Japan NB proposes to add updated collection of coded graphic characters and variation sequences, “MOJI-JOHO-KIBAN IDEOGRAPHS” which enhances the collection “390 MOJI-JOHO-KIBAN IDEOGRAPHS-2016” prescribed in ISO/IEC 10646:2017. It includes CJK Unified Ideograph Extension F, Unicode IVD 2017-12-12 Moji\_Joho collection and 2 urgently needed characters proposed on SC2 N4539 (U+9FEE and U+9FEF on PDAM2.2).

This collection will completely cover the ideographs proposed from “MOJI-JOHO-KIBAN” project of Japanese Government and it will contain 52,518 UCS code points, 11,384 IVSes and 89 SVSes.

By this revision, Japan NB also proposes to add a notice indicating “390 MOJI-JOHO-KIBAN IDEOGRAPHS-2016” is deprecated.
