Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives or www.iec.ch/members_experts/refdocs).

ISO and IEC draw attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents and <https://patents.iec.ch>. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html. In the IEC, see www.iec.ch/understanding-standards.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 2, *Coded character sets*.

A list of all parts in the ISO/IEC 10646 series can be found on the ISO and IEC websites.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html and www.iec.ch/national-committees.

Information technology — Universal Coded Character Set (UCS) —AMENDMENT 1: Sirmauri, Proto-Cuneiform, Chisoi, and other characters

Clause 2, Normative references

Update all Unicode references to their Unicode version 19.0 version.

24.1

In the list of CJK ideographs sources, add the new Hanzi source:

- Hanzi SG (Singapore) sources,

In the second paragraph, replace ‘G, H, M, T, J, K, KP, V, U, UK, and S’ by ‘G, H, M, T, J, K, KP, V, U, UK, S, and SG’.

24.2

After the second paragraph, in the list add the following Tag value for the 2nd field enumeration:
kIRG_SGSource.

24.3.1

Replace the third paragraph with following:

The code chart for the CJK UNIFIED IDEOGRAPHS block (4E00-9FFF) uses a fixed column format (i.e. source references from a given source always appear in the same column) while the code charts for the other CJK Unified blocks show graphic symbols per the following order of appearance: G, T, J, K, KP, V, H, M, U, UK, S, and SG.

24.3.2

Replace the third and fourth sentences of the first paragraph with following:

An optional second row may be displayed to show the Hanzi M source, the Unicode U source, the Hanzi SG source, the UK UK source, and the SAT S source. Because at least one of these twelve sources (G, H, T, J, K, KP, V, M, U, SG, UK, and S) exists for any code point in that block, there is always one row visible for each code point in that block.

24.3.3

Change the header text to: ‘Source reference presentation for CJK UNIFIED IDEOGRAPHS EXTENSION A and B, and CJK UNIFIED IDEOGRAPHS COMPONENTS-B’. Replace the first sentence of the first paragraph with following:

For the presentation of the CJK UNIFIED IDEOGRAPH EXTENSION A and B blocks, and the CJK UNIFIED IDEOGRAPHS COMPONENTS-B block, up to three sources per characters are represented in a single row.

Update the Figure 3 title with following:

Figure 3 — Chart presentation for CJK UNIFIED IDEOGRAPHS EXTENSION A and B, and CJK UNIFIED IDEOGRAPHS COMPONENTS-B

24.3.4

Change the header text to: ‘24.3.4 Source reference presentation for CJK UNIFIED IDEOGRAPHS EXTENSION C to EXTENSION J, and CJK UNIFIED IDEOGRAPHS COMPONENTS-A’. Replace the first sentence of the first paragraph with following:

For the presentation of the CJK UNIFIED IDEOGRAPH EXTENSION C, D, E, F, G, H, I, and J blocks, and the CJK UNIFIED IDEOGRAPH COMPONENTS-A block, up to two sources per characters are represented in a single row.

Update the Figure 4 title with following:

Figure 4 — Chart presentation for CJK UNIFIED IDEOGRAPHS EXTENSION C to EXTENSION J, and CJK UNIFIED IDEOGRAPHS COMPONENTS-A

37.1

Because this is an amendment and not a full edition, the detailed code charts reference only provides a delta version of the code charts showing the character additions, glyph changes, and one Variation Sequence addition. This reference is identified as ISO/IEC 10646:2026, Amendment 1:2026 Code Charts’ located at <https://www.unicode.org/iso10646/edition7/amd1/charts/>.

37.4

Update the note as following:

NOTE – The full content of the repertoire (new and existing) is the same as the Unicode Standard version 19.0 available at:

<https://www.unicode.org/Public/19.0.0/charts/CodeCharts.pdf>.

Editor’s note (removed before publication): The link below referring to Unicode v19.0 is not yet active and will be only become active in the final step preceding the publication.

A.1, NOTE 3

In the alphabetical list of keywords in NOTE 3, add the value 1177 to the Cuneiform entry, the value 327 to Unicode, the values 2010 and 2011 to the CJK entry; and insert the following entries:

Chisoi	1166
Sirmauri	1176
Leibnizian signs	1178

A.2.2

In the list of blocks in the SMP, insert the following new entries:

CHISOI	16D80-16DAF
SIRMAURI	11850-1188F
PROTO-CUNEIFORM	12690-12BFF
LEIBNIZIAN AMBIGUOUS SIGNS	1DC00-1DC3F

A.2.3

In the list of blocks in the SIP, insert the following new entries:

CJK UNIFIED IDEOGRAPHS COMPONENTS-A 2EBF0-2EE5F

CJK UNIFIED IDEOGRAPHS COMPONENTS-B 2FAA0-2FC1F

A.6

Insert the new entry as follows:

327 UNICODE 19.0 Age property value less than or equal to 19.0

G

Insert each of the new character name entries at the appropriate position, ordered alphabetically by the character name, in the list of character names in Annex G. These new names are provided in a machine-readable format that is accessible as a link to this document.
