. Who will provide the appropriate computerized font (ordered preference: True Type, or PostScript format) for publishing the standard?

Zoran Vukojević.

5b. If available now, identify source(s) for the font (include address, e-mail, ftp-site, etc.) and indicate the tools used:

Zoran Vukojević, Font Forge.

6a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?

Yes.

6b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?

Yes.

7. Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)? **Yes.**

8. Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behaviour information such as line breaks, widths etc., Combining behaviour, Spacing behaviour, Directional behaviour, Default Collation behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at http://www.unicode.org for such information on other scripts. Also see Unicode Character Database http://www.unicode.org/ Public/UNIDATA/UnicodeCharacterDatabase.html and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.

See above.

C. Technical – Justification

1. Has this proposal for addition of character(s) been submitted before? If YES, explain. No.

2a. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)?

No.

2b. If YES, with whom?

2c. If YES, available relevant documents

3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included?

Scholarly, ecclesiastical, and library communities.

4a. The context of use for the proposed characters (type of use; common or rare)

Originally used to write Old Church Slavonic, and used in parts of medieval and early modern Croatia for both secular and ecclesiastical purposes. Also used to write old and modern Croatian. 4b. Reference

5a. Are the proposed characters in current use by the user community?

Yes.

5b. If YES, where?

By scholars, churchmen, librarians, and Glagolitic enthusiasts.

6a. After giving due considerations to the principles in the P&P document must the proposed characters be entirely in the BMP?

Yes.

6b. If YES, is a rationale provided?

Yes.

6c. If YES, reference

Accordance with the Roadmap. Keep with other Glagolitic characters.

7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?

Yes, they should be encoded in a single block as presented here.

8a. Can any of the proposed characters be considered a presentation form of an existing character or character sequence?

No.

8b. If YES, is a rationale for its inclusion provided?

8c. If YES, reference

9a. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters?

No.

9b. If YES, is a rationale for its inclusion provided?

No.

9c. If YES, reference

10a. Can any of the proposed character(s) be considered to be similar (in appearance or function) to an existing character?

No.

10b. If YES, is a rationale for its inclusion provided?

10c. If YES, reference

11a. Does the proposal include use of combining characters and/or use of composite sequences (see clauses 4.12 and 4.14 in ISO/IEC 10646-1: 2000)?

No.

11b. If YES, is a rationale for such use provided?

11c. If YES, reference

11d. Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided?

11e. If YES, reference

12a. Does the proposal contain characters with any special properties such as control function or similar semantics?

No.

12b. If YES, describe in detail (include attachment if necessary)

13a. Does the proposal contain any Ideographic compatibility character(s)?

No.

13b. If YES, is the equivalent corresponding unified ideographic character(s) identified?

14a. Does the proposal contain any Ideographic compatibility character(s)?

No.

14b. If YES, is the equivalent corresponding unified ideographic character(s) identified? 14c. If YES, reference
