**About this Publication**

The main text of this book is set in Minion 3, designed by Rob Slimbach at Adobe Systems Incorporated. The main text was typeset using Adobe FrameMaker 2019 running under Windows 10. Figures were created with Adobe Illustrator. The code charts were produced with Unibook chart formatting software supplied by ASMUS, Inc. The text of the character names list is set in Myriad, designed by Carol Twombly and Robert Slimbach at Adobe Systems Incorporated.

The cover artwork for Version 13.0 is an original design by Huijun Shan, an award-winning senior UI designer, who has a B.S. in Communication Engineering from Nanjing University. The design was inspired by building blocks for children using letters put together with a scientific color scheme.
