## ISO/IEC JTC1/SC2/WG2 N4468 L2/13-136 2013-06-15

**Title:** Additional Siddham Variants **Source:** Scripts Encoding Initiative (SEI)

**Author:** Anshuman Pandey (pandey@umich.edu)

**Status:** Liaison Contribution

**Action:** For consideration by UTC and WG2

**Date:** 2013-06-15

## 1 Introduction

The "Proposal to Encode Variants for Siddham Script" (N4407R) submitted by Taichi KAWABATA, Toshiya Suzuki, Kiyonori Nagasaki, and Masahiro Shimoda seeks to encode five additional characters, which are variants of already-approved Siddham vowel letters and signs. The rationale for encoding these glyphic variants as separate characters is based upon the notion that they represent distinct religious icons, such as various manifestations of *bodhisattva*-s, and should be considered as 'ideographically', therefore semantically, distinct from the normative characters. The five variant characters proposed in N4407R are:

VARIANT		REGULAR
%	%	U+11582 SIDDHAM LETTER I
<b>્યું</b> ૰	છુ	U+11582 SIDDHAM LETTER I
<b>ূ</b>	ઌ૾	U+11583 SIDDHAM LETTER II
કુ	3	U+11585 SIDDHAM LETTER U
্	ુ	U+115B2 SIDDHAM VOWEL SIGN U
ू	ુ	U+115B3 SIDDHAM VOWEL SIGN UU

The names proposed in N4407R for these variants are as follows

```
SIDDHAM LETTER I VARIANT FORM A
SIDDHAM LETTER I VARIANT FORM B
SIDDHAM LETTER II VARIANT FORM A
SIDDHAM LETTER U VARIANT FORM A
SIDDHAM VOWEL SIGN U VARIANT FORM A
SIDDHAM VOWEL SIGN UU VARIANT FORM A
```

However, there are other glyphic variants that may also be considered as being 'ideographically' distinct from the normative form. Note, for example, the variant form f of f SIDDHAM LETTER AA used in writing the seed-syllable f (see figure 1). See also the variants given in the *Shittan Sanmitsushō* (figures 2 and 3). Some of these are listed below.

VARIANT		REGULAR
Ŋ	Ħ	U+11581 SIDDHAM LETTER AA
八	凭	U+11581 SIDDHAM LETTER AA
恐	秩	U+11581 SIDDHAM LETTER AA
દ	7	U+11585 SIDDHAM LETTER UU
₹	₹	U+11586 SIDDHAM LETTER VOCALIC R
₹	₹	U+11587 SIDDHAM LETTER VOCALIC RR
₹	¥	U+11587 SIDDHAM LETTER VOCALIC RR
દુ	স্ত	U+1158C SIDDHAM LETTER O
દુ	X	U+1158D SIDDHAM LETTER AU
6	<b>~</b>	U+115C1 SIDDHAM SIGN SIDDHAM

## 2 Recommendation

The 5 characters proposed in N4407R do not constitute a complete set of Siddham variants. No decision should taken on N4407R until additional research can be conducted in order to establish a complete set of variants. The recommendation to postpone a decision on N4407R certainly has no bearing on the progress of the encoding of the Siddham block, which is already at an advanced stage of ISO balloting. In any case, encoding decisions should not be rushed and should only be taken after due diligence has been performed.
