Title: Proposal to update the reference glyphs in the Nüshu block and the Ideographic Symbols and Punctuation block

Source: Kushim JIANG (姜兆勤)

Status: Individual Contribution

Action: For consideration by UTC

Date: 2022-06-26

The 2.0 version of the typeface called Noto Traditional Nüshu has been released on March 8th, the International Women's Day in 2021. This document proposes to update the reference glyphs for 397 Nüshu characters [U+16FE1 and U+1B170..U+1B2FB] to the regular font of Noto Traditional Nüshu in the Code Charts, which is available on Github <<https://github.com/googlefonts/noto-fonts/tree/main/hinted/ttf/NotoTraditionalNushu>>.

Besides being an open-source and well-designed typeface, the updating process will correct some glyphs when compared to the historical handwritten version. The Glyph correction process follows the evidence chain shown in Nüshu proposal shown by China National Body, that is, from 中国女书合集, 女书用字比较, to 女书读本. By going back step by step, forms that need to be corrected can be identified. All the corrected forms are listed below. The corresponding evidence figures are appended for check.
