## Preliminary Proposal from SAT CJK Buddhist Symbols Collection

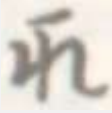

Doc. Type: Working Group Document  
 Source: SAT Daizōkyō Text Database Committee  
 Author: Wang Yifan, Dr. Kiyonori Nagasaki, Prof. Masahiro Shimoda  
 Status: Liaison Member Submission  
 Action: For consideration by ISO/IEC JTC1/SC2/WG2

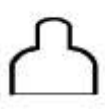

### 1. Introduction

This document proposes to add 23 non-Han-like characters in our database of the East Asian Buddhist scriptures that may not be suitable to be included in the CJK Unified Ideographs extensions. Their varied degrees of characteristics shared with CJK ideographs, attestation in the Chinese text, and tendency to have multiple variant forms more Han-compatible in appearance contribute to their unclear status under the current encoding model in UCS. Following our submission of several Han-like variants to IRG as to be a part of CJKUI (IRG N2485), and its recommendation that some of them be encoded outside CJKUI (IRG N2500, IRG N2506), we decided to defer their encoding to WG2.

### 3. Description

#1, #15, #23: Esoteric incantation syllabics found in *Shi Moheyan Lun* 釋摩訶衍論, an influential apocrypha composed between the 7–8<sup>th</sup> centuries. Names represent their pronunciation rendered in Mandarin (pinyin). Most other more Han-like syllabics that cooccur with them are encoded as CJK

Unified Ideographs.

**#2:** A character with obscure composition meaning *wàn* or *svastika*, found in *Fanyi Mingyi Ji* 翻譯名義集, an important 12<sup>th</sup> century Sanskrit-Chinese dictionary. While the glyph is considerably different among witnesses, our source is based on a 14<sup>th</sup> century manuscript titled *Hōsatsushō* 寶册鈔 which cites this passage.

**#3, #4:** Characters found in *Hōsatsushō* 寶册鈔 citing other books.

**#5, #6:** Pre-modern Japanese polysyllabic or ligatured kana letters (*gōryaku-gana* 合略仮名) for common words and phrases, used in a way similar to medieval Latin abbreviations. Although they appear in the katakana environment, those characters have been encoded in CJK Unified Ideographs blocks in UCS due to their usage in Japanese administrative systems, except one U+20FF KATAKANA DIGRAPH KOTO.

**#7, #8, #9, #10, #11, #12, #13, #14:** Riddle characters found in *Rentian Yanmu* 人天眼目 and other Chán (Zen) masters' discourse records. While technically can be equated with enclosed ideographs, they symbolize some metaphysical teachings of Chán schools, that are not directly associated with each character inside.

**#16, #22:** Non-printed variants of Zetian characters 則天文字 (characters invented by Empress Wu, who was a patron of Buddhism at the time). As attested in early inscriptions, some characters are thought to generally have rounded strokes in their original forms. Names represent their pronunciations rendered in Mandarin (pinyin).

**#17:** A character depicts *uṣṇīṣa* (Buddha's topknot) found in *Gyōrinshō* 行林抄, a 12<sup>th</sup> century esoteric ritual manual (18<sup>th</sup> century manuscript).

**#18, #19, #20, #21:** Symbols indicating elemental associations of saints, used in abstract description of mandala.

**C. Technical - Justification**

1. Has this proposal for addition of character(s) been submitted before? If YES explain	<i>Partially as CJK Unified Ideographs</i>	<i>Yes</i>
2. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)? If YES, with whom? If YES, available relevant documents:	<i>The submitter as users</i> <i>See proposal</i>	<i>Yes</i>
3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included? Reference:	<i>See proposal</i>	<i>Yes</i>
4. The context of use for the proposed characters (type of use; common or rare) Reference:	<i>See proposal</i>	<i>mixed</i>
5. Are the proposed characters in current use by the user community? If YES, where? Reference:	<i>See proposal</i>	<i>Yes</i>
6. After giving due considerations to the principles in the P&P document must the proposed characters be entirely in the BMP? If YES, is a rationale provided? If YES, reference:		<i>No</i>
7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?		<i>No</i>
8. Can any of the proposed characters be considered a presentation form of an existing character or character sequence? If YES, is a rationale for its inclusion provided? If YES, reference:	<i>See proposal</i>	<i>Yes</i> <i>Yes</i>
9. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters? If YES, is a rationale for its inclusion provided? If YES, reference:		<i>No</i>
10. Can any of the proposed character(s) be considered to be similar (in appearance or function) to, or could be confused with, an existing character? If YES, is a rationale for its inclusion provided? If YES, reference:	<i>See proposal</i>	<i>Yes</i> <i>Yes</i>
11. Does the proposal include use of combining characters and/or use of composite sequences? If YES, is a rationale for such use provided? If YES, reference: Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided? If YES, reference:		<i>No</i>
12. Does the proposal contain characters with any special properties such as control function or similar semantics? If YES, describe in detail (include attachment if necessary)		<i>No</i>
13. Does the proposal contain any Ideographic compatibility characters? If YES, are the equivalent corresponding unified ideographic characters identified? If YES, reference:		<i>No</i>
