馬 馬 马

The first and third characters meaning horse are in unicode, the second is not. The horse character is used as part of many other characters, and the simplified form for those in modern Chinese dictionaries also have there own code point, for example 妈 (mother) 码 (number) 吗 (indicates a question) 骂 (to curse) 蚂 (ant) and 犸 (part of the word for mammoth). Examples of the second type of horse character have be published for among others 馬, 獁, 篤, 罵, 駈, and 馱.
