1. Background information of Dongba script

Naxi is one of the 56 ethnic groups in China with population of 308,839 (2000 census) in total. Distributing in the joint area of Yunnan Province, Sichuan Province and Tibet Autonomous Region, Naxi people primarily inhabit Lijiang City of Yunnan Province. Yulong Naxi Autonomous County is the only one autonomous county of Naxi in China.

Dongba culture is an important part of the Naxi culture, including script, scripture, painting, music and dancing, and different kinds of ceremonies. Naxi Dongba pictographic script is a kind of pictogram used to write scriptures by the priests of the Naxi Dongba Religion. There are about 30,000 scriptures written in it, which are collected in libraries of China, America, German, Britain, France, Japan and Austria. Dongba scriptures are known as the encyclopedia of Naxi ancient society. They are precious resources for studying the language, society, history, religion and arts of Naxi, as well as the relation between Naxi and other ethnic groups. In 2003, Dongba ancient books were listed as world memory heritage by UNESCO.

Naxi Dongba script is the only pictographic script which is still in use today. It was mainly mastered by “Dongba”, the priests of Dongba Religion in history. Samples of letters and account books written in this script are found also. Nowadays Dongba script is not only used by Dongba priests and researchers, but also widely used in arts, business and tourism industry. Tourism products such as souvenirs and T-shirts of Dongba design and signboards and signposts of Dongba are easily found in Lijiang. Some Naxi people wrote couplets in Dongba to decorate their houses. Meanwhile the protection and inheriting of Dongba culture is highly valued by the local government and organizations. A Dongba culture training class covering basic knowledge of Dongba culture and writing of the characters is held irregularly to satisfy

the needs of more and more young people who want to learn Dongba. Dongba characters are taught in elementary schools in Naxi areas. Books for studying Dongba were published. Some of them provide translation of English, Japanese and other foreign languages besides Chinese.

As “the only living pictographic script in the world”, the Dongba script has high academic value and worth to be developed and utilized. Recently, the development of information and technology industry has promoted computer processing of Dongba pictographs. Several Dongba index systems and input methods such as e-Dongba have been developed. However, all existing software is made by means of scanning based on the dictionary of Fang. It is difficult to popularize them because there is no international standard. Encoding the characters in Unicode will make data transmission on the internet easier and people all over the world who are interested in Dongba can exchange their ideas freely.

2. The forming of the proposal

The standardization of Dongba script was given attention by the International Standard Organization and the departments of the People’s Republic of China such as the State Education Department, State Language Commission, State Standardization Administration and China Electronics Standardization. In May 2005, the State Education Department and the State Language Commission set “International standardization of Naxi Dongba pictographic script” as a research program of ethnic language standardization and computerization. This program was implemented jointly by the Yunnan Minority Language Commission and the Lijiang Dongba Culture Institute. The proposal of encoding Naxi Dongba script is the result of the program. In 2008 we submitted the first version of the proposal (N3452) to ISO/IEC JTC1/SC2/WG2. In 2010 we made some revisions to the first proposal and submitted the result as a new, preliminary proposal. This document here is the revised, formal proposal of the 2010 version.

3. Notes to the proposal

3.1 The principles for the characters collection

The characters collected in this proposal are based on the *Naxi Xiangxing Wenzhi Pu (A dictionary of Naxi pictographic characters)* by Fang Guoyu and *Moxi Xiangxing Wenzhi Zidian (A Dictionary of Mo-So Hieroglyphics and Phonetic Scripts)* by Li Lincan. 1188 characters are collected according to the following principles:

- A. Different characters can be used to express the same meaning in Dongba scriptures which go around in different areas. In the proposal the common one is included, excluding all the variants.
- B. The Geba script is not included in this proposal, for it is a syllabic writing system and different from the Dongba pictographic script.

3.2 Order of the characters

The Dongba characters are arranged by categories in tradition, such as *Naxi Xiangxing Wenzhi Pu* and *Moxi Xiangxing Wenzhi Zidian*. Considering the international general rule and convenience of application, the Naxi Dongba pictographs in this proposal are arranged in alphabetic order based on their Naxi Pinyin names: The Dongba characters are transcribed in

the Naxi Pinyin orthography first and then arranged in alphabetic order.

3.3 Font

The TrueType font of the Naxi Dongba pictographic characters in this proposal is developed by Beijing Founder Electronics Co., Ltd.

3.4 Sources of the characters

We provide source of each character in this proposal. As we stated before, all the characters collected in the proposal are from Dongba dictionaries by Fang Guoyu (1981) and Li Lincan (1953). The detailed information of each character such as the page, number and category are provided.

3.5 Naming of the characters

The Dongba characters in this proposal are named after the Naxi words referring to the symbol according to the Naxi tradition. Because there are lots of homophones, we append numbers to distinguish names which would otherwise be identical.
