A cell marked ***** indicates that a given composed character has NOT YET been proposed for inclusion into Unicode, while a cell marked ----- means that a given potential composed character simply ISN'T available.

Notice that certain character-deadkey combinations transform: <ΠTK> with the *daseia* (rough breathing) deadkey gives you <ΦΘX>, while <EO> with the *makra* (macron) deadkey will yield <HΩ>.

Type the deadkey(s) for the Greek accent(s)—in any order—followed by a vowel letter or a *rhō*.
