## 0. Background

After the staff / western music notation (五线谱/五綫譜) and the number music notation (简谱/簡譜) were used widely in China, the folk music researchers realized that there was a special kind of rhythm form which had been used long ago in China, and this form is still common today, so they need a “new” beat sign to record this form.

Prof. Péng Shìduān (彭世端) defined the music used this kind of rhythm form is the “free beat music with uneven time position, uneven rhythm, which cannot be measured by fixed time interval (beat) and cannot beat.” (时位不匀整的, 非均分律动的, 不能用固定时距(拍)来衡量的, 打不出拍子来的自由节拍音乐。) Prof. Xiàng Qiánkūn (向乾坤) inherited this definition in his research. Now the researchers used the following symbol to record this kind of rhythm form consistently, but it’s hard to know who was the first one to use it. Please see Fig. 0.1. We can call it as the Sanban Sign (散板符号/散板符號) now. Prof. Péng mentioned this sign had been used in the book 《中国戏曲音乐集成(陕西卷)》 in 1983 in her paper, and this sign had been accepted and used by more and more researchers. As Fig. 2.23 shows, the Sanban Sign is also used in Hong Kong SAR.

*Fig. 0.1 Sanban Sign*

Earlier, the researchers only used the Han character “散” at the same position of the scores to record this kind of rhythm form. Please see Fig. 0.2, which is the music score of Master Méi Lánfāng’s (梅兰芳/梅蘭芳) performance.

Culture and Art Publishing House (CAAPH, 文化艺术出版社) published a series of

books named *Reference Compilation of Chinese Ethnic Music* (《中国民族音乐参考资料辑录》) in June this year (2022). This reference compilation collected several precious ethnic census reports in the early days of the founding of PRC, so we can see the Sanban Sign was used in 1961. Please Fig. 0.3. Therefore, the introduction time of the sign is before 1960s. This song was cited from the book named 《说唱音乐》 (rap is also translated as “说唱音乐” in modern Chinese currently, but it doesn’t mean rap here) collected in the series and edited by the Ethnic Music Research Class of Chinese Music Research Institute, Central Conservatory of Music (中央音乐学院中国音乐研究所民族音乐研究班). The Chinese Music Research Institute was established in November, 1949, and became a part of the art research institution of the Ministry of Culture of PRC in 1973, and this art research institution was renamed as [Chinese National Academy of Arts](#) (中国艺术研究院) by the State Council of PRC. The current full name of the Chinese Music Research Institute is the [Music Research Institute of Chinese National Academy of Arts](#) (中国艺术研究院音乐研究所), which is under the Ministry of Culture and Tourism of PRC now. Therefore, this symbol and the corresponding use had been authoritative in China since 1960s at least. Now, as we know, the Sanban Sign is used for the Chinese folk music and so many local operas (地方戏曲), such as Peking Opera (京剧), Yueju Opera (粤剧), Shaoxing Yueju Opera (越剧), Sichuanese Opera (川剧), Pingju Opera (评剧), Huju Opera (沪剧) and so on. “董西厢” mentioned in Fig. 0.3 means the traditional opera script named *Western Chamber Romance* (《西厢记/西厢記》) written by Master Tung (董解元) in Jurchen Jin Dynasty (金代). This version was adapted from the novel named *Biography of Yingying* (《莺莺传/鶯鶯傳》) written by Yuan Zhen (元稹) in Tang Dynasty (唐代), and adapted into the other version of *Western Chamber Romance* written by Wang Shifu (王实甫/王實甫) in Yuan Dynasty (元代). This is a famous story in China, which has been adapted into local operas, movies and TV dramas for so many times.

## 1. Proposal

I once submitted [IRGN2540](#) *Request to discuss how to handle the Sanban Sign for Chinese folk music and local operas* to IRG, and the document was presented during IRG #58. At that time, I provided 5 methods to handle the Sanban Sign, which are to encode as a separate CJKUI, to encode as a separate symbol like the CJK punctuation, to encode as a separate musical symbol, to unify to U+5344 (卄), to unify to U+30B5 (Katakana Letter Sa, サ). IRG asked its experts to give feedback on the method of encoding the Sanban Sign. John Jenkins provided his feedback on the Slack during IRG #58, and he said “It's definitely not a CJKUI. IMHO it should be encoded as its own character, presumably in the Musical Symbols block.” Henry Chan provided [his feedback](#) to encode it as a CJK symbol or musical symbol. WGCLIAAC discussed this issue at its 23rd meeting, and HKSARG submitted the discussion result of WGCLIAAC as [its feedback](#) to IRG to encode the Sanban Sign as a separate musical symbol. [SMuFL project](#) under W3C discussed this symbol as [their GitHub Issue #172](#). At that SMuFL issue, they call the symbol as Chinese open meter time signature and provided several other pieces of evidence. At last, they also treat it as a separate musical symbol as U+EC87 in their PUA collection, but one of the discussants misunderstood the introduction time and the original form. As they wrote, this symbol was once used as other different form like U+5344 (卄) or 3-stroke form of U+8279 (卅), even U+5EFE (卅) or the previous UCS2003 glyph for U+2232C (卅) because of the limitations of the former regional character set or movable type engraving, but the original form and the current most common form are both as the same as the prosed one in this document. Fig. 0.3 has shown all the answers.

To sum up, I propose to encode the Sanban Sign as a musical symbol separately in the Musical Symbols block. The reasons are shown as below, which are revised based on the HKSARG feedback.

- (1) The Sanban sign is a symbol rather than a Han character, which the main purpose is to use it in the running scores not the texts;
- (2) The Sanban sign is used as a musical notation with its own meaning;
- (3) Unlike characters, the Sanban sign does not have a pronunciation, but it has a stable name as a music symbol;
- (4) The Sanban sign cannot be found in any dictionary.

For the character name, I think the original name of the symbol is better than

others.

For the common glyph style, as Fig. 0.3 and several pictures in Section 3 show, the most common is Sung/Ming style, so I choose this one. When we use Sung/Ming style as I proposed, the most direct visual impression is different from Katakana Letter Sa in the code charts.

I proposed the Sanban Sign as U+1D1EB. The information in NameList.txt is shown as below.

```
@      Chinese notation
@+      The following range is specific to Chinese folk
music and local operas.
U+1D1EB    MUSICAL SYMBOL SANBAN
    = sanban sign
    x (katakana letter sa - 30B5)
    x 5344
    x 5EFE
    x 8279
    x 2232C
```

The script should be common like other musical symbols.

The proposed glyph is shown as below, which is the same as Fig. 0.1.

The UCD information in UnicodeData.txt is shown as below.

```
1D1EB;MUSICAL SYMBOL SANBAN;Lm;So;0;L;;;;;N;;;;;
```

The information in VerticalOrientation.txt is shown as below. Please see Fig. 2.23.

```
1D1EB      ; U # So      MUSICAL SYMBOL SANBAN
```

Other properties should be like other musical symbols as well if needed.
