Q1: Ireland approves the PDAM registration.

Q2: Ireland approves the draft with the technical and editorial comments given below.

**Technical:**
1. Of the several characters whose combining status has been changed, two of them have been definitely found in subjoined position; therefore TIBETAN SUBJOINED SIGN LCE TSA CAN and TIBETAN SUBJOINED SIGN MCHU CAN should be added to the repertoire at this time. Positions 0F8C and 0F8D are proposed.

**Editorial:**
The dotted circles for the glyphs at 0F88, 0F89, anf 0F8B should be deleted. These are not combining characters.
