References

Citations are given for the standards and dictionaries that were used as resources for *The Unicode Standard*, primarily for Version 1.0. A revised or reaffirmed version, with a different date, may have been published subsequently. Where a Draft International Standard is known to have progressed to International Standard status, the entry for the DIS has been revised.

In *Selected Resources*, the latest known edition is cited.

In general, American library practice has been followed for the romanization of titles and names written in non-Roman script. Exceptions are the use of *Pinyin* for Chinese, and when the rendering supplied by an author had to be used because the name or title in the original script was unavailable.

Due to the pending publication of many ISO standards, references to these standards as "ISO" or "ISO/IEC" standards is in flux. Citations below and in the rest of this standard represent the best information readily available at the time of publication.
