Title: Graphic representation of the Roadmap to the GPP, Plane 14 of the UCS

Source: Ad hoc group on Roadmap
Status: Expert contribution
Date: 1999-09-15
Action: For confirmation by ISO/IEC JTC1/SC2/WG2

The following tables comprise a real-size map of Plane 14, the GPP (General Purpose Plane) of the UCS (Universal Character Set). To print the HTML document it may be necessary to set the print percentage to 90% as the tables are wider than A4 or US Letter paper. The tables are formatted to use the Times font.

The following conventions are used in the table to help the user identify the status of (colours can be seen in the online version of this document: http://www.dkuug.dk/jtc1/sc2/wg2/docs/n2116.pdf):

- **Bold text** indicates an allocated (i.e. published) character collection (none as yet in Plane 14).
- **(Bold text between parentheses)** indicates scripts which have been accepted for processing toward inclusion in the standard.
- (Text between parentheses) indicates scripts for which proposals have been submitted to WG2 or the UTC.
- ¿Text between question marks? indicates scripts for which detailed proposals have not yet been written.
- ??? in a block indicates that no suggestion has been made regarding the block allocation.

NOTE: With regard to the revision practice employed in this document, when scripts are actually proposed to WG2 or to the UTC, the practice is to "front" them in the zones to which they are tentatively allocated, and to adjust the block size with regard to the allocation proposed.

The size and location of the unallocated script blocks are merely proposals based on the current state of planning. The size and location of a script may change during final allocation of the script.

NOTE: As far as is possible, half-row (128) and four-row (1024) boundaries are observed in planning.

Plane 14 is tentatively mapped out to the following zones.

```
00020000-0002007F  Tag characters
00020080-0002FFFD  unassigned
```

This document is being maintained and updated as a service to ISO/IEC JTC1/SC2/WG2 and the Unicode Technical Committee. Versions formally submitted to WG2 contain a document number in the header. The most recent WG2 document is available on the WG2 website, as N2116.
