Title: Proposal to encode Damma over Damma used in Quran published in Tunisia

Action: For consideration by UTC and ISO/IEC JTC1/SC2/WG2

Author: Lateef Sagar Shaikh

Date: 11-Dec-2020

Introduction

Quran published in Tunisia uses a different style of Dammatan then Arabic text written elsewhere. Since the language code is Arabic therefore this transformation of Dammatan can not be handled in a font properly. Another reason is that the same text also uses Open Dammatan (U+08F1) along with this style of Dammatan therefore we can't use U+08F1 for this mark. The proposed style is used in Warsh as well as Qaloon styles of publications in Tunisia.

Requests

The author requests the encoding of Arabic Damma over Damma which is used in Quranic text written and published in Tunisia.
