Title: ISO/IEC 10646 repertoire proposal post CDAM1.2

Source: Michel Suignard, Project editor

Status: Individual Contribution

Distribution: WG2

Reference: N5175

Executive Summary:

This document describes in detail most of the elements that could be included in a future amendment after ISO/IEC 10646 6th edition Amendment 1. These elements are also considered for a future version of the Unicode standard after version 15.0. While they don't constitute an exhaustive description of such a future amendment for ISO/10646 or a newer version of Unicode, they give some information about its repertoire content. As such they can be used to create a new modification to Program of Work to allow such a new amendment. The model follows the same template as N5175 which was describing the repertoire content for CDAM1.2 by describing affected blocks, code point extension and relevant documents.

Amendment 2 repertoire possible additions

The following represents all repertoire additions that could be part of the CDAM2 ballot document (first phase of the amendment process). All these additions had been discussed in the context of the Unicode Standard encoding process. Most of these have been approved for a future version of the Unicode standard (beyond Unicode 15.0 currently under beta review).

Some of these additions are modest extension of existing repertoires (such as Telugu, Kannada, Balinese, Latin, Arabic). Other such as the Myanmar extension adds a new block. There are also new proposed scripts:

- Toghri (historic script from the Albanian region of Elbasan)
- Garay (modern created script from Senegal used for Wolof and Mandinka language)
- Tulu-Tigalari (historic script from Karnataka and the northern districts of Kerala in India)
- Sunuwar (modern script used in Nepal and Sikkim, India by the Sunuwar community)
- Kirat Rai (used in Sikkim and West Bengal, India, for writing the Bantawa (Rai) language)

Finally, a large extension of symbols used for legacy computer and teletext, Smalltalk are also proposed. The following table includes all the proposed new ranges with pointers to the relevant documentations:
