

Universal Multiple-Octet Coded Character Set UCS

ISO/IEC JTC1/SC2/WG2/IRG N1936A-R

Date: 2013-05-20

Source:	UTC
Title:	UTC/US Urgently-needed Character Submission
Meeting:	IRG #40
Status :	
Actions required	
Distribution:	IRG
Medium :	Electronic
Page:	
References:	

This UTC/US urgently-needed character submission consists of the following documents:

IRG N1936A: This document
IRG N1936B: Proposal summary form from the IRG P&P
IRG N1936C: A table of the proposed characters and key attributes
IRG N1936D: A Excel spreadsheet with character attributes
IRG N1936E: UTC document L2/12-333
IRG N1936F: A zip archive of bitmaps
UTCHan.ttf: A font containing glyphs for all the characters

The table includes the following attributes:

- A. The U-source identifier
- B. The character's glyph
- C. The character's IDS (if any)
- D. The KangXi radical (number form)
- E. The KangXi radical (character form)
- F. The number of additional strokes
- G. The stroke type of the first additional stroke
- H. An indication of whether the character is for traditional Chinese (TC) or simplified Chinese (SC)
- I. A character of which the proposed character is a variant. In the case of SC characters, the variant is the traditional form(s) (if encoded)
- J. The code point of the variant character

The Excel spreadsheet includes the following attributes:

- A. The U-source identifier
- B. The PUA code point for the character's glyph in UTCHAn.ttf
- C. The character's IDS (if any)
- D. The KangXi radical (number form)
- E. The number of additional strokes
- F. The stroke type of the first additional stroke
- G. An indication of whether the character is for traditional Chinese (TC) or simplified Chinese (SC)
- H. The code point of a character of which the proposed character is a variant. In the case of SC characters, the variant is the traditional form(s) (if encoded)
- I. The index of the character in L2/12-333 (IRG N1936E), if any

UTC document L2/12-333 (IRG N1936E) is a contribution from sinologist Andrew West. Characters UTC-00953 onward all have indices into L2/12-333 (IRG N1936E), which itself provides the detailed evidence for those characters.

The remaining character, UTC-00791, is well-known (see http://en.wikipedia.org/wiki/Biangbiang_noodles). It exists in numerous variants. We recommend that only one form be actually encoded, and that a future Ideographic Variation Sequence registration be used for the others.

Of the characters included here, six (UTC-00953 [IRG Ext. F v 1.0 07659], UTC-00960 [01075], UTC-00961 [01162], UTC-00967 [01142], UTC-01171 [07656], and UTC-01173 [03339]) are included in Extension F submissions from other IRG members. Per the IRG P&P, should this proposal be accepted by the IRG, they would be removed from consideration for Extension F.

Rational for “Urgent Need”

In general, the characters included here have sufficiently established current use that we feel it inappropriate to wait for encoding in Extension G, which would otherwise be the earliest opportunity.

In some cases, these characters are currently represented in Wikipedia using graphics. As a rule, presence on the Internet is not sufficient evidence for encoding. In these cases, however, other considerations are involved.

UTC-00791 is so well known that it actually has its own article in the *English* Wikipedia. Its extreme complexity has made it something of a curiosity. Although a curiosity, it is nonetheless in actual use and therefore a legitimate candidate for encoding.

UTC-00953 and UTC-01171 are both recent coinages for newly-synthesized chemical elements. As such, they are used in the periodic table of the elements and other common reference works

for chemistry and physics.

UTC-00954, UTC-00955, UTC-00957, and UTC-00958 are comparatively common fish and plant names, found in standard reference materials in both simplified and traditional Chinese.

UTC-00959 is required by the catalogue of the Morrison collection, a major Western collection of old Chinese books and manuscripts at the SOAS at London University.

The remainder are used in Chinese-language Tangut studies. The fact that they are not encoded is actively creating problems for Tangut scholars.

**ISO/IEC JTC 1/SC 2/WG 2/IRG
PROPOSAL SUMMARY FORM TO ACCOMPANY SUBMISSIONS
FOR ADDITIONS OF CJK UNIFIED IDEOGRAPHS TO THE REPERTOIRE OF ISO/IEC 10646**

Please fill in all the sections below.

Please read Principles and Procedures Document (P & P) from <http://appsrv.cse.cuhk.edu.hk/~irg/irg31/IRGN1562.pdf>
for guidelines and details before filling in this form.

Please ensure you are using the latest Form from <http://appsrv.cse.cuhk.edu.hk/~irg/SubmissionForm.pdf>.

See also <http://appsrv.cse.cuhk.edu.hk/~irg/UCV.html> for latest *Unifiable Calligraphic Variations*.

A. Administrative

1. IRG Project Code:	UTC/US Urgently Needed Characters	
2. Title:	UTC/US Urgently Needed Characters	
3. Requester's region/country name:	USA	
4. Requester type (National Body/Individual contribution):	National Body	
5. Submission date:	14 May 2013	
6. Requested Ideograph Type (Unified or Compatibility Ideographs)	Unified Ideographs	
If Compatibility, does requester have the intention to register them as IVS (See UTS #37) with the IRG's approval? (Registration fee will not be charged if authorized by the IRG.)	N/A	
7. Request Type (Normal Request or Urgently Needed)	Urgently Needed	
8. Choose one of the following:		
This is a complete proposal:	Yes	
(or) More information will be provided later:		

B. Technical – General

1. Number of ideographs in the proposal:	19
2. Glyph format of the proposed ideographs: (128x128 "bmp" files or TrueType font file)	TrueType
If 'bmp' files, their file names are the same as their Source IDs?	
If TrueType font, all proposed glyphs are put into BMP PUA area?	Yes
If TrueType font, data for Source IDs vs. character codes are provided?	Yes
3. Source IDs:	
Do all the proposed ideographs have a unique, proper Source ID (country/region code and less than 9 alphanumeric characters)?	Yes
4. Evidence:	
a. Do all the proposed ideographs have the separate evidence document which contains at least one scanned image of printed materials (preferably dictionaries)?	Yes
b. Do all the printed materials used for evidence provide enough information to track them by a third party (ISBN numbers, etc.)?	Yes
5. Attribute Data Format: (Excel file or CSV)	Excel file

C. Technical - Checklist

Understandings of the Unification Checklist

- 1.Has the requester read ISO/IEC 10646 Annex S and did the requester understand the unification policy?
- 1.Has the requester read the “Unifiable Calligraphic Variations” (contact IRG technical editor through the Rapporteur for the latest one) and did the requester understand the unifiable variation examples?
- 1.Has the requester read this P&P document and did the requester understand the 5% rule?

Yes

Yes

Yes

Character-Glyph Duplication Checklist(<http://www.itscj.ipsj.or.jp/sc2/open/pow.htm> contains all the published ones and those under ballot)

- 1.Has the requester checked that any of the proposed ideographs is **not unifiable** with the unified or compatibility ideographs of ISO/IEC 10646?
If yes, which version of ISO/IEC 10646 did requester check? (e.g. 10646:2003)
- 1.Has the requester checked that any of the proposed ideographs is **not unifiable** with the ideographs in Amendments of current ISO/IEC 10646? (As of 2009, Amendment 1, 4, 5, 6 and 8 have CJK ideographs.)
If yes, which amendments did requester check?
- 1.Has the requester checked that any of the proposed ideographs is **not unifiable** with the ideographs in the current IRG working sets or proposed amendments of ISO/IEC 10646? (As of 2009, PDAM 6 and PDAM 8 have CJK ideographs.)
If yes, which draft amendments did requester check?
- 1.Has the requester checked that any of the proposed ideographs is **not unifiable** with the ideographs in the current working M-set and D-set of the IRG? (Contact IRG chief editor and technical editor through the IRG Rapporteur for the newest list)
If yes, which document did requester check?

Yes

10646:2011

N/A

N/A

Yes

Extension E

Yes

IRGN1921 (CJK Ext. F. v1.0)

Yes

- 1.Has the requester checked that any of the proposed ideographs is **not unifiable** with the over-unified or mis-unified ideographs in ISO/IEC 10646? (Check Annex E of this document).
- 1.Has the requester checked that any of the proposed ideographs **has similar ideograph(s)** with the ideographs in the current standardized or working set mentioned above?
- 1.Has the requester checked that any of the proposed ideographs **has variant ideograph(s)** with the ideographs in the current standardized or working set mentioned above?

Yes

Yes

Attribute Data Checklist

- 1.Do all the proposed ideographs have attribute data such as the KangXi radical code, stroke count and first stroke?
- 1.Are there any simplified ideographs (ideographs that are based on the policy described in 簡化字總表) in the proposed ideographs?
If YES, does your proposal include proper simplified/traditional indication flag for each proposed ideograph in attribute data?
- 1.Do all the proposed ideographs have the document page number of evidence documents in attribute data?
- 1.Do all the proposed ideographs have the proper Ideographic Description Sequence (IDS) in attribute data?
If NO, how many proposed ideographs do not have the IDS?
- 1.If the answer to question 9 or 10 is yes, do the attribute data include any information on similar/variant ideographs for the proposed ideographs?

Yes

Yes

Yes

Yes

Yes

Yes

Title: Request to UTC to Propose 226 Characters for Inclusion in CJK Extension F
Author: Andrew West
Date: 2012-10-19

The IRG does not normally accept contributions from individuals, and so there is no direct way for an individual expert to propose Han ideographs for encoding in the UCS. Over several years I have compiled a list of several hundred unencoded CJK characters, of which 226 reliably-sourced characters are urgently required for use by myself or by other users but are not scheduled for inclusion in CJK Extension E. I am therefore requesting that the UTC propose these 226 characters for inclusion in CJK Extension F via the IRG.

The 226 proposed characters fall into six categories, as discussed below.

1. Second Stage Simplifications

"Proposal to Encode Obsolete Simplified Chinese Characters" (L2/09-260R, WG2 N3695) proposes to encode 335 simplified Chinese characters that have been used historically, but that are no longer in common use. Of these, the simplified characters given in Table 1 of the *Plan for 2nd Stage Simplified Characters* that was published on 20th December 1977 were widely used in print during 1978. For example, the Table 1 simplified forms were used in the *People's Daily* newspaper from 21st December 1977 until July 1978 (see L2/09-260R fig. 4), and on postage stamps issued between June and November 1978 (see L2/09-260R figs. 6-10). Although the 2nd stage simplifications were officially withdrawn in 1978, the characters continued to see occasional use in printed contexts during the 1980s, and are still widely recognised today. There is a pressing need to encode the Table 1 simplifications, both in order to discuss the history of Chinese character simplification, and also in order to accurately represent those texts that were written using second stage simplifications (see L2/09-260R page 24 for an example of a web page for post card collectors that struggles to represent a Table 1 simplified character on a postcard from 1986).

On the other hand, Table 2 of the *Plan for 2nd Stage Simplified Characters* from 1977 was not implemented, and the Table 2 simplifications were only very rarely used in print outside the publication of the table itself. Therefore there is not as strong a case for encoding the Table 2 simplified characters as there is for the Table 1 simplified characters, and it is not proposed that they be added to CJK-F. The "first batch" simplified Chinese characters from 1935 and Singapore simplifications from 1969 that are discussed in L2/09-260R are also not proposed for adding to CJK-F.

Therefore 105 of the 335 characters proposed in L2/09-260R, all from Table 1 of the *Plan for 2nd Stage Simplified Characters* of 1977, are requested to be proposed for addition to CJK Extension F.

2. Xiandai Hanyu Cidian Additions

The *Modern Chinese Dictionary* (*Xiàndài Hànyǔ Cídiǎn* 现代汉语词典) is an authoritative dictionary of modern standard Chinese that was first published in 1973 and is currently in its 6th edition. The

2nd edition of this dictionary, published in 1983, is the source for the kXHC1983 field in the Unihan database, but as 172 characters in this edition of the dictionary are as yet unencoded, unencoded simplified characters are mapped to the corresponding traditional form characters, which makes the kXHC1983 field defective. 91 of the unencoded characters are scheduled for encoding in CJK Extension E, but that still leaves 81 unencoded characters. Given the importance of this dictionary of modern Chinese these 81 characters should be encoded as soon as possible.

3. *Grammata Serica Recensa* Additions

Bernhard Karlgren's 1957 dictionary of Old Chinese, *Grammata Serica Recensa*, is an extremely influential work in the history of Chinese philology, and the source for the kGSR field in the Unihan database. 16 entries in *GSR* are for unencoded characters, which are strong candidates for encoding.

4. Element Characters

The periodic table lacks simplified forms of 8 elements (Rf, Db, Sg, Bh, Hs, Mt, Rg and Cn), which are represented on the Chinese Wikipedia as either PUA characters (<http://zh.wikipedia.org/wiki/%E5%85%83%E7%B4%A0%E5%91%A8%E6%9C%9F%E8%A1%A8>) or as components (<http://zh.wikipedia.org/wiki/%E6%89%A9%E5%B1%95%E5%85%83%E7%B4%A0%E5%91%A8%E6%9C%9F%E8%A1%A8>), both of which methods are highly unsatisfactory. Six of these are scheduled for CJK-E, but Mt and Cn are not, and should be candidates for urgent encoding.

5. Sanskrit and Tangut Use Characters

Eleven characters used for the transliteration of Sanskrit and Tangut in recent academic publications are urgently required for encoding (see figs. 1-7).

6. Other Characters

Eleven other characters are required for encoding: three fish characters (see figs. 8-9), six plant characters (see figs. 10-15), one character used in a catalogue of Chinese books, and one character used for a technical term in a Yuan dynasty treatise on the game of golf (see fig.16).

Table of Proposed Characters

𑖀(紧)(特,定德开一入曾)	ṭha	𑖀𑖩干𑖀(紧) nīlakaṇṭha
没(紧)(没,明没合一入臻)	bha	钵𑖩麻(二合)捺(引)没(紧) padmanābha

Fig. 4: Sun Bojun 2007 page 102 (nos. 210, 213)

夏译佛经中“𑖀”字所代表的梵语是 va, 如梵文 sarva, 对音汉字为“萨𑖀”, 这种读法符合历代佛经对音的常例, “𑖀”本来就是为佛经陀罗尼标音而创制的新字, 梵文四十九根本字中, 善无畏、不空、慧琳等都用“𑖀”对译梵文 va, 反切注音为“无可反”, 其字音并非“缚”(《广韵》符钁切, 并药合三入宕)字加“口”旁。由此, 我们推知《掌中珠》中“𑖀”字所对应的西夏字的读音也应是 va 或者 w-。

Fig. 10: Jiǎnmíng Yīng-Hàn Cídiǎn p.135 (no. 219)

15. 黄蒿属 *Carum* L.

二年或多年生草本，高 30cm～80cm，根肉质。茎直立，分枝，上部 2 叉状。基生及下部的叶柄具鞘，中、上部叶有短柄或无柄；叶片二至三回羽状分裂，末回裂片线形或披针形，全缘。复伞形花序顶生或侧生，总苞和小总苞片无或 1 个～10 个，线形或披针形；小伞形花序有花 4 朵～30 朵，花两性或杂性；萼齿不显；花瓣白色或红色，倒卵形，顶端凹陷有内折小舌片；花柱基圆锥形。果实长卵形或卵形，侧扁，果棱明显；每棱槽中有油管 1 个，稀 3 个，合生面 2 条～4 条。

有 25 种～30 种，分布于欧洲、亚洲、北非及北美。我国有 4 种，2 变型。河南有 2 种。

1. 茎生叶鞘有宽白色膜质边缘。小总苞片无偶有 1 个～3 个，披针形；小伞形花序有花 5 朵～15 朵。果实长 4mm～5mm (1)黄蒿 *Carum carvi* L.
1. 茎生叶鞘白色膜质边缘狭。小总苞片 5 个～8 个，线形；小伞形花序有花 15 朵～25 朵。果实长 3mm～4mm (2)田黄蒿 *Carum buriaticum* Turcz.

(1)黄蒿 葛缕子 *Carum carvi* L. (图 1696 7～8)

二年生或多年生草本，高 30cm～80cm，无毛。根圆锥状，肉质。茎直立，上部分枝。基生叶

2. 田葛缕子 田黄蒿 (图 1160)

Carum buriaticum. Turcz. in
Bull. Soc. Nat Mosc. 11: 92. 1838.
nom. nud. id. 17:713.1844. describ;
中国高等植物图鉴 2:1070. 图3869.1972.

二年生草本，高 30—70 厘米，无毛。
根纺锤形，肥厚。茎直立，基部被淡褐色
基生叶残迹。基生叶具长柄，轮廓长圆状

Fig. 12: *Héběi Zhíwù Zhì* vol.2 p.256 (no. 221)

系 14. 菴蒿系——Ser. 14. Paniculigeræ Poljak. Фл. СССР 26: 487. 1961.——
Artemisia Subsect. *Glochistigma* Kitam. in Act. Phytotax. Geobot. 8: 63. 1939. p. p.

多年生草本。茎、枝、叶两面初时被稀疏的丝状绒毛或柔毛，后叶背留有疏短柔毛，
其余无毛。茎中部叶不分裂，边缘具数枚疏锯齿或浅裂齿。头状花序直径 3—3.5 毫米，在
茎上端排成圆锥花序，两性花花柱钝尖。

本系我国有 1 种。

106. 菴蒿 (神农本草经) 菴蒿子、菴蒿、覆蒿、菴芦、菴蒿 (神农本草经、本草纲目)，

Zengbu Man-Han zhuanzihui. 1762. RM 166.

A dictionary of Chinese characters. Compiled by Mei Yingzuo (c.1570-?) in 1615. This edition also gives the seal script form and a phonetic reading in the Manchu script for most characters. Appended are two tables by Mei Yingzuo of the possible phonetic combinations in Chinese, one arranged by rhyme and the other by alliteration. Cf. Simon & Nelson, *Manchu Books in London* II.14.

ff. 3, 3, 6, 29, 54, 51, 50, 51, 52, 53, 69, 66, 61, 71, 55, 54, 45.

RM CK494.13 166. 20 fascs. in 3 vols. 23.5 cm.

《增補滿漢篆字彙》十二集，首一卷，末一卷。（明）梅膺祚音釋，（明）廖百子（廖文英）纂輯。

清乾隆二十七年（1762）刻本，帶月樓藏版。

版式：版框 20.5 x 14.3 公分；四周單邊；11 行 20 字，小字雙行 36 字。

扉頁：鐫“乾隆壬午〔27 年〕春刻；梅挺生先生原本；帶月樓藏板；《增補滿漢篆字汪集》”。

內容：末卷收《韻法直圖》、《韻法橫圖》。

序跋：康熙壬子（11 年）龔鼎孳序。

Zengbu Man-Han zhuanzihui 增補滿漢篆字彙 (RM CK494.13 166): title-page.

Universal Multiple-Octet Coded Character Set
UCS

ISO/IEC JTC1/SC2/WG2/IRG N1936_JAPAN_Feedback
Date: 2013-11-01

Source:	Japan
Title:	Japan Feedback to IRG N1936 (UNC proposal by UTC/US)
Meeting:	IRG #41
Status :	
Actions required	For Discussion
Distribution:	IRG
Medium :	Electronic
Page:	
References:	N1936, N1920

UTC/US is submitting IRG N1936 as urgently needed characters, but Japan NB considers that this proposal is incomplete. Japan suggests UTC/US re-considering this proposal by following IRG P&P.

First, there is no explanation about "urgency".

Annex C of IRG P&P describes:

C.1. Introduction

When a member body demonstrates an urgent need for a small number of ideographs to be standardized rapidly for justifiable reasons, such as ideographs in a recently developed regional or national standard that must be implemented by a particular deadline, the IRG may submit the ideographs, independent of any of the current IRG working sets to WG2.

Adding to this, Annex C.2 requires:

d. A submission is deemed urgently-needed only if the submitting member body demonstrates urgency or a rationale for rapid standardization.

The most important thing for UNC proposal is explaining "urgency" to IRG member bodies to be accepted. As shown above, IRG P&P gives an example of "urgency" as:

- ideographs in a recently developed regional or national standard that must be implemented by a particular deadline

Although the word "urgent" is used in IRG N1936, there is no explanation why this is urgent, and submitter didn't demonstrate "urgency" at IRG #40 or the past meetings. Consequently, IRG N1936 does not satisfy requirements for UNC submission.

Secondly, IRG N1936 looks immature even as a regular submission on the points shown below.

- IRG N1936 mentions removing six characters because they are already included in CJK F candidate, but the document is not revised yet. For example, the number of characters in the summary form is remained as 19 although the real number is 13.
- Format of the associated data file does not follow specified in P&P Annex G.1.
- Evidences for at least three characters (UTC-00957, UTC-00965, and UTC-00966) are unclear and one character (UTC-00955) is missing.
- Five characters are simplified, but there is no evidence of actual usage to show they are not derived simplified. 2.2.3 c) of IRG P&P describes:

c. Avoidance of Derived Simplified Ideographs: To avoid encoding derived simplified characters that are not in actual use, submission of simplified ideographs requires the actual usage evidence. Providing only their corresponding traditional ideographs will not be considered evidence.

- SC of UTC-00791 is wrong. The correct SC is 54.

Note: Descriptions of IRG P&P in this document are taken from IRG N1920.
