

Preliminary Proposal for Encoding the N'ti Script in the UCS

Oreen Yousuf | Ibrahima Ceesay

To: Script Encoding Working Group (SEWG) / Unicode Technical Committee (UTC)

From: Oreen Yousuf, oreen.yousuf@gmail.com | Ibrahima Ceesay, ibrahimaceesay0@gmail.com

Subject: N'ti Script

Date: 2025 December 5

We propose the addition of the N'ti script (ߒߞߏ) into the Unicode Standard. Since its invention in 1966 the script has been used to write the Soninke language of West Africa.

I Background

The Soninke language (ISO 639-3: *snk*) is a Mande language spoken by the Soninke people of West Africa and by around 2.3 million people in Mali, Mauritania, Senegal, Ivory Coast, Gambia, Guinea-Bissau and Guinea. It is an official or national language in Mali, Mauritania, Senegal and Gambia. In 1966, Adama Konte, a man from Nioro du Sahel, Mali, created the N'ti script to write the Soninke language. The script has been taught and in continuous daily use since its creation. It continues to be used and taught in Mali, Republic of the Congo (Brazzaville), and Ivory Coast by several thousand people (though exact estimates are hard to calculate). Konte now lives in Ivory Coast and is in his 90s. After Konte taught the script to his children and grandchildren, they in turn taught it to Soninke communities in other countries after which it spread far and wide.

The community developed a computer font in February 2018 and has used it ever since to write documents and create digital content in online videos. The script is included in books, primers, digital media, text shared on social media, art, and clothing.

A Keyman keyboard with 600+ downloads, created by one of the proposal authors in May 2025, can be found at: https://keyman.com/keyboards/soninke_n_ti. Prior to the previously mentioned Keyman keyboard, a hacked mobile keyboard was created by the community.

Three official Letters of Request to encode the N'ti script written by Malian officials are on pages 14-16.

The proposal authors are aware of three other, unrelated scripts for Soninke – “Oti Safandé Lassili” created in 2024 by Malian Sekou Bine Sy; a second (without a distinct name) created in 2015 by Malian Médi Diakité; and a third (without a distinct name) created (in an unknown year by the proposal authors) by NAHA-ONG. The proposal authors believe none of these scripts are used as widely as N'ti, but estimates are unknown and assumed to be low.

II Script Name

The proposed Unicode name for the script is “Nti”. The user community refers to the script as “ߒߞߏ” (Soninke Latin-orthography: “N’ti”). “N’ti” means “I said” or “I say” in Soninke, similar to the meaning behind the NKO script’s name. As Unicode does not allow an apostrophe in a script’s Unicode name for technical purposes, the Unicode name for the script will therefore simply be “Nti”.

III Structure

The N'ti script is a unicameral alphabet with 27 letters (5 vowels and 22 consonants). The script is written left-to-right horizontally across a page, from the top of a page to the bottom of a page. All letters in a given word **always** join at the bottom similar to the NKO and Adlam script. The letters do **not** have different positional shapes depending on where in the word they appear as is the case in the Arabic script. Most letters have outward-facing curves on the bottom-left and bottom-right, alluding to the fact that letters connect to surrounding letters.

Below is the basic character inventory of the N'ti script:

N'ti Letter Name	N'ti Letter	IPA	Latin Soninke Letter	N'ti Letter Name	N'ti Letter	IPA	Latin Soninke Letter
AN	𠁥	/a/	A a	GA	𠁫	/g/	G g
UN	𠁦	/u/	U u	NYA	𠁮	/n/	Ñ ñ
IN	𠁨	/i/	I i	DA	𠁩	/d/	D d
EN	𠁩	/e/	E e	KA	𠁪	/k/	K k
ON	𠁪	/o/	O o	TA	𠁫	/t/	T t
NM	𠁧	/m/	NM nm	YA	𠁧	/j/	Y y
XA	𠁩	/x ~ χ/	X x	FA	𠁫	/f/	F f
MA	𠁫	/m/	M m	WA	𠁭	/w/	W w
LA	𠁩	/l/	L l	NGA	𠁩	/ŋ/	D ŋ
HA	𠁩	/h/	H h	JA	𠁩	/dʒ/	J j
RA	𠁩	/r/	R r	NA	𠁩	/n/	N n
CHA	𠁪	/tʃ/	C c	BA	𠁩	/b/	B b
QA	𠁩	/χ/	X x	SA	𠁩	/s/	S s
PA	𠁩	/p/	P p				

Table 1. Basic character inventory of the N'ti script.

Diacritics

There are 8 (non-spacing) diacritics in the N'ti script and they are listed in the table below. All except the last diacritic listed can only be attached to vowels. The last diacritic listed attaches to specific consonants to change the consonant value to a foreign phoneme, or it attaches to numbers to create ordinal numbers.

Name	Diacritic	All uses	Affect
XAN SEGEYE	ˉ	Ɓ Ɓ̄ Ɓ̄̄ Ɓ̄̄̄ Ɓ̄̄̄̄	Adds a short, high tone
XAN YANQAYE	·	Ɓ̄ Ɓ̄̄ Ɓ̄̄̄ Ɓ̄̄̄̄ Ɓ̄̄̄̄̄	Adds a short, low tone
XAN XOTTE	˜	Ɓ̄̄̄ Ɓ̄̄̄̄ Ɓ̄̄̄̄̄ Ɓ̄̄̄̄̄̄ Ɓ̄̄̄̄̄̄̄	Adds a short, aspirated tone
YIN DURO FUTIYE	^	Ɓ̄̄̄̄ Ɓ̄̄̄̄̄ Ɓ̄̄̄̄̄̄ Ɓ̄̄̄̄̄̄̄	Turns vowels into long vowels (long regular tone)
XAN SEGEYE FUTIYE	˘	Ɓ̄̄̄̄̄ Ɓ̄̄̄̄̄̄ Ɓ̄̄̄̄̄̄̄̄	Adds a long, high tone
XAN YANQAYE FUTIYE	ˇ	Ɓ̄̄̄̄̄̄ Ɓ̄̄̄̄̄̄̄̄̄	Adds a long, low tone
XAN XOTTE FUTIYE	˜	Ɓ̄̄̄̄̄̄̄ Ɓ̄̄̄̄̄̄̄̄̄̄	Adds a long, aspirated tone
YILLA	˘	Ɓ̄̄̄̄̄̄̄̄ Ɓ̄̄̄̄̄̄̄̄̄̄̄	Changes a Soninke consonant sound to a foreign consonant sound

Table 2. N'ti diacritics.

YIN DURO FUTIYE  can only be used on vowels. It turns the vowel into a long vowel.

N'ti	IPA	Latin Orthography
𠁥→𠁥	/a/→/a:/	a→aa
𠁤→𠁤	/u/→/u:/	u→uu
𠁧→𠁧	/i/→/i:/	i→ii
𠁥→𠁥	/e/→/e:/	e→ee
𠁥→𠁥	/o/→/o:/	o→oo

Table 3. How the Yin Duro Futiye diacritic changes vowels.

YILLA (⌚) is placed on top of select consonants. It changes the sound of a consonant to a foreign consonant sound (likely Arabic and/or French).

N'ti	IPA	Approximating:
⌚ → ⌚	/t/ → /t ^ç /	Arabic ط
⌚ → ⌚	/p/ → /p ^h /	-
⌚ → ⌚	/s/ → /ʃ/	Arabic ش
⌚ → ⌚	/d/ → /d ^ç /	Arabic ض
⌚ → ⌚	/f/ → /v/	French v
⌚ → ⌚	/h/ → /h/	Arabic ه
⌚ → ⌚	/dʒ/ → /z/	Arabic ج
⌚ → ⌚	/dʒ/ → /ð ^ç /	Arabic ظ
⌚ → ⌚	/χ~χ/ → /q/	Arabic ق
⌚ → ⌚	/tʃ/ → /s ^ç /	Arabic س

Table 4. How the Yilla diacritic changes the value of specific N'ti consonantal letters.

Using the vowel A (⌚) as an example, below shows a ranking of the most frequent vowel diacritics (1) to the least frequent pair (8):

1	2	3	4	5	6	7	8
⌚	⌚	⌚	⌚	⌚	⌚	⌚	⌚

Table 5. Diacritic frequency in the N'ti script.

Punctuation and Numerals/Digits:

There are N'ti-specific characters for punctuation and numerals (0-9).

Xupu (⌚⌚⌚⌚⌚): ⌚ This punctuation mark is used in various ways (e.g., comma, full-stop, etc.).

Numerals/Digits (0-9): • ♀ ߂ ߃ ߄ ߅ ߆ ߇ ߈ ߉

The YILLA diacritic  is also placed on top of N'ti numerals to create ordinal numbers. Below are some examples.

Soninke		English
ᬁ	first	1 st
ᬁጀ	second	2 nd
ᬁጀጀ	third	3 rd
ᬁጀጀጀ	tenth	4 th
ᬁጀጀጀጀ	hundredth	100 th
ᬁጀጀጀጀጀ	thousandth	1,000 th

Table 6. Ordinal numbering in Soninke written in the N'ti script and English equivalents.

C	ㅓ	ㅏ	ㅓ
D	ㅓ	ㅓ	ㅓ
E	ㅓ	ㅓ	
F	ㅓ	ㅓ	

Additional information on characters

Joining information

Multi-letter words join/fuse at the bottom similar to the NKo, Adlam ,and Arabic scripts. Except for the letter BA , all N'ti letters have very apparent, little lines on the bottom-right and bottom-left of their shapes alluding to the fact that they are to be joined in writing. The N'ti script is not scriptio continua ('continuous script') like the Thai or Javanese scripts; spaces are used in the script – therefore, letters are only joined at the bottom of individual words. **All** letters in a single word **always** join.

Punctuation

There is 1 script-specific punctuation marks in the N'ti script: Xupu, as explained above at the end of Section III.

Non-N'ti punctuation marks are used when writing Soninke: *single-quotation mark/apostrophe ' , colon : , question mark ? , double quotation mark " , period/full-stop . , exclamation mark !*

While the exclamation mark used in N'ti is similar to that used in Spanish, it only appears at the end of sentences and not at the beginning (i.e., in Spanish).

Other punctuation marks may appear with the script, most likely coming from the Latin script.

Numbers

There are script specific numerals in the N'ti script, as shown above at the end of Section III. The language/script uses a decimal system (i.e., base-10).

Line breaking information

- Words are separated with a space (i.e., U+0020 SPACE).
- Line breaks only occur at word boundaries; a line cannot break in the middle of a word.
- Special modes like hyphenation are not used to allow line breaks within words (e.g., like in English).
- Line breaks cannot occur within numbers.
- Line breaks cannot occur before punctuation characters (e.g., lines cannot break before the Xupu, a full-stop, etc.).

The N'ti script is most likely to occur alongside the Arabic script and/or the Latin script. There is (a lower) chance the N'ti script appears alongside the NKo script.

VI Collation

The collation/alphabetic order for the basic N'ti letters is as follows (which is also given above in Table 1 in Section III (order in Table is given column by column, not row by row)):

፩ < ፪ < ፫ < ፬ < ፭ < ፮ < ፯ < ፱ < ፲ < ፳ < ፴ <
 < ፵ < ፶ < ፷ < ፸ < ፹ < ፻ < ፻ < ፻ < ፻ < ፻ < ፻ < ፻ <
 ፻ < ፻ < ፻ < ፻

The 7 vowel diacritics affect the collation/alphabetic order in the following way:

base vowel without diacritics < ፩ XAN SEGEYE < ፩ XAN YANQAYE < ፩ XAN XOTTE < ፩ YIN DURO
 FUTIYE < ፩ XAN SEGEYE FUTIYE > ፩ XAN YANQAYE FUTIYE < ፩ XAN XOTTE FUTIYE.

፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩
 ፪ < ፪ < ፪ < ፪ < ፪ < ፪ < ፪ < ፪
 ፫ < ፫ < ፫ < ፫ < ፫ < ፫ < ፫ < ፫
 ፬ < ፬ < ፬ < ፬ < ፬ < ፬ < ፬ < ፬
 ፭ < ፭ < ፭ < ፭ < ፭ < ፭ < ፭ < ፭
 ፮ < ፮ < ፮ < ፮ < ፮ < ፮ < ፮ < ፮

When a letter has the YILLA ፩ diacritic it is ordered after the same letter without the YILLA. Therefore, the full collation order is as follows:

፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ <
 < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ <
 ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ <
 ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ <
 ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ <
 ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ < ፩ <

Numbers, punctuation, and standalone diacritics affect the collation of the above letters as such:
Punctuation < Numbers < Letters < Standalone diacritics

Punctuation collation order: Xupu ^

Numbers collation order: ፩፪፫፬፭፯፪፪ (0123456789)

Letters: see above

Standalone diacritics:

VIII Acknowledgements

The proposal authors are especially grateful to Ichaka "Seega" Magassa for his assistance in clarifying many aspects of the N'ti script, without which would have substantially prolonged writing the proposal.

The next 3 pages include Official Letters of Request from governmental agencies of Mali to encode the N'ti script into the Unicode Standard.

This project was made possible in part by a grant from the Mellon Foundation to the Script Encoding Initiative at the University of California, Berkeley.

LETTER OF REQUEST

To whom it may concern

I, the undersigned, Dr Adama Diokolo COULIBALY, General Director of the Malian Academy of Languages (AMALAN), hereby officially request that the Masaba and N'ti scripts be encoded in Unicode.

These endogenous scripts are used in the Kayes region of Mali to write the Bamanankan and Soninke languages. Masaba is used to write Bamanankan (Bambara) and N'ti is used to write Soninke.

Yours sincerely,

The Director General

Dr Adama Diokolo COULIBALY

Knight of the National Order

X ISO Proposal Summary Forms

ISO/IEC JTC 1/SC 2/WG 2 PROPOSAL SUMMARY FORM TO ACCOMPANY SUBMISSIONS FOR ADDITIONS TO THE REPERTOIRE OF ISO/IEC 10646¹	
Please fill all the sections A, B and C below. Please read Principles and Procedures Document (P & P) from http://std.dkuug.dk/JTC1/SC2/WG2/docs/principles.html for guidelines and details before filling this form. Please ensure you are using the latest Form from http://std.dkuug.dk/JTC1/SC2/WG2/docs/summaryform.html. See also http://std.dkuug.dk/JTC1/SC2/WG2/docs/roadmaps.html for latest Roadmaps.	

A. Administrative

1. Title:	Preliminary Proposal for Encoding the N'ti Script in the UCS	
2. Requester's name:	Oreen Yousuf	
3. Requester type (Member body/Liaison/Individual contribution):	Individual Contribution	
4. Submission date:	2025-12-5	
5. Requester's reference (if applicable):	oreen.yousuf@gmail.com	
6. Choose one of the following:	This is a complete proposal: Yes (or) More information will be provided later:	

B. Technical – General

1. Choose one of the following:	a. This proposal is for a new script (set of characters): Yes Proposed name of script: NTI b. The proposal is for addition of character(s) to an existing block: No Name of the existing block:	
2. Number of characters in proposal:	35	
3. Proposed category (select one from below - see section 2.2 of P&P document):	A-Contemporary <input checked="" type="checkbox"/> B.1-Specialized (small collection) <input type="checkbox"/> B.2-Specialized (large collection) <input type="checkbox"/> C-Major extinct <input type="checkbox"/> D-Attested extinct <input type="checkbox"/> E-Minor extinct <input type="checkbox"/> F-Archaic Hieroglyphic or Ideographic <input type="checkbox"/> G-Obscure or questionable usage symbols <input type="checkbox"/>	
4. Is a repertoire including character names provided?	a. If YES, are the names in accordance with the "character naming guidelines" in Annex L of P&P document? Yes b. Are the character shapes attached in a legible form suitable for review? Yes	
5. Fonts related:	a. Who will provide the appropriate computerized font to the Project Editor of 10646 for publishing the standard? Ichaka Magassa via Oreen Yousuf (font originally created by Magassa) b. Identify the party granting a license for use of the font by the editors (include address, e-mail, ftp-site, etc.): Oreen Yousuf, oreen.yousuf@gmail.com	
6. References:	a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided? Yes b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached? Yes	
7. Special encoding issues:	Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)? Yes <i>A sorting description is enclosed.</i>	
8. Additional Information:	Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behaviour information such as line breaks, widths etc., Combining behaviour, Spacing behaviour, Directional behaviour, Default Collation behaviour, relevance in	

¹ Form number: N4502-F (Original 1994-10-14; Revised 1995-01, 1995-04, 1996-04, 1996-08, 1999-03, 2001-05, 2001-09, 2003-11, 2005-01, 2005-09, 2005-10, 2007-03, 2008-05, 2009-11, 2011-03, 2012-01)

Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at <http://www.unicode.org> for such information on other scripts. Also see Unicode Character Database (<http://www.unicode.org/reports/tr44/>) and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.

C. Technical - Justification

1. Has this proposal for addition of character(s) been submitted before?	<input type="checkbox"/> No
If YES explain
2. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)?	<input type="checkbox"/> Yes
If YES, with whom? <i>Users/teachers of the script</i>
If YES, available relevant documents: <i>Enclosed in the proposal.</i>
3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included?	<input type="checkbox"/> Yes
Reference: <i>Enclosed in the proposal; Section I, page 1.</i>
4. The context of use for the proposed characters (type of use; common or rare)	<input type="checkbox"/> Rare
Reference: <i>Enclosed in the proposal; Section I, page 1.</i>
5. Are the proposed characters in current use by the user community?	<input type="checkbox"/> Yes
If YES, where? Reference: <i>Mali, Republic of the Congo, Ivory Coast</i>
6. After giving due considerations to the principles in the P&P document must the proposed characters be entirely in the BMP?	<input type="checkbox"/> No
If YES, is a rationale provided?
If YES, reference:
7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?	<input type="checkbox"/> Yes
8. Can any of the proposed characters be considered a presentation form of an existing character or character sequence?	<input type="checkbox"/> No
If YES, is a rationale for its inclusion provided?
If YES, reference:
9. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters?	<input type="checkbox"/> No
If YES, is a rationale for its inclusion provided?
If YES, reference:
10. Can any of the proposed character(s) be considered to be similar (in appearance or function) to, or could be confused with, an existing character?	<input type="checkbox"/> Yes
If YES, is a rationale for its inclusion provided? <i>Yes</i>
If YES, reference: <i>Enclosed in the proposal; Section IV.</i>
11. Does the proposal include use of combining characters and/or use of composite sequences?	<input type="checkbox"/> No
If YES, is a rationale for such use provided?
If YES, reference:
Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided?
If YES, reference:
12. Does the proposal contain characters with any special properties such as control function or similar semantics?	<input type="checkbox"/> No
If YES, describe in detail (include attachment if necessary)
13. Does the proposal contain any Ideographic compatibility characters?	<input type="checkbox"/> No
If YES, are the equivalent corresponding unified ideographic characters identified?
If YES, reference:
