Universal Multiple-Octet Coded Character Set
International Organization for Standardization

The UTC and others in the US have been involved in the following activities since IRG #52 took place:

1. Work on Unicode Version 13.0 is well underway, which is scheduled to be released in early March of 2020, and which is expected to include Extension G (aka IRG Working Set 2015) in Plane 3 (aka Tertiary Ideographic Plane or TIP), along with additional CJK Unified Ideographs appended to the URO, Extension A, and Extension B. Significant Unihan-related changes include the splitting of the *kIRG_USource* property into three properties, two of which are new: *kIRG_SSource* (formerly "USAT-" prefix), *kIRG_USource* ("UTC-" prefix), and *kIRG_UKSource* (formerly "UK-" prefix). See L2/19-301 and L2/19-302 for additional Unihan changes that have been applied.

2. Unicode launched its new public website in mid-July, but still maintains a separate technical website.

3. Per Recommendation IRG M52.3, UTC experts reviewed the UTC-assigned portion of IRG Working Set 2017 Version 4.0, and submitted comments via the online review tool in early August.

4. IUC43 (*43rd Internationalization & Unicode Conference*) took place from 2019-10-16 through 2019-10-18 in Santa Clara, California, USA.

That is all.
